AN INDEX OF THE REPORTS APPEARING
IN THIS VOLUME WILL BE FOUND
AT THE END OF THE BOOK

INAUGURAL ADDRESS OF MAYOR THOMAS J. McGRATH
IN THE HIGH SCHOOL HALL, MONDAY,
JANUARY 7, 1929

Gentlemen of the City Council:

As today marks the fortieth anniversary of the existence of city government in Quincy, I think we may for a moment stop and think of what forty years has meant in the life of the community. This span of years is not, either in the life of man or in the measure of time in a community, of much importance.

In comparison with the ancient history of old-world cities our American communities are extremely youthful. The metropolitan community of all New England can only boast of little more than one hundred years as a city and all other municipalities take subordinate rank as organized city governments.

Quincy, organized as a town in 1792, experienced in the intervening ninety-seven years of town government all the vicissitudes and all the hardships of a typical Massachusetts town. When, however, its town form of government became too cumbersome to adequately give service to the people a change was made to a less democratic but more representative method of government. During the years which have elapsed since 1889, extraordinary changes have taken place in the city. The whole character of the town has in a measure changed, and what was the placid New England country town gave way to the life and habits of a highly developed industrial city.

Perhaps nothing better demonstrates the remarkable changes that have taken place in Quincy since the inception of the first city government than in a perusal of the cost of that initial government and the net cost of the city in 1928. In 1889 the whole cost of the government was \$343,486.34, while the budget of last year was more than ten times this sum. The population in 1889 was 14,600 and the estimated population in the present year is 70,000, or five times what it was when Quincy became a city. The valuation of the city in the first city year was \$12,319,245 and the valuation in 1928 was more than \$135,000,000, or eleven times more than in 1889. The expenditures for all school purposes in 1889 were \$60,505.45 while the expenditures last year exceeded \$1,000,000 or almost nineteen times the educational costs of the first year of the city government.

These comparisons tell the story of Quincy's progress. Occasionally many of us demur at the high price which we must pay for living in a progressive community. Most of us upon reflection are willing to concede that these costs are only in keeping with what we demand and receive from the city government. Quincy has no reason to regret the money spent for the many fine public improvements which we have enjoyed in the last few years, and I deem it to be the sense of the community that this progressive policy shall be maintained.

Before proceeding with an outline of the 1928 program I have deemed it a matter of interest to give a summary of what the city

has spent for extraordinary purposes in the eleven-year period beginning in 1918:

Streets	\$1,923,800 00
Sewers	612,000 00
Water	1,074,700 00
Drains	359,495 00
Hospital	538,000 00
Schools	3,017,500 00
Southern Artery	213,000 00
Norfolk County Hospital	85,951 81
Monatiquot Bridge	52,000 00
Granolithic Walks	211,669 57
Grand Total	\$8,088,116 38
Average Capital Expenditures per year during this eleven-year period	\$735,283 30

From the foregoing tabulation it will be seen that Quincy has not been niggardly in providing those public improvements which strongly attract people to the city as a place of residence. While the expenditures in the past have been on a generous scale the needs of the community are still unsatisfied. The rapid development in certain sections has created an unusual demand upon the City Council, and while a great deal of public work has been accomplished the extraordinary increase in population has created a situation which cannot be met within the present limit of indebtedness.

New School Buildings

I refer particularly to the immediate and imperative need of new school buildings and the inadequacy of present credits to furnish capital. Under the operation of the statute, cities are allowed to use for all ordinary purposes two and one-half per cent of the average of the three preceding years' valuations. If Quincy were adding to wealth and population at the average increase rate in other cities of the state it would not be difficult to finance all improvements inside our present debt limit. Quincy, however, has the distinction of adding to its population a greater percentage of increase than any other Massachusetts city or town, with the result that school needs multiply at a rate quite beyond the scope of the statute which limits our indebtedness. Just so long as this increase in population continues we will have the problem of trying to provide sufficient school accommodation out of the wholly inadequate credits provided by law.

Of all the problems confronting the city government none demands more serious thought than that pertaining to our schools.

As shown by the summary just given the expenditures for school buildings exceeded three million dollars in eleven years, an average outlay of \$274,318. In every year since 1923 one or more buildings have been added to the school equipment. Despite this liberal policy the need for new buildings is far from being fulfilled. In 1927 the city opened two junior high schools and in 1928 the Webster addition was ready for occupancy. The natural thought was that those new buildings would suffice for some time, and that the city would be relieved from the anxiety caused by crowded school-rooms.

The new buildings, however, only helped the situation for a while. The three junior high buildings are already filled and in the North Junior High the pupils greatly exceed the capacity of the building. The situation in this district is so acute that an addition to the

present building is an imperative necessity. The request for an addition to the North Junior High and for additions to the Wolleston and Gridley Bryant are among the possible recommendations of the school committee for 1929. In extending the facilities for housing the children in the Merrymount and Adams Shore district two ten-room buildings are now under construction and will be ready for the opening of the September term. These buildings will relieve the present over-crowded condition in the Coddington School and will at the same time provide the necessary school facilities for the children in two rapidly growing communities.

In seeking to meet the exigencies of a school building situation, which has no parallel in the history of Quincy and perhaps is without parallel in any municipality in the State, the Council late in the year granted \$3,000 to be spent in procuring plans for additions to the Montclair and Atherton Hough buildings. These plans are now being made and it is expected that they will be ready for inspection by the school committee early in February. In both these districts the children in the first grades are on a part-time basis and in the other classes the crowded conditions seriously impair the efficiency of the school work. At best these latter plans will not be ready for the Council much before the middle of February or early March, and appropriations for them will not be available, even if there is no lapse in the processes of legislation, before the first of April. If by good fortune, the contracts for construction could be awarded by the middle of April there might be hope that the buildings could be finished in six or seven months. This would mean that in these districts, now badly overcrowded, relief would be afforded some time in the fall.

I have devoted more than the usual amount of space to consideration of school matters for a two-fold purpose: first, to draw attention to the unusual situation relative to our school buildings; second, to bring forcibly to the attention of the Council and the people of Quincy the paucity of our resources. On one hand we have innumerable demands, and on the other hand we have the insuperable barrier of limited credits.

I believe that the members of the Council feel the urge to do as much constructive work as is possible, not alone in school buildings but in every other activity which is a part of a city's life.

Financial Review

In considering the work of the new streets, sewers, school buildings and the general development of the city we must always keep our eye on the financial side of the ledger. For this reason I will give here a summary of our credits on January 1, and what these credits will be at different periods during the year. In parallel column I am also giving the estimated cost of some of the projects which will early demand attention from the City Council. I have also given the margin accumulation month by month through the year.

Credits

Margin within debt limit.....	\$431,009
To which may be added the maturities by months:	
February	16,500
April	67,000
May	17,000
June	14,000
July	135,000
August	68,500
September	72,000

CITY OF QUINCY

October	47,000
November	6,000
December	44,000
Total credits for year.....	<u>\$918,009</u>

Liabilities

Schools at Merrymount and Adams Shore.....	\$83,000
Sewer Construction	70,000
Squantum Street Widening.....	55,000
Chestnut Street	90,000
New Streets	150,000
Schools at Montclair and Houghs Neck.....	325,000
Estimated	<u>\$773,000</u>

Borrowing Margin During Each Month, 1929

January 1	\$431,009
March 1	447,509
May 1	514,509
June 1	531,509
July 1	545,509
August 1	545,509
September 1	680,509
October 1	749,009
November 1	821,009
December 1	868,009
January 1	874,009
January 1	918,009

From the exhibit here shown it will be seen that our total credits for the year will be \$918,009. If this sum were available on June 1 there would be no difficulty in financing any of our many undertakings, but unfortunately this sum is largely made up of accumulations after August 1st. This is rather late in the year to start work that is seasonal in character, and in consequence the Council will be forced to provide money for many objects from credits available not later than June 1. The margin on June 1st will be \$531,509.

The whole question of how to finance our urgent needs is the outstanding problem of the year. If I may so suggest to the members of the Council I think our wisest plan would be to allocate the sum of \$325,000 for new schools at Montclair and Houghs Neck and \$70,000 for sewer construction. These sums would total \$395,000 and would leave a credit balance January 1 of \$36,009. On May 1 this credit would be \$119,509 and the Council could at that time make an initial appropriation of \$100,000 for new streets. The payment for West Squantum street and for the preliminary work on Chestnut street could be financed out of surplus income until such time as the margin available was large enough to support a loan issue. The money for both these projects could be obtained after August 1.

This outline of what is possible to do within our financial resources leaves untouched the problem of how to finance the extension of Franklin street. I do not believe that this matter need give undue anxiety this early in the year as the preliminary work of surveys and studies of the proposed street will take some time. The public hearing on the acceptance of this street will probably be held early in February and the probabilities are that the Council will want to take reasonable time before taking final action.

Need for More Money to Provide School Buildings and Hospital Additions

With the unusual situation relative to school buildings now fairly well understood by all I hope that the needs of another splendid institution will not be overlooked. The hospital is doing a fine work for the people of the city and its good name is growing even faster than the demand made upon it for service. The present facilities do not meet the needs of the city and the Council last year voted the sum of \$5,000 for the purpose of procuring plans for a new building. The architects, McLaughlin and Burr, promise these plans within a short time and then the city government will be confronted with another problem—that of finding a way to finance the hospital addition.

This brings us to a realization of the limitations of our present indebtedness law. By the terms of the municipal indebtedness act cities are allowed to incur indebtedness not exceeding two and one-half per cent of the preceding three years' valuation. When Quincy became a city and for some years afterward the limit of indebtedness was one and one-half per cent. The increase of one per cent was granted because of changed conditions in the cities. The present limit antedates the war period and is manifestly insufficient to meet the needs of a community like Quincy. To repeat an old story we can only say that under the present law Quincy is unable to meet the demands caused by the increase in population.

For many years there has been a feeling that the law relative to municipal indebtedness should be changed, but so far the Legislature has not granted additional latitude to cities. A recess committee has been studying this problem and perhaps some more generous provision will be made in the matter of indebtedness. The nature of these recommendations has not been given to the public, but in the meantime our own situation impels me to ask the support of the Council in petitioning for an additional grant of credit. As of January 1st of this year our debt outside the limit is \$2,543,500, of which sum \$788,000 is for water and the debt inside the limit is \$2,770,000, making the total indebtedness \$5,313,500.

Based on a valuation of \$135,452,648 our indebtedness is 3.92 per cent of last year's valuation. I believe this is a very favorable showing and a good argument why we should be allowed to add at least one-half of one per cent to our total indebtedness. This would give \$640,201 and would assure the city that all school and hospital buildings could be immediately constructed. Once we can overcome our present difficulties I am sure that all future construction can be provided out of accumulated credits. I hope the Legislature will listen to our plea as I feel that we are amply justified in asking for relief because of the operation of two factors: the growth in population and the decreased value of the municipal dollar through the inflation of construction costs.

Abolition of Grade Crossings

For many years the people of Quincy have waited patiently for fulfillment of the conditions embodied in the decree plan but unfortunately nothing substantial had been done up to 1927. Soon after the opening of the year proceedings were brought to compel action by the railroad company and a decision favorable to the city was rendered by the court.

From this decision the railroad company appealed and while this appeal was pending the whole matter was taken up directly with the railroad officials.

With the city solicitor I have attended many conferences with

the railroad heads with the result that the latter submitted certain modifications to the decree plan. I felt that this was a matter which had been long delayed and which did not promise immediate fulfillment unless the parties in interest could accept a plan which might be somewhat different from the decree.

The late city engineer and the engineer of the railroad company had substantially worked out plans that seemed worthy of the consideration of the city council, and as soon as these plans are completed the whole matter will be submitted to the Council.

Beale Street Widening

Now that the city has successfully carried through the widening of West Squantum street and the new bridge, we may look forward to the time when Beale street, from Hancock street to Newport avenue, will be similarly treated. This main artery carries considerable traffic of all kinds and the present roadway and bridge are not of sufficient width to accommodate the constantly increasing travel. Beale street is the principal business street of the district and a new bridge and wider roadway will do much to increase the value of property in this section.

While this meritorious undertaking may not be possible this year I hope that plans may be soon perfected so that if means are at hand in 1930, the work can be done. If, however, the grade crossing problem at Quincy and Quincy Adams can be solved this year it might be advantageous to the city if the Beale street work could be done at the same time. The two projects are in no sense related, except that the railroad intends to drop the tracks at Wollaston when the grade crossing work is done. If this plan is followed our only difficulty will be a matter of finance, but I believe that this can be taken care of at the proper time.

Public Health and Recreational Work

I feel it would be unfair if mention was not made of two agencies which have splendidly responded to the public needs. I have in mind the work of the Health and Park departments, which, although dissimilar in scope, similarly serve as builders of the body.

The health work in this city is second to none in its intensity and thoroughness, particularly among young children, and I feel a definite pride in the enthusiastic co-operation of the public in the work of the various clinics and in the health camp at Braintree, the latter a new activity in 1928. That the work for the children has been of inestimable value is attested by the health statistics of the city, and it is to be hoped that this commendable undertaking will gain increased public support.

To the work of the Park Department equal praise must be given. Our playgrounds have been equipped and supervised, and during the season have been the rendezvous of hundreds of young children who have been expertly guided in their summer play. By advice of the Park Board the time of supervised play was extended until middle October, but I am not fully informed as to the net results of this innovation. The whole purpose of our playgrounds has been so manifestly successful that I hope that the good work of child recreation will gain new momentum with the succeeding years.

Tax Collections

In my statement to the Council at the beginning of 1928 I called attention to a matter which has long been a reproach to Quincy. Our tax collections are altogether too slow and in consequence the

city is penalized each year in interest and principal charges on temporary notes. The fault does not rest with the tax collector or with those working with him, but is the cumulative result of many years' indulgence toward the backward taxpayer. City officials are importuned year in and year out to withhold tax sales and the sequence is always the same—our collections are so long delayed that the temporary loan obligation becomes a fixed debt charge.

The fault is so largely in custom that I sincerely hope that in any discussion of the problem of tax collections all tax collectors may be absolved from blame. The situation, however, calls for drastic action. The city needs the income to maintain its departments, and this should be collected with reasonable promptness.

One reason for the outstanding success of the state and county governments is that their incomes are collectible within a specified time. If a municipality or individual does not meet demands by the state and county, penalties are immediately imposed and the offending city or individual is humiliated as well as penalized for not meeting just demands. There are, of course, obvious difficulties in enforcing collections in municipalities. Concessions must be made to those who either because of poverty or sickness are unable to pay promptly, but in the majority of cases failure is simply the result of too much lenity on the part of the city.

The situation here has become so alarming that a more stringent policy must be adopted. Tax sales will be held early this year and will be continued until such time as the entire levy is collected. In 1928 the city was forced to incur an indebtedness of \$150,000 to cover the shortage in tax collections. To avoid a repetition of this circumstance and also to force a different attitude toward this important matter I intend to invoke the power of the law to get payments of overdue taxes.

Water Department

At other times the members of the Council have been informed of an impending change in water rates due to certain increases in Metropolitan charges because of the new water loan. This loan is \$65,000,000 and it is expected that it will be taken up within fifteen years, with the heaviest drafts within ten years. It is apparent that this means a very heavy increase in assessments to Quincy. Unless the city is willing to assume the burden in general taxation water users must pay higher rates. An attempt was made last year to defer principal payments until the peak of the present loan was passed but failed because of the governor's veto.

Another attempt may be made to get a similar measure through the Legislature this year and thus avoid the burden of two big debts coalescing within the next few years. Our present municipal water charges are not adequate to meet the expenses of the department, and the city annually makes up a deficit through charges against departments. No present computation has been made by the Metropolitan District commission as to the probable charges against any community. Therefore Quincy must wait until actual outlays are made for the new system before definite information can be obtained.

The Fire Department

Under authorization by the Council in 1928 this important department will be strengthened by creating four new places and by an addition to the personnel. The men promoted to deputy chiefs and to captaincies will have an opportunity to get training to fit them for the responsibility of directing operations at fires. I feel

that the appointees will fully realize the responsibilities of their new berths and will give freely of their efforts to fit themselves for their new duties. When all the appointments are confirmed and adjustments made I am confident that the earnest work of increasing the efficiency of this department will go forward with enthusiasm.

Last year the Council consented to the retirement of two members and this year, if possible, it might be well if other retirements are made. The majority of the members should be men in their prime, more especially so because of the type of buildings being constructed which offer a greater challenge to physical agility than did the one-story type. The department is in the main well-manned and well-equipped and the promise is good that soon after reorganization the force may be given periodical drills in all the phases of fire fighting.

One great disadvantage in successfully coping with the fire hazard in the business districts is the overhead wires but I am hopeful that within these districts immediate steps will be taken to carry all wires in conduits. This work has actually started and from the station on Field street to a point near the High School the wires are underground. The company has signified its intention of extending this work to cover part of Quincy Square. The work of burying the wires is expensive, but considering the dangers of the present overhead system and the obstacles placed in the way of the firemen I feel that the change should be carried on until all business districts are cleared.

The Police Department

Six new members were added to this department last year to meet the demands for more protection in certain sections of the city. I am of the opinion that the force is large enough for the needs of the city provided that every member is giving his maximum service.

This maximum service is not given in all cases due to much intermittent sickness and as a consequence there is more or less shifting about to take care of these absences. This brings down the efficiency of the force and also tends to weaken morale. Sympathy and consideration will be generously given to those stricken with a serious sickness.

One loses patience where periodical absences are ascribed to sickness, either fancied or simulated. The mayor has no power under present ordinances to deal with this situation but must rely on the council to correct what appears to be a growing evil in this department.

While I hesitate to recommend police retirements I firmly believe there are cases where such would tend to increase efficiency. More information on this point will be at hand when the detailed result of the recent physical examination is at hand.

Comfort Station

One of the great needs of the moment is a comfort station in City Square. The city is rapidly becoming a trading center for a very wide constituency and we all feel the need of providing accommodations for those who come into the city. It is not an easy thing to make a decision as to site, but I believe that something should be done to bring Quincy in line with other progressive communities. Early in the year a new plan will be submitted to the Council, and if it should meet with approval means may possibly be found to provide this essential service.

Building in Quincy

The new building value continues to show a healthy increase, this year being approximately six millions of dollars. I have always held the opinion that as long as the city was growing at the rate of five or six millions a year we could look forward undismayed by the seemingly big expenditures authorized each year. The prospect is that this growth will continue for at least five years, and consequently during this period we can assume greater burdens than if the promise was not so alluring. Our great anxiety should be to keep budget charges within the income from this new wealth and thus avoid the hurtful expedient of increasing valuations or rates to meet costs. I firmly believe that if our increase in wealth should be at an average yearly rate of five millions we can add materially to our debt total and yet not make the increase apparent to the taxpayer.

The City's Growth

Elsewhere in this statement reference has been made to the widespread recognition given to the remarkable growth of Quincy in population and wealth. This growth brings its inevitable problems and forces the city to do things which would not be possible if the trend was in an opposite direction. The city welcomes every addition to its business and to its population and forgets the problem created thereby as it proudly realizes that these factors give to the community pre-eminence and indelible marks of superiority as a municipality.

Within the last few years a number of splendid buildings have replaced old and antiquated structures with the happy result that the city now boasts many fine modern structures. These signs of progress are seen in all sections of the city so that the stranger does not get here the contrasts that so vividly mark other communities. Our emergence from a small city to a larger one has been steady and healthy. While the mark of progress is seen everywhere it is most conspicuous when we view the development of Quincy Centre from Adams to School streets. Here values have tremendously increased through the erection of new buildings.

We hope that the courage of those who have made these investments will be rewarded by success and that others may be induced to choose this city as a place of business. The proximity to Boston and ample railroad facilities offer strong inducements to business of all kinds to locate here. The very fact that Quincy has grown so fast in the last decade draws attention to one of our serious problems.

The needs of the municipality must not be borne wholly by the home owner and consequently the great need is more business and more opportunities for employment.

This is the first segment of the circle and if we can induce business to locate here we will not only help the average taxpayer in his burden, but we will create new wealth upon which taxes must be assessed. With conditions as settled as they are here and with the natural and created advantages of the city so apparent a strong inducement is offered to the home seekers as well as the business enterprise to locate within our city limits.

Work Done in 1928

I have purposely refrained from any extended statement regarding the work done in 1928, as detailed information of the streets, sidewalks, drains, sewers and water construction will be given in the annual city report. I trust that the good work of the last year will be continued this year even though we must curtail a little in

the amounts to be spent for the different objects. In some instances quite noticeable advances were made in certain directions, particularly in sewers and drains, and if the means are at hand these improvements should be extended. The drain work done has been so distinctly beneficial that the city is almost under compulsion to give all sections the benefit of good drainage.

The New Year and Its Opportunities

We are at the threshold of a new year. The people of the city have given us their confidence and good will, and in return for these marks of approbation we give our pledge of unflinching service. The opportunities are many, and I am quite certain that in planning the work of the year the mayor and city council will do their part in upbuilding the city. During the ensuing twelve months there will be many things which will come to the Council for settlement. Not all requests can receive favorable action. The more important matters, however, are so urgent that I feel that the sound sense of the Council will give these matters precedence over all others. We may with satisfaction look back at what has been accomplished in other years and firmly resolve that as far as our resources will permit the record of progress shall be maintained.

There are many matters which I might bring to the attention of the Council, but as they can be discussed at other times I forego any mention of them here. In closing this statement I cannot forego the opportunity of thanking those officials who have helped so substantially in carrying through the work of the past two years. Where this support has been so generously given by all it is not necessary to make personal mention, and I therefore simply make acknowledgment of the fine service so freely given by the men and women who work for the City of Quincy. I trust that the same co-operation which characterized the work of 1927 and 1928 will be manifest in the two years before us.

Fore River Bridge

The present structure over the Fore River is quite inadequate for the travel that uses it as a means to get to points along the South Shore and beyond. It never was a satisfactory bridge and its structural weaknesses cause a considerable yearly outlay for repairs. Under present arrangements several towns, Norfolk county, Eastern Massachusetts Street Railway company and the City of Quincy are responsible for its upkeep. This city pays approximately one-third of all costs of maintenance. A new bridge is needed, and in response to this feeling the trustees have formally voted to petition the Legislature for a new structure.

I think we are all in accord with the plan to help the traffic over the river by a better and more modern bridge. Our concern is regarding the manner of payment. The old method is quite unfair as it places on neighboring communities the whole cost, whereas the bridge is largely used by people who live outside these communities. The Fore River bridge as the gateway to popular beaches and the Cape should be in part, at least, a state undertaking. The new bill will seek to place the burden of payment on a wider area than is at present charged with the care and upkeep of the bridge.

Financial Statement

In this statement to the Council I have added a summary of the financial condition of the city. Except for the fact that we have not sufficient credits for the work of the year the showing is very satisfactory. One striking feature of the summary is the small

1928 increase in the funded debt, namely \$8,500. When it is realized that we spent \$730,000 for improvements the small net increase gives us courage in facing the large expenditures necessary for new building construction. The total funded debt of the City, January 1, was \$5,305,000. During the year this was reduced by payments as follows:

City debt within the limit.....	\$370,000
Sewer debt within the limit.....	72,000
Outside the debt limit:	
Sewer	23,000
Water	108,000
County Hospital	8,000
City Hospital	13,000
High school land and building.....	59,000
Monatiquot bridge	10,000
South Junior High School.....	30,000
Government School	16,000
Southern Artery	12,000
	<hr/>
	\$721,500

The funded debt during the year has been increased as follows:

Within the debt limit:

Sewer	\$110,000
New Streets	200,000
Sanitary Sewers	25,000
Merrymount and Adams Shore Schools.....	220,000

Outside the debt limit:

Water Construction	75,000
Southern Artery	100,000
	<hr/>
	\$730,000

Summary

*Funded debt January 1, 1928.....	\$5,305,000
Bonds paid during the year.....	721,500
	<hr/>
	\$4,583,500
Bonds authorized and issued during the year.....	730,000
	<hr/>
Net Debt	\$5,313,500
Increase funded debt.....	\$8,500

The funded debt of the City is as follows:

School buildings, furnishings.....	\$2,278,000
Water	788,000
Sewer	553,500
Streets	849,000
Hospital—City, Buildings, Equipment.....	325,000
Surface Drains	131,000
Fire Station, Apparatus.....	68,000
Police Station	70,000
Monatiquot Bridge	20,000
Permanent Walks	17,000
Hospital—County	5,000
Cemetery Land	8,000
Southern Artery	201,000
	<hr/>
	\$5,313,500

*This includes \$125,000 authorized in 1927, issued in 1928.

BORROWING MARGIN FOR 1929

General Laws. Chapter 44, Sec. 70

Except as otherwise authorized by law a city shall not authorize indebtedness to an amount exceeding two and one-half per cent on the average of the assessors' valuation of the taxable property for the three preceding years, the valuation being first reduced by the amount of all abatements allowed thereon, previous to December 31 of the preceding year.

Net Valuation 1926.....	\$120,087,845
Net Valuation 1927.....	128,580,589
Net Valuation 1928.....	135,452,648
	<hr/>
	\$384,121,082
Three years' average.....	\$128,040,360

REPORT OF THE AUDITOR

APRIL 1, 1929.

Honorable Thomas J. McGrath:

In accordance with the ordinance of the City, I submit the annual report of my department, showing in detail the receipts and expenditures of each department.

Also several statements showing the financial condition of the City at the close of the financial year, December 31, 1928.

ELIZABETH N. DUNN,
Auditor of Accounts.

IN COUNCIL

Order No. 143

Appropriation Order

FEBRUARY 27, 1928.

Ordered:

That the several sums named herein be and are hereby appropriated for the payment of the expenses of the City of Quincy for the financial year beginning January 1, 1928 and ending December 31, 1928 to be expended by and under the direction of the several officers or boards as herein designated.

That the appropriation for Bonds, Interest, and Expenses of Water Department, be paid from Water Receipts.

CITY DEBT FOR YEAR 1928

The total funded debt of the city, January 1, was \$5,305,000.00. During the year this was reduced by payments as follows:

City debt within the limit.....	\$370,500 00
Sewer debt within the limit.....	72,000 00

Outside the Debt Limit

Sewer	\$23,000 00
Water	108,000 00
County Hospital	8,000 00
City Hospital	13,000 00
High School land and building.....	59,000 00
Monatiquot bridge	10,000 00
South Junior High School.....	30,000 00
Government School	16,000 00
Southern artery	12,000 00
	\$721,500 00

The funded debt during the year has been increased as follows:

Within the Debt Limit	
Sewer	\$110,000 00
New streets	200,000 00
Sanitary sewers	25,000 00
Merrymount and Adams Shore Schools.....	220,000 00
Outside the Debt Limit	
Water construction	\$75,000 00
Southern artery	100,000 00
	<hr/>
	\$730,000 00
Summary	
Funded debt January 1, 1928	\$5,305,000 00
Bonds paid during the year.....	721,500 00
	<hr/>
	\$4,583,500 00
Bonds authorized and issued during the year.....	730,000 00
	<hr/>
Net debt	\$5,313,500 00
Increase funded debt.....	\$8,500 00
The funded debt of the city is as follows:	
School buildings and furnishings.....	\$2,278,000 00
Water	788,000 00
Sewer	553,500 00
Streets	849,000 00
Hospital—City, buildings and equipment.....	325,000 00
Surface drains	131,000 00
Fire station and apparatus.....	68,000 00
Police station	70,000 00
Monatiquot bridge	20,000 00
Permanent walks	17,000 00
Hospital—County	5,000 00
Cemetery land	8,000 00
Southern artery	201,000 00
	<hr/>
	\$5,313,500 00

This includes \$125,000 authorized in 1927.

BORROWING MARGIN FOR 1929**"General Laws. Chapter 44, Section 70."**

Except as otherwise authorized by law a City shall not authorize indebtedness to an amount exceeding two and one-half per cent on the average of the assessors' valuation of the taxable property for the three preceding years, the valuation being first reduced by the amount of all abatements allowed thereon, previous to December 31 of the preceding year.

Net valuation, 1926.....	\$120,087,845 00
Net valuation, 1927.....	128,580,589 00
Net valuation, 1928.....	135,452,648 00
	<hr/>
	\$384,121,082 00
Three years' average.....	\$128,040,360 00
Two and one-half per cent.....	\$3,201,009 00
Debt January 1:	
City	\$2,454,000 00
Sewer	316,000 00
	<hr/>
	\$2,770,000 00
	<hr/>
Margin within the debt limit.....	\$431,009 00

Bonds coming due, which increases borrowing margin in 1929:

Civic Meetings and Observances Held in the City of Quincy During the Years 1927 and 1928

State convention of the General Federation of Women's clubs in the auditorium of the High School on Wednesday and Thursday, February 23-24, 1927. The Quincy Women's Club was hostess to the visiting delegates. The gathering was welcomed to the city by the Mayor and His Excellency Governor Fuller was the special guest of the opening session. At the meeting the following day Lieutenant Governor Frank G. Allen and Dr. George H. Bigelow of the State Board of Health addressed the delegates.

On Tuesday, April 19, 1927, the city dedicated the memorial to Presidents John Adams and John Quincy Adams with exercises in Merrymount Park. This memorial was voted by act of Congress in 1925 through the efforts of Mayor Barbour and the late Congressman Louis A. Frothingham. Preceding the dedicatory exercises a luncheon to representatives of the Adams family, members of the City Council and guests was given at the Neighborhood Club. The afternoon's exercises were preceded by a parade of civic and military bodies to the park where the formal exercises were held. Governor Alvan T. Fuller, Major General Charles P. Summerall, representing the Government of the United States, Major General Preston Brown, Rear Admiral Phillip Andrews, the Commandant of the Boston Naval District, Congressman Louis A. Frothingham, Senator David I. Walsh, and other representatives of the nation and State took part in the exercises at the bandstand. The monument was unveiled by Miss Abigail Adams, a great-great-granddaughter of the second President who was introduced by Mayor McGrath.

On Wednesday, June 15, 1927, the quarterly meeting of the Norfolk County Grand Army of the Republic and Relief Corps was held in this city.

The thirty-second annual session of the Grand Commandery of Massachusetts of the Knights of Malta was held on Wednesday, June 15, 1927. The visiting delegates were welcomed by the Mayor and by Hon. William A. Bradford, the president of the Chamber of Commerce.

The Sons of Italy in America held its sixteenth Annual State Convention in Quincy on August 19-21, 1928. The convention opened with a banquet in the Masonic Temple, which was attended by visitors from all parts of the State, Lieutenant Governor Frank G. Allen, representing the State, and Senator Walsh. The chairman of the meeting was Angelo P. Bizzozero, a member of the City Council. The welcome of the city was ex-

tended by the Mayor. On Tuesday evening, August 21, the delegates and invited guests were invited to a reception at the Neighborhood Club given by the Mayor and City Council.

On November 11, 1928, a memorial tablet to the memory of Quincy boys who died during the World War was dedicated. The memorial is a bronze tablet by Gorham and stands on the grounds of the Adams Academy. A parade of the veteran and military organizations preceded the exercises at the monument which were held at eleven o'clock in commemoration of the hour at which the Armistice was signed. At these exercises members of the military organizations, Gold Star Mothers, Quincy members of the Legislature, members of the City Council and interested citizens took part. The memorial contains the names of the following Quincy men who died during the World War:

Amount of interest collected	86 81
Costs collected during year 1928	\$5,995 05
Bank interest collected during year 1928	531 65

Total amount of cash collected in 1928..... \$3,705,448 73

JAMES B. WHITE,
Collector of Taxes.

REPORT OF DEPARTMENT OF HEALTH

APRIL 18, 1929.

To His Honor the Mayor and the President and Members of the City Council:

GENTLEMEN:—I am continuing the policy instituted in my report for 1927 in that this report for health department activities for 1928 is modeled on the scoring system adopted by the American Public Health Association. A revised form was adopted by the Committee on Administrative Practise in May, 1928. This newest revision was offered for use after January 1, 1929 and Quincy was one of the first cities to be scored by the revised form. The appraisal of public health activities in Quincy was done during March, by Dr. W. F. Walker, Field Director of the American Public Health Association.

"The method of scoring has been changed. The former plan assigned values for items which totalled 1,000 points, the section totals varying from 20 for Popular Health Instruction to 175 for Communicable Disease Control. In the new section each section totals 100 points and a weighted value or factor is applied to each section to adjust the total score to 1,000.

"The Appraisal form should be looked upon as capable of presenting a reasonably accurate picture of health service actually performed in a city as evidenced by selected typical activities.

"The new form is longer and contains three new sections: Cancer Control, Heart Disease, Sanitation and Food and Milk Control, the last named section being formed by separating these items from the section on Sanitation."

The following tables show the comparative scores for 1927 and 1928:

Activity	1927	1928
Vital Statistics	100	100
Communicable Disease Control	85	89
Venereal Disease Control	52	40
Tuberculosis Control	80	92
Pre-natal Hygiene	67	70
Infant Hygiene	64	80
Pre-school Hygiene	84	40
School Hygiene	*	61
Milk and Food	{	50
Sanitation	{83	66
Laboratory	92	72
Popular Health Instruction	90	93
Cancer Control	{	
Heart Control	{	12
Totals	68	71

1927 scored by Local Health Department with assistance of State Health Department.

*No report for 1927 available, 1926 score—61.

"Comparison of scores, using the revised Appraisal Form indicates that there is usually a five or ten per cent reduction in the score on this form, due to the inclusion of new items and the raising of standards."

I shall now take up each one of the health department activities individually; repeating what recommendations for improvement that Dr. Walker made and adding whatever comments made that might be of interest in a report of this nature. From now on all material in quotation marks is from Dr. Walker's report.

Vital Statistics

"It is of interest to note that statistical tables and charts have been kept of each of the locally important causes of death for the past 55 years. This service for the past two years has received the maximum score and is being administered and carried on in a way that reflects credit to the City of Quincy."

Communicable Disease Control

"For the first time within the history of the Health Department the City had no case of typhoid fever and diphtheria dropped from 54 cases in 1927 to a total of 19 cases in 1928." An epidemic of measles begun early in December, 1927 and lasted until about the middle of March, 1928.

"The practise of hospitalizing cases of communicable disease is well established in Quincy though in 1928 of the 241 cases of scarlet fever occurring in the City only 38 were hospitalized, a little more than 50 per cent of the number that should have received hospital care."

"For the improvement of the communicable disease control it is recommended:

(1) That continued effort be made to bring to the attention of the physicians the importance of early diagnosis in communicable diseases and the valuable service offered through the consultant service of the Health Department, State and local.

(2) That the extensive campaign carried on during 1927 against diphtheria particularly among the school children, be resumed and extended to include a larger per cent of the preschool group."

The second of these recommendations has been carried out:—An increased per cent of the preschool group are being reached and immunization of the first three grades of the public schools is to be started next week.

Venereal Disease Control

"It is recommended:

(1) That further steps be taken by the Health Department to acquaint the local physicians of the facilities of the department for doing follow-up work of delinquent cases and encouraging the prompt reporting of such cases.

(2) That physicians be urged to avail themselves of the preparations provided free by the Health Department for treatment of cases.

(3) That increased use be made of the clinic services now provided for venereal diseases."

As an additional recommendation I should like to suggest separate clinics for men and women. Until more money is appropriated this cannot be done.

Tuberculosis Control

"It is recommended:

(1) That the nursing service give special attention to visits in behalf of post-sanatoria patients bringing about a better balance between post-sanatoria and other nursing care."

As a matter of fact the great majority of Quincy's sanatorium cases are at Norfolk County Hospital and this hospital, by their own system of follow-up, relieves the local department of much of the burden.

(2) That open air classrooms be provided for potentially tuberculosis children. The Tuberculosis Dispensary Physician in his annual report for 1928 emphasizes the importance of supplementing the work accomplished in summer camps by such facilities."

Pre-Natal Service

"Maternity hygiene service in Quincy is provided almost entirely by the Visiting Nurse Association.

Quincy's experience with regard to maternal mortality (six deaths in 1926; 15 in 1927 and five in 1928) indicates that the present accomplishment is not as good as is possible. Recent demonstrations in this field point out clearly that maternal mortality rates between two and three for white mothers are quite possible, where adequate medical and nursing supervision is provided. The decision to abandon the idea of a pre-natal clinic is believed to be sound but it seems desirable to recommend a considerable extension of the pre-natal nursing service which at present reached less than 30 per cent of the total births. It is of course appreciated that a higher percentage of births have hospital delivery and many are under medical supervision outside Quincy. This does not mean, however, that instructive nursing service carried on in conjunction with the physician should not be desirable.

It is recommended:

(1) That, in view of the fact that pre-natal clinic facilities are not provided in Quincy, the present nursing service be somewhat extended to include a larger per cent of the total number of births.

Infant Welfare Service

"The clinic service, however, is said to be handicapped by lack of space.

In 1928, 1,032 infants under one year of age were registered with the nursing service of the Health Department. To these infants, 1,859 visits were made by the nurses of the department, while additional visits totalling 2,390 were made by the Quincy Visiting Nurses. The ratio of visits by nurses to infants registered with the service was 4.1. Adequate nursing service for a city with an infant mortality rate for the past three years of 51 to 75 requires an average of at least 10 visits to each infant registered.

It is recommended:

(1) That consideration be given to the provision of proper quarters for infant welfare clinics.

(2) That more time be devoted to securing the attendance of a greater number of infants at the welfare clinics.

(3) That the nursing services now provided for this group be extended to render more intensive service.

(4) That the program for infant hygiene include immunization against diphtheria of all infants registered with the clinic and nursing service."

Quincy is sadly in need of at least one health centre which would furnish quarters for not only an infant welfare clinic but also for correlation and centralization of pre-natal work, tuberculosis prevention, dental hygiene, pre-school clinics; posture and nutrition classes, habit clinics and diphtheria prevention clinics. This recommendation has been embodied in the annual report since 1923. At the present time on the second Thursday of each month it is possible to see the following activities carried on simultaneously at Woodward Institute: Infant Welfare, Pre-School, Habit, Diphtheria Prevention, Orthopedic and Nutrition Clinics. It is only through the kindness of the trustees of Woodward Institute that this is possible. Would that some public spirited citizen could present a health centre, or even the land for one, as a stimulus for others to contribute sufficient funds for a modest building. At the present time it is not feasible to handle a larger attendance at the welfare clinics. More intensive nursing service is possible only by securing another full time nurse or by instituting a system of generalized nursing.

The percentage of infants immunized against diphtheria is steadily increasing.

Pre-School Hygiene

"As in the case of infant hygiene, the nursing service is rendered by the Visiting Nurses and the Health Department, the former making 295 visits to the 200 pre-school children registered, while the latter made 619 visits to 598 pre-school children; a ratio of but 1.1 visit per child. Obviously such a small number of visits could not be expected to supply satisfactory service. Though the work in Quincy has increased to some extent, the recording of the service is not sufficiently complete and the activities are not as yet so well organized as to receive full credit.

It is recommended:

(1) That records of the infant and pre-school clinic service be separated so as to show the extent and volume of service rendered to infants under one year of age, and to those in the pre-school age group, as the type of service and emphasis should be distinctly different for these two groups.

(2) That the present clinic and nursing service be extended to insure more satisfactory and nursing supervision for the pre-school group. The program should include an active campaign for the immunization of all pre-school children in the City and a physical examination at least four months previous to entering school."

The first of the above recommendations is to be carried out. Until the present nursing force is increased in number it will be impossible to extend the present clinic and nursing service.

Many more pre-school children are being immunized than heretofore.

Health of the School Child

This is under the care of the School Department.

Public Health Nursing

"The public health nursing activities still show a specialization which has been proven by experience in other communities

to be costly and to prevent the most satisfactory handling of the cases carried, both from the viewpoint of the patient and of the nursing service responsible for the care. Considering the spread out nature of the city, specialization means a considerable loss of time in travel, which is both costly and wearing upon the nursing staff.

It is therefore recommended:

(1) That the Health Department, the Board of Education and Quincy Visiting Nurses give thought to the development of a program of nursing service as outlined above."

The Health Department is prevented only by an insufficient budget in carrying out the above plan—each nurse to have her own district—all under the charge of a supervisor. If proven satisfactory then the other two agencies might be induced to co-operate.

Food and Milk Control

"The practise of scoring food establishments has not yet been adopted in Quincy.

Records are not available showing the number of dairy cows in the area that were tuberculin tested in 1928 though it is reported that all raw milk sold in the city is from tuberculin tested cows.

It is recommended:

(1) That special emphasis be placed during the coming year upon the laboratory service in connection with milk control since only by careful supervision of raw milk before pasteurization and laboratory checking of the effectiveness of pasteurization can a clean and safe supply be assured to the community. By publishing the bacterial counts of the various distributors supplying milk for Quincy it may be possible to stimulate the production of a milk supply of higher quality than is now being furnished."

The first recommendation in the above paragraph is to be carried out. It does not seem advisable to publish bacterial counts except as average counts for three month periods. Until the public appreciate what bacterial counts really mean there might be considerable false emphasis placed on an occasional high count. This department would like to see compulsory double capping of milk bottles.

Sanitation

"It is recommended:

(1) That steps be taken to further the extension of sewage facilities of the city to all dwellings within the city and to eliminate as rapidly as possible the remaining privies which are a constant menace to the health of the community."

Because of the rapid development of the city this is going to be a very difficult recommendation to carry out.

Laboratory Service

"The services are deficient in the examination of specimens of tuberculosis syphilis, milk and water.

It is recommended:

(1) That the physicians be encouraged to use the laboratory facilities provided, especially for those items which are shown to be deficient in 1928.

(2) That greater use be made of the laboratory service in the milk control work."

Water examinations are not necessary inasmuch as Quincy is in the carefully supervised Metropolitan system.

Popular Health Instruction

"It is recommended:

(1) That the present program be continued, with the possible addition of special pamphlets on heart disease, tuberculosis and venereal diseases."

Heart Disease and Cancer Control

"It is suggested that facts regarding the prevalence of cancer and heart disease in the community be collected and that local physicians and other interested groups be encouraged to study these data in order that a satisfactory program for their control may be worked out."

For detailed reports of the various activities see the reports following mine. In Dr. Walker's report I have only abstracted the criticism. There is much that is commended in the same report. I should like to emphasize most particularly the following needs (some of these have been repeated for some years.)

(1) "It is to be hoped that in the near future that Quincy might have more commodious quarters for the Health Department. A 'Health Centre' would be the most logical way of co-ordinating all the various health activities of the city and could be used as well for the Health Department." (Report for 1927).

(2) Some of the staff are still underpaid for the highly technical services that they render in a most efficient manner.

(3) Establishment of the position of a nursing supervisor.

(4) Establishment of the position of a full time food inspector.

(5) Establishment of a generalized nursing service wherein each nurse could handle all the public health problems in her own section of the city.

(6) The immediate purchase of a new automobile.

"The National Board of Fire Underwriters has developed an appraisal form of rating the fire protection of cities. Poor standing means higher insurance rates. Improved standing means reduced rates. Such an appraisal form speaks in a language of dollars and cents that is un mistakeable. Are we not approaching a time when life and health and accident insurance companies will differentiate in their rates between cities with organized business-like health service and those with ill-equipped or disorganized machinery for public health protection (Appraisal Form for City Health Work 1929 Edition). The per capita cost for the Quincy Health Department has been 77 cents (net cost). A complete program of public health work usually means a per capita cost of \$1.00.

For all the co-operation and assistance that the Health Department has received I should like to thank the State Department of Health, the Quincy Visiting Nurses, His Honor the Mayor and the President and Members of the City Council.

The interest of the citizens of Quincy and the generous publicity of the newspapers have been most heartening. Finally

this report and the appended reports show the progress that is possible when a loyal and interested department puts its shoulder to the wheel.

Respectfully submitted,

E. B. FITZGERALD, M. D.
Health Commissioner.

MARCH 31, 1929

REPORT OF SUPERINTENDENT

JANUARY 1, 1929.

DR. EDMUND B. FITZGERALD, *Health Commissioner.*

DEAR SIR:—I hereby submit the annual report of the Department of Health for the year ending December 31, 1928.

The personnel of the department is as follows:

Commissioner of Health and Insp. of Milk	Dr. E. B. FitzGerald
Superintendent	Thomas G. Smith
Clerk	Verna M. Kelley
Sanitary Inspector	A. A. Robertson
Assistant Milk Inspector	James O'Dowd
Plumbing Inspector	J. J. Keniley
Inspector of Meats and Provisions	Howard Rogers
Dispensary Physician	Dr. C. J. Lynch
Child Welfare Physician	Dr. Rachel L. Hardwick
Venereal Disease Physician	Dr. E. E. Smith
Tuberculosis Nurse	Gert. T. Russell, R.N.
Tuberculosis Nurse	Mary E. Keeley, R.N.
Contagious Nurse	Cath. F. Coleman, R.N.
Child Welfare Nurse	Nettie D. Fowler, R.N.
Child Welfare Nurse	Mary E. Marr, R.N.
Inspector of Animals and Slaughtering	Dr. E. A. deVarenes

There has been one addition to the personnel of the department the past year, that of the appointment of Miss Mary E. Marr as assistant Child Welfare Nurse, made necessary with the constant growth of the clinics. She has proven very faithful and efficient.

Under date of June 1, 1928 this department made a hard and fast rule, to the effect that all complaints must be made in writing or in person at the office. This rule has worked to great advantage to the department, as we do not now receive any unnecessary complaints.

Appended you will find the reports of the various inspectors and nurses, also report of diseases and deaths reported for the year 1928.

See Auditor's report for statement of receipts and payments.

Respectfully submitted,

THOMAS G. SMITH,
Superintendent.

REPORT OF CHILD WELFARE PHYSICIAN

JANUARY 1, 1929.

EDMUND B. FITZGERALD, M.D., *Commissioner of Health, City of Quincy, Massachusetts.*

DEAR DOCTOR FITZGERALD:—It is my privilege to submit to you the report of the Child Welfare activities for the year ending December 31, 1928.

Statistics

There have been 354 clinics held this year.

330 clinics for the examination and regulation of feeding of children up to 3 years of age.

12 clinics for the examination and regulation of hygiene of children in the pre-school age group.

12 Orthopedic clinics.

The total registration is 1933.

Infants and children up to age 3 years, 1492.

Pre-school group ages 3 to 6 years, 130.

Orthopedic clinic registration, 164.

693 new registrations have been added this year. This is an increase of 71 over the figure of last year.

The orthopedic clinic registration has increased 100% since last year.

The total attendance figure is 7,002. A more detailed analysis of the statistics will be found in the reports of the Child Welfare Nurse and that of the examining physician at the Orthopedic clinics.

Enrollment and Attendance

For the past two years there has been in operation a plan designed to give the maximum amount of individual service to the mothers and promote the most intelligent use of the clinics by the mothers.

Needlessly frequent visits have been eliminated by having the doctor advise the mother the date on which she should return.

The following schedule guides the return date:—

Infants up to 4 months of age seen weekly for weighing regulation of feeding.

Infants 4 months to 7 months of age are seen every 2 weeks.

Infants and children over 7 months of age are seen once a month.

It has been a gratification to find that mothers have co-operated with this plan and used very good judgment in deciding for themselves whenever it was necessary to bring the children at a date not set by the schedule. The few babies who do not attend the clinic on the expected date are visited in their homes by a nurse.

It is obvious that while this plan automatically reduces the total yearly clinic-attendance figures it represents a saving of the time of doctors, nurses, and mothers and gives a greater satisfaction to all, because it tends to keep the daily attendance within a number compatible with individual attention. This plan has not influenced the total registration figure or the number

of newly registered children as compared with figures of previous years.

Attendance	Registration	Year	New Enrollments
7,800	1,561	1926	497
7,047	1,752	1927	622
7,002	1,933	1928	693

Clinic at Hough's Neck

In May, 1928, a new clinic was opened at Hough's Neck. This is an added convenience for the mothers who previously attended the clinic at Quincy and it is hoped, will extend the clinic service to some families who could not arrange the transportation to the Quincy Center clinic. The new clinic has lightened the attendance at Quincy Center to more satisfactory proportions.

Nutrition Work

Since October, 1928, the Educational Director of the New England Dairy and Food Council, Miss Marjorie L. Foster and her assistant Miss Mona McWilliams have given volunteer service in one clinic each month. At the Pre-school clinic Miss Foster has given talks to mothers in groups, while Miss McWilliams has entertained the children with health stories and picture books. The dietitian's talks have been illustrated by demonstrations which she prepared each month.

Topics for discussion include:—

The Tooth-building diet in the first 6 years of life.

Average servings of food for normal children—Illustrated in terms of household measures.

Christmas Candies for Children—Made from nutritious foods.

The choice of foods according to the Season's Market.

Economic buying for the Family Market Basket.

At each clinic the dietitian has an opportunity to help, individually, the mothers whose children have presented a specific dietary problem. Such conferences are held at the recommendation of the examining physician and the nurses have been carrying on the follow-up work in the homes.

Visitors

Seventy-five visitors have been welcomed to the Child Welfare clinics this year. Physicians, directors of public health activities, and students who will return to their homes for active participation in various kinds of health service have been interested to observe the health work in the Quincy clinics. The visitors have represented India, Japan, China, France, Italy as well as fifteen States other than Massachusetts.

Recommendations

Before making recommendations for 1929 it is interesting to review the progress of those submitted last year.

- (a) A physician in attendance at the clinics of each ward has been arranged.
- (b) Additions to the nursing service have been made which brings the staff up to the recommendations of last year, "at least two full-time nurses."

- (c) For the last two years there has appeared in the recommendations of this department a plan for proper housing of health activities. Necessity for this has become increasingly apparent as the work of the various clinics has been strengthened and developed.

At present the housing of the clinics is most conspicuously inadequate in the matter of proper rooms for weighing the babies. This is now done in the general waiting room where correct heating is difficult to arrange.

The educational work is severely handicapped by the lack of display space for exhibits and safe storage for demonstration materials.

A building which would meet the combined needs of the city's health activities for children should include:

- Clinic rooms suitably arranged, heated, and ventilated.
- Indoor and outdoor parking space for baby carriages.
- Class room space and equipment for group teaching.
- A library of health material for distribution.
- Space for permanent exhibits of health material.

There is already ample proof that many mothers welcome the instruction which has been offered in nutrition and classes in nursery training would give them the modern methods in child care to make more effective the work of the Pre-school clinics and the Habit clinic.

The development of Quincy in community centers makes it possible to organize the health work to meet the needs of each neighborhood—but the lack of proper housing is sure to hinder the progress in this direction.

If all the child health activities for one of the city's community centers could be ideally housed for a year it is possible that the demonstration would stimulate the interest and encourage a future financial support from citizens who believe in the value of health education for the purpose of keeping little children well.

Further Recommendations

1. The reinforcement of the present child welfare staff with the services of a worker or workers trained in dietetics, physical education, hygiene, and the pedagogy of health education. Such a worker would construct health material for display on clinic afternoons and would go to the homes for teaching and follow-up in posture and muscle training and nutritional problems.

2. That one clinic each month, in each ward of the city, be designated as a pre-school clinic and children of the age group 3 to 6 years be encouraged to attend on that date.

This plan would offer, with more convenience to parents, the privilege which is now extended on the second Thursday of each month at Woodward Institute. The suggestion is made with the thought that more children would be given the advantage of an examination.

3. That a booklet entitled "The Mothers' Book" be compiled for distribution to the clinic parents. Members of the Department of Health could collaborate to produce this booklet which should cover important facts concerning the hygiene of infant and child-life written in simple type to answer the inquiries made frequently at clinics.

4. That the Thomas Crane Public Library be asked to arrange in each of its Branch Libraries, a shelf of books especially planned for the clinic mothers. To assure publicity for this it would be helpful to have prepared for distribution in the clinic a brief description of the current literature concerning the health of little children.

The Child Welfare work owes its progress of the past two years to the encouragement and material help which you, as Commissioner of Health, have given to the clinics.

Mrs. Fowler and Miss Marr—Child Welfare Nurses, have been able helpers to the doctors at the clinics and have strengthened the link between the mother in the household and the clinic teaching.

An expression of thanks and appreciation is extended to the New England Dairy and Food Council whose staff members, Miss Marjorie L. Foster, Educational Director, and her assistant, Miss Mona McWilliams, have volunteered their help in conducting, at the Quincy Center clinic, an Educational program of food values in health.

The Wollaston Women's Club is to be thanked for the very useful additions which it has made to the clinic equipment at Wollaston and for the help which its personal representatives has given on clinic days. The good will of the Club is much appreciated.

For their co-operation, appreciation is expressed to the personnel of the Health Office, other members of the Staff, the Fore River Club, the Presbyterian Church of South Quincy, the West Quincy and Atlantic Councils of the Knights of Columbus, and the Trustees of Woodward Institute.

Respectfully submitted,

RACHEL L. HARDWICK, M.D.

Child Welfare Physician.

REPORT OF CHILD WELFARE NURSES

DECEMBER 31, 1928.

DR. EDMUND B. FITZGERALD, *Health Commissioner*.

DEAR DOCTOR:—We herewith submit our annual report for the Child Welfare activities for the year ending December 31, 1928.

There were 330 baby clinics held during the year. These clinics had an attendance of 7,293, with an average attendance at each clinic of 21. There were 4,039 complete or partial examination. There were 693 new enrollments, making a total of 2,130 babies registered during 1928. One hundred ninety-seven of these moved from the city.

There were 12 pre-school clinics held by Dr. Hardwick at which there were 107 visits and 107 examinations. With 19 new enrollments this year there is now a total of 130.

On the same days, as the pre-school clinic there is also a Preventive Orthopedic clinic held by Dr. Miriam Katzeff. She made a total of 164 examinations on 91 new cases and 73 cases followed up from 1927. At this latter clinic Miss Marjorie Foster, Educational Director of the New England Food and Dairy Council and her assistant volunteered in giving very helpful instruction and information to the mothers.

The attendance at the various clinics is as follows:

	At- tendance	Percentage Increase or Decrease
Ward 1. Woodward Institute	1173	30% decrease
Ward 2. Hough's Neck	458	Started May 11
Ward 2. Fore River Club	876	21% increase
Ward 3. Presbyterian Church	1087	17% decrease
Ward 4. K. of C. Hall, W. Quincy	831	22% increase
Ward 5. Library Building, Wollaston	1494	1.6% increase
Ward 6. K. of C. Hall, Atlantic	1152	2.8% decrease
	<hr/> 7293	<hr/> 3.4% increase

There has been a physician in attendance at Hough's Neck since the clinic was started; in Ward 3 since May 23rd; in Ward 4 since March 19th and once a month in Ward 6. The marked decrease in the clinic at Woodward may be due to the opening of the Hough's Neck clinic. It is hard to explain the 17% decrease at the South Quincy clinic.

There were 2,454 visits made to children up to the age of 6 as compared to 1,552 visits in 1927. 93 visits were made to 8 boarding homes.

The total attendance at clinics since 1920 is as follows:

1920	539
1921	2,504
1922	2,757
1923	3,686
1924	5,023
1925	7,550
1926	7,800
1927	7,047
1928	7,293

Children referred to local physicians.....	67
Children referred to Habit Clinic.....	4
Children referred to Boston Dispensary for treatment.....	3
Children referred to Quincy City Hospital for X-ray.....	2
Children referred to Quincy City Hospital for T & A (fees paid by Kiwanis Club).....	2
Children referred to Childrens Hospital.....	6
Children referred to Quincy Dispensary for tuberculin test....	4

From January 1st to March 1st Miss Mary Keeley assisted at the clinics and had charge of the Quincy Point clinic. At that time Miss Mary Marr was appointed Child Welfare Nurse and took charge of the West Quincy, South Quincy and Hough's Neck clinics. During September, October, November and December Miss Marr made a daily visit to St. Joseph's parochial school. During March and April Miss Marr assisted in the work of the health examination by the State in the public schools ("10-year program"). From January to April 18th Mrs. Fowler assisted in the examination above mentioned.

There have been seven deaths among the 2,130 registered babies due to the following causes:

Erysipelas	1
Pneumonia	4
Tuberculosis	1
Acute gastro-enteritis.....	1

Of these deaths perhaps those from tuberculosis and gastro enteritis might be considered as preventable.

Respectfully submitted,

NETTIE DENTON FOWLER, R.N.,

MARY E. MARR, R.N.,

Child Welfare Nurses.

REPORT OF ORTHOPEDIC PHYSICIAN

JANUARY 1, 1929.

EDMUND B. FITZGERALD, M.D., *Commissioner of Health, City of Quincy, Massachusetts.*

DEAR DOCTOR FITZGERALD:—It is my pleasure to present the following report of the orthopedic clinics maintained by the City of Quincy as part of its Child Welfare program for the year 1928.

There have been twelve clinics, one on the second Thursday of each month.

One hundred and sixty-four children have been examined as contrasted with the 1927 report of eighty children.

New cases examined in 1928.....	91
Follow up on examinations made in 1927.....	73

The results of the examinations may be classified as follows:

Pronated feet and poor posture.....	43
Knock knees	16
Bow legs (early).....	9
Rickets with correctable deformities.....	9
Abnormal gait	2
Club foot	1
Torticollis with slight Erb's palsy.....	1
Tuberculosis hip	1
Apophysitis	1
Highly arched feet with tight tendon Achilles.....	2
Children without orthopedic defects.....	6
	<hr/>
	91

It is interesting to note that these figures show approximately the same prevalence of correctable orthopedic conditions as was found in the infant and pre-school age group of last year.

It is probably fair to assume that this is the average incidence of orthopedic conditions among so-called well children. Proof of this however, is not yet available because Quincy still bears the distinction of pioneer work in this field. When other cities include preventive orthopedic as a part of their constructive health program, more data will be available for comparative study.

A large degree of the satisfaction in the follow up of the children who have been attending the clinic for the past two years, lies in the fact that deformities have been prevented. Although weaknesses detected at the time of examination allowed the condition to be classified as one of the recognized clinical orthopedic entities, the early age at which the child was first seen placed these conditions in the class of correctable disorders.

For the results of the year's work, definite tribute should be paid to the Child Welfare Nurses who have been keen to recognize and arrange for the registration of the children needing this service and to the mothers who have faithfully co-operated with the clinic instructions.

To make the orthopedic clinic still more valuable for another year, I recommend that there be a worker trained in physical education who could be available for the follow up of these children in their homes.

The exercises shown the mothers at the clinic session should be checked up in the home to make certain that the facilities in the

house are being used to the child's best advantage. In posture training this means, suitable time and place for the exercises advised, proper chairs for seating at table and at play, and proper sleeping arrangements.

Respectfully submitted,

M. G. KATZEFF, M.D.

REPORT OF QUINCY HABIT CLINIC

DR. EDMUND B. FITZGERALD, *Health Commissioner.*

DEAR DOCTOR FITZGERALD:—The following is a report of the Quincy Habit Clinic from January 1, 1928 to December 31, 1928 respectfully submitted.

Number of weekly clinics held	43
Number of new cases referred	49

Interest in Mental Hygiene has shown a steady growth in Quincy during the past year. Parents and others interested in the welfare of children, have responded in a most encouraging manner to the Educational activities along the lines of Mental Hygiene and to the Clinic's Program. They appreciate the relationship between the mental and physical aspects of the child's life and the incompleteness of a child welfare program which does not consider both.

The close co-operation of the Health Department and the School Department with the Clinic has made it possible to reach those needing education in this particular field.

The Clinic personnel wish to express appreciation to those who have co-operated to make the Clinic a success and an essential part of the Health activities of Quincy.

Respectfully yours,

OLIVE A. COOPER, M. D.,

Assistant to Director, Division of Mental Hygiene.

REPORT OF DISPENSARY PHYSICIAN

DECEMBER 31, 1928.

DR. EDMUND B. FITZGERALD, *Health Commissioner*.

DEAR DOCTOR:—Before submitting my report for the current year I take this opportunity for expressing my appreciation to yourself, the city council, and the Mayor, for the splendid co-operation and generous financial assistance extended the clinic during the past year. Without this help the marked improvement could not have been attained.

The past year we have increased our work and attendance over one hundred per cent. Most of our time, as is the present day custom in the campaign against tuberculosis, has been devoted to the juvenile or glandular type of the disease. During the year fifteen hundred and twenty-nine attended the clinic whereas six hundred and fifty were enrolled for 1927. As you see this is a very creditable increase for our first year of intensive work and promises much for the future.

The routine adopted in all cases is to give a complete physical examination, tuberculin test to all that have not had it recently, X-ray of chest of all suspicious cases for classification, and rectify all defects such as diseased tonsils and bad teeth. This past year we had seventy-six tonsil operations and one hundred and seventy-four tuberculin tests and referred over one hundred children for bad teeth.

We next refer as many children as our funds permit to summer camp for an intensive eight weeks' treatment, and, upon their return, these children are supposed to report to clinic every two weeks for "follow up" treatment and advice. This practise is the most feasible method of treatment and we are getting results. Of course for definitely established diagnosis of Hilum disease continuous sanatorium treatment is preferable. The public is not yet wholly receptive to this preference for Hilum tuberculosis but I believe it will accept it eventually and the immediate transfer of these cases to sanatoria will become the usual procedure.

Then we can devote our camps exclusively to suspicious cases, contact and undernourished children, for it is in these groups you get the best and most permanent health results and you accomplish them quickly and economically. In a word this procedure offers you a means of anticipation and prevention of the disease and, as in all diseases, time and method spent in their prevention are more ideal and profitable than in their cure.

During this past year the nurses have made more than fifteen hundred visits into the homes and have obtained much information and valuable experience in welfare work. An outstanding conclusion was the importance of giving out milk liberally to needy families. Milk is the cheapest and economically the best builder of bodily resistance we have in our fight against tuberculosis. Many children showed almost immediate gain in weight when we added an extra quart of milk daily to the diet. We gave out over three thousand quarts in the past year, all of which expense was supplied by a private organization. I consider it economically sound for the city to appropriate a definite fund for this purpose and much good will obtain.

While on the subject of welfare work I also think the time has arrived when the city might well consider the advisability of employing a trained social worker. The rapidly increasing population and a growing city hospital bring up many problems which a

trained worker would handle better and more economically than under the present regime.

Owing to increase in attendance, Miss Keeley has transferred to our department and has proven a very efficient tuberculosis nurse. The children like her and she has put her heart and soul into the work. In fact Miss Russell and Miss Keeley work so well together that the clinic has reached a very high standard. With the two nurses the routine of the clinic is speeded up, and much of the necessary confusion and delay under one nurse regime has been eliminated.

After spending a number of years in this work some conclusions may be drawn. The problem of juvenile tuberculosis in the light of our present knowledge cannot be solved by the summer vacation camp alone. These children in their eight weeks intensive treatment get a wonderful start on the road back to health but it is not sustained. For, on resuming school work in the fall practically all their rest periods, forced feeding, etc., are lost and many of the health habits disappear together with some of the excess weight gained in camp. The camp idea is undoubtedly good and well worth the time and expense, but it should be supplemented by the open air schools when the children come back in the fall. In this way health and education would go along together with mutual benefit. It is my belief that only in this manner will juvenile tuberculosis be stamped out and, as juvenile tuberculosis is the source of all pulmonary tuberculosis, this seems to be the best plan to eliminate that far greater economic problem, adult tuberculosis. I can visualize cities adopting some such procedure, I trust Quincy will be one of the first.

The story of adult tuberculosis in this city, like all other places, is still unsatisfactory. The fundamental reason for this is the lack of legislative power to forcibly segregate all active pulmonary tuberculosis. Home treatment of this condition implies contact and this usually means an increase in your total cases. Early diagnosis and immediate sanatorium treatment is the right way to treat pulmonary tuberculosis. But in practise this theory fails or at least is long delayed in application. Usually we are unable to prevail in our advice to go to sanatoria until cases are far advanced and this in turn usually results in contact cases and thus your general total is always increasing. The urge to stay home, the desire to continue working, the anxiety about those left at home, all these factors prevail against you when you suggest sanatoria for incipient tuberculosis. Under these conditions satisfactory progress in handling active adult tubercular patients will be slow, until and unless, some brave state legislature will adopt by law forcible segregation. Would that Massachusetts would be the first state to so act.

Our total registration of tuberculosis is four hundred and thirty-nine, one hundred and twenty-six more than last year. But our total of one hundred and seventeen active cases is fifty-four less than last year. Also we have nineteen more of our cases hospitalized this year than in 1927. This is progressive but not ideal. Another good feature of our total number registered four hundred and thirty-nine, one hundred and thirty or nearly 30% were Hilum tuberculosis, and this condition is not a menace to the community.

To save duplication the nurses are sending you complete tabulation of both our juvenile and adult clinics.

Very truly yours,

C. J. LYNCH,
Dispensary Physician.

REPORT OF DISPENSARY NURSES

DECEMBER 31, 1928.

DR. EDMUND B. FITZGERALD, *Health Commissioner*.

Our work during the past year has been a source of great satisfaction to us. Naturally at times we were faced with trying situations, due to a variety of conditions arising from social problems, poverty and disease, etc., but their satisfactory solution usually justified our efforts. We were materially aided in these problems by calling on outside agencies such as the probate court, welfare department, private physicians, and others, all of whom furnished cordial support. Frequent contact with these conditions has taught us much and we trust our zeal and efforts have accomplished worth while results.

We fully appreciate the scope, possibilities and importance of tubercular dispensary work and how futile it is to attempt to give full expression to all the good accomplished in a mere concise summary of visits made, patients transferred, etc. and all else that figures in a tuberculosis clinic. All that is mere detail and tabulation and essential, of course, but it does not begin to explain the work done, the effort expended, the good accomplished, both as regards personal and family welfare, together with prevention of spread of diseases and much else besides. The benefits derived are what make the work worth while, and if success and efficiency depends upon efforts we intend and expect to qualify.

As you know in our work we must render an account of our stewardship to State Department of Public Health as well as to our city. In addition to our weekly reports we must account in great detail of all cases, contacts, both private and clinic transfers, and very much clerical detail is necessary. Due to school survey work of 1927 our 1928 regular work in clinic visits etc. did not start until May 1st. But despite this delay we have made over fifteen hundred visits this year and have fulfilled our schedule for both city and state.

And you will be pleased to know that during this current year, two different state officials visited our clinic and admitted that our clinic has one of the highest ratings in the state.

In closing we would like very much to acknowledge our appreciation for attending your conferences during the latter part of this year. We found them enjoyable and very helpful and trust during the coming year you will continue these for the full fifty-two weeks.

Trusting you will find our report in order, we remain

Very truly yours,

MARY E. KEELEY, R.N.,

GERTRUDE T. RUSSELL, R.N.,

Dispensary Nurses.

REPORT OF CONTAGIOUS DISEASE NURSE

DECEMBER 31, 1928.

DR EDMUND B. FITZGERALD, *Health Commissioner.*

DEAR DOCTOR:—I herewith submit my fourth annual report of contagious disease work for the year ending 1928.

2,534 cases were reported as follows:

Measles	1,855
Scarlet fever	241
Diphtheria	19
Chicken pox	196
Whooping-cough	91
Mumps	6
Lobar pneumonia	49
Influenza	37
Dog bite	22
German measles	8
Septic sore throat	4
Cerebro-spinal meningitis	2
Malaria	1
Trachoma	1
Anterior poliomyelitis	1
Smallpox	1

<i>Nursing Visits</i>	<i>By contagious nurse</i>	<i>By other nurse</i>	<i>Total</i>
Measles	1,615	2,125	3,740
Scarlet fever	1,138	39	1,177
Whooping-cough	124	26	150
Diphtheria (cultures 58)	72	3	75
Chicken pox	33		
Typhoid (laboratory tests)	3		
Cerebro-spinal meningitis	1		
Anterior poliomyelitis	2		
Smallpox	1		
	<hr/> 2,989	<hr/> 2,193	<hr/> 5,142

Measles

There was an epidemic of measles affecting all wards of the city during January, February and March, with a total number of cases, 1,855. During these months two other nurses assisted. Eight cases were sent to Brighton Hospital. There were seven deaths in the city and one in the hospital.

Scarlet Fever

There were 241 cases reported, a decrease of 135 cases as compared with last year's record. The majority of the cases were of a mild type which caused many contact cases in the same family. The greatest number of cases were reported from Wards One and Two. Thirty-five cases were cared for at Brighton Hospital. There were three deaths from this disease in the city.

Diphtheria

There were 19 cases reported, thirty-five cases less than 1927. 58 cultures were taken in connection with these cases. 11 cases

sent to Brighton Hospital. Carrying on the program of diphtheria prevention, T. A. T. clinics were held once a week in the various wards of the city. Total number of complete immunizations, 772; of this number 485 were of pre-school age, nearly 200 more than last year, the remaining 287 were of school age. Thirteen re-Schick clinics were held. Re-immunization cases totalled 59, of school age 57, and 2 of pre-school age. There were two deaths from this disease, one in Quincy and one in Brighton Hospital. Neither child had had T. A. T. treatments.

Anterior Poliomyelitis

Only one case reported during the year. One death occurred, the case being transferred from out of town to the Quincy Hospital.

Mumps—Chicken Pox

Very few cases of mumps were reported. A marked increase was shown in the number of chicken pox cases reported. One child died from this disease in the hospital.

Typhoid Fever

For the first time in the history of the city, not a case of typhoid fever was reported.

Lobar Pneumonia—Influenza

There were 49 cases of Lobar Pneumonia reported, with a total number of 30 deaths.

37 cases of Influenza reported. Eight deaths from this disease.

Whooping-Cough

91 cases were reported. Four children, all under two years of age, died from this disease.

In connection with the follow-up work 2,989 visits were made, including the checking up of quarantine rules, taking of cultures, examination of contacts and releases from quarantine.

The contagious disease nurse assisted at the examination of the first grades in the parochial schools. Daily visits have been made at St. John's school in connection with this work as well as the contagious work and home visits made when necessary.

Thirteen baby clinics were attended during the year. One afternoon a week spent at the T.A.T. clinic and Saturday A. M. at the re-Schick clinics.

Office hours were held daily from 9–9:30 A. M. and 1–1:30 P. M. in the Health Department.

Respectfully submitted,

CATHERINE F. COLEMAN, R.N.,

Contagious Disease Nurse

REPORT OF SANITARY INSPECTOR

JANUARY 1, 1929.

DR. EDMUND B. FITZGERALD, *Health Commissioner*.

DEAR SIR:—Herewith is submitted my report for the year ending December 31, 1928.

Diphtheria Prevention

During the past year a diphtheria prevention clinic was held each week. These clinics were held in conjunction with the well baby clinics. As a rule these clinics have been well attended. We have continued the policy of sending personal letters to the children instead of to the parents.

The diphtheria morbidity rate for 1928 was 2.8 per 10,000 population, the lowest rate in the history of Quincy.

Previous to 1928, 65 per cent of all diphtheria cases occurred among children of school age. The records for 1928 show that only 36 per cent of the cases occurred in this group. It is significant that the greatest amount of diphtheria immunization has been carried on among this group of children.

It is also significant that not a single case of diphtheria was reported from Ward 6, the section of the city where more children were immunized than in any other section.

NO QUINCY CHILD WHO HAS BEEN SHOWN BY A NEGATIVE SCHICK TEST TO HAVE BEEN SUCCESSFULLY IMMUNIZED HAS CONTRACTED DIPHTHERIA.

Culture Stations

An electric refrigerator where biological supplies are kept, was installed at the Police Department during the year. Sera and culture outfits are now available to physicians at all hours of the day and night. Upon the installation of the electric refrigerator, seven of the eight culture stations were discontinued.

Mortality and Morbidity Reports

Mortality and morbidity reports are shown in another part of the department reports.

Publicity

The newspapers have been very generous in devoting space to the activities of the department. A report of communicable diseases and deaths was published weekly throughout the year. Special articles on various phases of public health activities were prepared and published from time to time.

Health Education

The Health Department booth at the Chamber of Commerce "Trading Post" acquainted a large number of people with the departmental activities. Talks were given during 1928 before more organizations than ever before.

The "Monthly Bulletin" now has a mailing list of over 350.

Venereal Disease

During the year 15 cases of venereal diseases were reported as follows:

Gonorrhea	13
Syphilis	2
	<hr/>
	15

Notices of discontinued treatments before being declared non-infectious were received in 8 cases and in 7 of these cases we were successful in returning the patients to treatment.

Camp Inspections

Inspection of the Boy Scout and Y. M. C. A. Camps were made during the past summer.

REPORT OF MILK INSPECTOR

JANUARY 1, 1929.

DR. EDMUND B. FITZGERALD, *Health Commissioner*.

DEAR SIR:—I herewith submit the following report for the year ending December 31, 1928.

The following statistics refer to milk, cream, ice cream, butter-milk and oleomargarine consumed and produced in the City of Quincy.

Dairies in City of Quincy

1 cow	10
2 to 5 cows	8
5 to 10 cows	3
11 to 25 cows	6
25 to 75 cows	3
Total number of cows in Quincy	249
Total number of cows in nearby dairies which serve the City of Quincy with milk	106
Milk produced in Quincy and nearby dairies (quarts—raw)	2,014
Milk contractors processing and storage plants in Quincy ..	9
Out of town plants supplying Quincy	11
Teams, auto cars and trucks employed in the distribution of milk, cream, buttermilk and ice cream	135
Milk consumed in Quincy per day (quarts)	31,414
Pasteurized milk consumed in Quincy per day (quarts) ...	29,400
Raw milk consumed in Quincy per day (quarts)	2,014
Certified milk	140
Grade A	3,766
Per cent pasteurized	94
Per cent raw	6
Cream consumed in Quincy (quarts)	2,900
Ice cream consumed in Quincy (gals.)	3,000
Ice cream produced in Quincy (gals.)	735
Buttermilk consumed in Quincy (quarts)	493
Milk processing plants in Quincy	4
Milk processed in Quincy (quarts)	15,000

Table Classification of Dairies Inspected and Scored

Scoring 41 to 50	3
Scoring 51 to 60	29
Scoring 61 to 70	8
Scoring 71 and over	1
Retail licenses issued, milk, ice cream and oleomargarine ..	857
Revenue from same	\$476
Milk samples collected and tested for chemical analysis and bacteria	1,344
Taken from teams	702
Taken from stores	348
Taken from dairies	287
Taken from bakeries	7
Ice cream samples collected for bacteria and chemical analysis	56
Ice cream manufacturing plants in Quincy	12
Ice cream manufacturing plants outside Quincy which serve Quincy	12

Number of sanitary inspections	10
Number of stores visited and inspected.....	655
Number of dairies visited and inspected.....	432
Number of milk rooms visited and inspected.....	142
Number of milk processing plants visited.....	154
Number of ice cream manufacturing plants visited.....	29
Number of restaurants visited	41
Number of bakeries visited	11
Number of complaints investigated	5

The price of milk and cream in the City of Quincy has remained the same as in 1927.

All ice cream manufacturing plants and milk pasteurization plants are obliged to have a special license which requires more special sanitary inspection.

Many local producers are establishing pasteurization systems and the percentage of raw milk is becoming less each year.

More attention has been given to the schools this year than ever before and it is noticeable in the large demand for milk and ice cream.

From a health standpoint this has been the most successful year since I have been in the department as there was not one case of streptococci or pus in milk in 1928; something most remarkable.

Respectfully submitted,
JAMES O'DOWD,
Acting Milk Inspector.

REPORT OF BACTERIOLOGIST

JANUARY 1, 1929.

DR. EDMUND B. FITZGERALD, *Health Commissioner.*

DEAR SIR:—I am submitting herewith a list of the laboratory examinations made by me during the past year.

Bacteriological examinations (milk)	617
Bacteriological examinations (ice cream)	56
Chemical examinations (ice cream)	56
Chemical examinations (milk)	736
Total number examinations.....	1,465

Yours truly,
EDWIN E. SMITH, M.D.

REPORT OF INSPECTOR OF MEATS AND PROVISIONS

DECEMBER 31, 1928.

To the Commissioner of Health, Quincy, Mass.

DEAR SIR:—I submit the report of the work in this office for the year ending December 31, 1928.

Inspections made 1,423

Meats and Foodstuffs Condemned as Unfit for Food

Salt pork (pounds)	15
Beef (pounds)	52
Pork (pounds)	37

Food Establishments in Quincy

Markets	133
Stores	185
Restaurants and lunch rooms	64
Fish markets	5
Creameries	7
Delicatessens	6
Fruit stores	51

More inspections have been made this year than ever before. Much time and attention was given to seeing that all foodstuffs and markets are clean in accordance with the rules and regulations of the Department of Health.

In looking back over my records for ten years, I find that I have done this year in inspections alone, nearly four times more. I have had more money for transportation, which has enabled me to make inspections more often with better conditions in stores and markets and less meat condemned.

Consolidations in chain stores has reduced the total number some this year. As a rule when a new store or block is built and location is desirable you will find it readily taken by one of these stores or markets. We have at the present time ninety chain stores. There are always a few stores or markets that close every year unable to compete with the large companies that are being established in our city.

When complaints from the public are received at this office, they are investigated at once, to see if the foods purchased are of good or inferior quality and to ascertain who is responsible if the food is of an inferior quality.

In some markets where improvements were made on account of conditions, a cold storage system was installed. The dealer finds it not only a saving of money but is much easier to keep clean and more sanitary.

Respectfully submitted,

HOWARD ROGERS,

Inspector of Meats and Provisions.

REPORT OF THE PHYSICIAN FOR VENEREAL DISEASES

JANUARY 1, 1929.

DR. EDMUND B. FITZGERALD, *Health Commissioner.*

DEAR SIR:—I have tabulated the work done by me during the past year as follows:

Total number visits to clinic.....	217
Total number patients.....	19
Receiving treatment for syphilis.....	15
Injections mercury.....	95
Injections sulpharsphenamine.....	65
Receiving treatment for gonorrhoea.....	1
Irrigations (urethra and bladder).....	34
For observations only.....	3
Wasserman tests.....	17
Smears for gonococci.....	10

Yours truly,

EDWIN E. SMITH, M.D.

Respectfully submitted,

J. J. KENILEY,
Inspector of Plumbing.

MORTALITY STATISTICS**Number of Deaths and Death Rates**

During the year 1928 there were 573 deaths which occurred in Quincy. This number was an increase of 14 over 1927 when there were 559 deaths. There was, however, a slight decrease in the death rate. Based on the estimated population of 67,600 on July 1, 1928 (mid-year), the death rate for 1928 was 8.5 per 1,000 population as compared with 8.6 in 1927. Of the persons who died in Quincy, 38 were non-residents but there were 125 residents of Quincy who died outside the city. There were, therefore, 660 Quincy residents who died during the year. The "resident death rate" was 9.8 per 1,000 population as compared with a rate of 9.5 in 1927.

SEX. Of the 573 deaths in 1928, 298 or 52 per cent were males as compared with 52.1 per cent in 1927. The proportion of males in the population as shown by the United States Census of 1920 was 50.6 per cent. The estimates for 1928 were 35,220 males and 32,380 females. Based on these estimates the death rate per 1,000 per males was 8.5 as compared with 8.8 in 1927. The rate for females was 8.5 as compared with 8.4 in 1927.

AGE. Of the 573 deaths in 1928, 66 or 11.5 per cent were of infants under one year of age as compared with 11.6 per cent in 1927. Among the deaths registered during 1928 there were 8 over 90 years of age, all of whom were females. The oldest age at death was 95 years, 7 months, 12 days. The average age at death fell in the 55 to 59 year group.

NATIVITY. 372 or 64.8 per cent of the decedents whose nativity was reported on the death certificate were native.

SEASONAL DISTRIBUTION OF DEATHS. The largest number of deaths in any one month occurred in December, when there were 57, and the next largest in February and November, in each of which months, there were 55 deaths. The lowest number occurred in September when 32 deaths were registered.

INFANT MORTALITY. The infant deaths in 1928 were per 1,000 live births. The infant mortality rates since 1919 are shown below:

1910	103	1920	66
1911	102	1921	55
1912	82	1922	73
1913	108	1923	70
1914	75	1924	53
1915	76	1925	58
1916	72	1926	66
1917	71	1927	57
1918	90	1928	
1919	64		

The highest proportion of deaths under one year of age occurs during the early period of infancy and especially is this true of the first week. In 1927 there occurred 33 deaths in the first week, constituting 50 per cent of all deaths under one year of age compared with 44.6 per cent in 1927. On the first day the percentage of deaths (27.3) was higher than any other day as compared with 23.1 in 1927. In the first month there were 38 deaths or 57.6 per cent of all infant deaths as compared with 67.7 per cent in 1927.

CAUSES OF DEATHS:

PNEUMONIA caused 50 deaths in 1928 or 74 per 100,000 population. It was responsible for 42 deaths or 64 per 100,000 population in 1926.

HEART DISEASE. The deaths from heart diseases in 1928 numbered 131 or 22.9 per cent of all deaths or 194 per 100,000 population as compared with 147 deaths or 26.5 per cent of all deaths or 222 per 100,000 population in 1927.

TUBERCULOSIS in its various forms claimed 24 victims in 1928, of whom 20 died from tuberculosis of the respiratory system. Deaths from tuberculosis constituted 4.2 per cent of all deaths in 1928. The rate per 100,000 population was 35.2 as compared with a rate of 56.5 in 1927. In addition 30 Quincy residents died of tuberculosis in sanatoria, making the total number of deaths from this disease, 54. Subtracting from this number, 1 non-resident who died in Quincy, the "corrected rate" per 100,000 was 78.4 as compared with 70.5 in 1927.

CEREBRAL HEMORRHAGE and apoplexy caused 43 deaths or 7.5 per cent of all deaths or a death rate of 64 per 100,000 population. In 1927 there were 38 deaths from this cause, corresponding to 6.8 per cent of deaths from all causes or a death rate of 58 per 100,000 population.

CANCER caused 63 deaths in 1928 or 11.0 per cent of all deaths corresponding to a death rate of 93 per 100,000 population as compared with 65 deaths, 11.6 per cent of all deaths and a death rate of 100 per 100,000 population in 1927.

BRIGHT'S DISEASE and nephritis were the cause of 57 deaths in 1928 corresponding to a death rate of 84 per 100,000 population as compared with 33 deaths and a death rate of 50 per 100,000 population in 1927.

DISEASES OF EARLY INFANCY and malformations caused 35 deaths in 1928, a rate of 52 per 100,000 population compared with 36 deaths and a rate of 55 in 1927.

EXTERNAL CAUSES. The number of deaths from external causes was 45 with a rate of 67 per 100,000 population as compared with 41 deaths and a rate of 63 in 1927. Automobile accidents, in 1928, caused 9 of these deaths as compared with 8 deaths in 1927. Two of the deaths in 1928, however, were caused by accidents which occurred outside the city.

AGNES M. FRASER, R.N.	X-ray Technician
CHRISTINE CUMMINGS, R.N.	Physiotherapy Technician
AMITY PERKINS	Dietitian

REPORT OF THE BOARD OF MANAGERS

To His Honor the Mayor and the President and Members of the City Council:

GENTLEMEN:—The Board of Managers of the Hospital Department respectfully submits its report for the year ending December 31, 1928.

We desire to call your attention to the large number of patients admitted to the hospital during the year 1928, as shown in the Superintendent's report.

There has never been a time when the needs of the hospital were so great as now, and we must have additional buildings and equipment to properly take care of our citizens.

We sincerely hope that the request for additional borrowing capacity, now before the Massachusetts Legislature, will be granted, and that the money for a new ward building will be available in the near future.

Our new department, Physiotherapy, the equipment for which was a gift to the hospital, has been of great benefit to many patients, and we believe that its use will increase rapidly.

We gratefully acknowledge your hearty cooperation, the generous contributions and the active and helpful interest of the hospital aid associations, the churches and other organizations of the city, and the many words of appreciation and suggestions from our patients and friends.

The financial statement of the operations of the past year, together with the report of the Superintendent, are annexed hereto.

CHARLES A. PRICE, *Chairman*,
MAURICE P. SPILLANE, *Secretary*,
GEORGE TAYLOR,
ERNEST B. NEAL,
JOSEPH A. DASHA.

REPORT OF SUPERINTENDENT

To the Board of Managers, Quincy City Hospital:

GENTLEMEN:—I herewith submit to you a report of the work done at the Quincy City Hospital during the year ending December 31, 1928.

Statistical Information

	1927	1928

The growth of the City can easily be seen in the increase of work in the hospital. The new building that was opened in June and also the Nurses' Home that was opened in May 1927, are taxed to their utmost. Not only are the number of beds inadequate, but the Surgical, Obstetrical and X-ray departments are proving far too small for the work that must be done in them. I sincerely hope that the city fathers will see their way clear to give us the relief that is necessary to carry on the demands of a city this size.

We were fortunate in being the recipient of new equipment with which we opened a Physio-therapy department. The equipment consists of:

Ultra Violet—Air cooled
 Ultra Violet—Water cooled
 Infra-Red Lamp
 High Frequency—Diathermy
 Selective Wave Generator
 Deep therapy—Lamp
 Electric Vibrator

The approximate cost of the above is \$4,000. The department is doing good work, as will be seen by its separate report.

In behalf of the doctors and patients I wish to thank the donor most heartily.

To the members of the Quincy and Wollaston Hospital Aids we are deeply indebted and thank them for their kindness to the nurses and patients and for the sewing they have done. To the different churches and social societies we extend our thanks for their thoughtfulness and acts of kindness during the year.

In closing please let me express my sincere thanks to the Mayor, the Board of Managers, members of the doctors staff and the nursing staff for their loyal support.

Respectfully submitted,

RUTH J. ADIE, R.N.,
Superintendent.

INFORMATION RELATIVE TO ADMISSION OF PATIENTS, RATES, ETC.

Application for the admission of patients to the hospital should be made to the superintendent. Patients desiring admission should be referred by a physician.

Accidents are admitted at any time.

The hospital maintains an ambulance for transportation of patients within the city limits. The ambulance may be obtained for special service by application to the superintendent.

Single rooms, \$4.50, \$5.00, \$6.00 and \$8.00 per day.

Semi-private rooms, \$5.00 per day.

Ward bed (private), \$3.00 and \$4.00 per day.

Ward bed (service), \$3.00 and \$4.00 per day.

Additional charges:

Operating room, \$5.00 to \$10.00.

Delivery room, \$5.00.

Etherizing fee, \$5.00.

Laboratory fee, \$5.00.

Plaster casts or special dressings, \$3.00 to \$5.00.

Ambulance, \$3.00.

Board of special nurse, \$1.00 per day.

Proprietary drugs or unusual or expensive preparations, mineral waters, liquors, etc., will also be charged extra.

Radiographs will be taken every day by appointment, with the exception of Sunday.

Appointment for radiograph of the gastro-intestinal tract should be made either Monday, Tuesday, Thursday or Friday.

REPORT OF SCHOOL OF NURSING, 1928

During the year 1928 there have been few outstanding changes in the School. On January first there were forty-two accepted students enrolled and fifteen preliminary students. This number was increased by the incoming classes of February and September when thirteen and twenty-two students, respectively, entered. Nine students completed their courses, four resigned on account of ill health, while eleven were dropped for other reasons; so that at the end of the year the census was sixty-seven.

29 Seniors

6 Juniors

14 Intermediates

18 Preliminary students

Miss Edna Elliot, night supervisor, resigned on account of ill health and was replaced by Miss Emily McQueenie, who in turn was succeeded by Miss Agnes Johnson of the 1922 Class. Miss Constance Larkin of the Class of 1928 is now Assistant Night Supervisor, Miss Lillian D. Pratt of the Class of 1928 is in charge of the Pediatric Floor. The other members of the Class are now engaged in private duty nursing.

The Graduation Exercises were held as usual in June. Mr. Price, presided, introducing Dr. Fred E. Clow, the speaker; Mrs. Hayward who presented the pins to the Graduates; Dr. Hunting who presented the diplomas, and his Honor, Mayor McGrath who gave a short address.

The curriculum of the School has been modified slightly. An affiliation has been arranged whereby the students will receive their instruction in the nursing of Medical and Communicable Diseases at the Boston City Hospital, instead of at the Yale University School of Nursing. Three months of the time is devoted to the study of Communicable Diseases and two to Medical. Dr. Robert Cook now gives the course in Pediatric Diseases. A course in psychology has been introduced, the lectures being given by Dr. George Dalton. One senior nurse was enabled to take the course in Public Health Nursing at Simmons College through the support of the Quincy Women's Club.

Another important change which occurred during the year was the acquisition of the Rice Home for the housing of students again. In September with twenty-two new probationers admitted the New Home was not large enough to accommodate them all, so the Rice Home was refurnished for them.

In December the Class of 1930, aided by the other members of the School, gave a Bazaar and Bridge, at which \$375 was raised. The proceeds will be used for the Class gift to the School and for class expenses. They are very grateful to all the friends

who so generously supported them both by donations and purchases.

In the Spring the members of the Quincy and Wollaston Hospital Aid Associations began the delightful practice of serving Tea one afternoon a month in the Recreation Room. These Teas have been enjoyed by both the students and graduate nurses.

As in past years the School has received numerous gifts from members of the Staff and friends which have served to remind them of the continued interest and friendship felt.

May I take this opportunity to thank the members of the Staff who have co-operated so willingly in teaching the nurses and in attending to those who have been ill.

Respectfully submitted,

EILEEN M. YOUNG, R.N.,
Superintendent of Nurses.

REPORT OF MEDICAL STAFF OF HOSPITAL FOR THE YEAR 1928

With the rapid growth of the city, the amount of work performed at the Quincy Hospital by the Staff has correspondingly increased so that the facilities at times have been taxed to the utmost. Moreover, the amount of time given by each member of the Staff to the free treatment of hospital cases has increased so rapidly that it now calls for considerable personal sacrifice on the part of the members, in order that the work may be done efficiently.

To relieve this burden there is under consideration a plan for the reorganization of the Staff, in order that the work may be distributed among a larger number. Only such plans will be considered as will insure the maintenance of the efficient treatment given to the patients in the past.

Conforming to the requirements of the American College of Surgeons, the Staff has met once a month, and at these meetings matters pertaining to the hospital have been discussed and recommendations made to the Board of Managers. These recommendations always receive sympathetic consideration from the Board, and where possible have been acted upon favorably. At the Staff meetings medical and surgical cases are also discussed with a view of bringing out information that will be of help in the future treatment of other patients.

During the year 1928 the Physiotherapy department was organized, under the direction of Dr. Edmund Burke. A large number of patients have been treated in this department, and the efficiency of the hospital has thereby been increased.

Through the courtesy of the Board of Managers and the Superintendent, the joint meeting of the Norfolk South District Medical Society and the Staff was held at the hospital in February. Many interesting cases were discussed, and Dr. Roger Graves of Boston presented a paper on Hematuria. These meetings, which become a yearly custom, are of vast importance to the hospital, in that they enable the members of the Staff to keep up to date with recent advances in medical science.

The Staff has called the attention of the management to the over-crowded conditions existing in the hospital, particularly with reference to the Operating Room, Ward A, and Ward C.

The conditions in these places are becoming so bad that before long the proper treatment of patients will be seriously interfered with. The Mayor and the Board of Managers have been quick to realize the seriousness of the matter, and have taken active steps to provide more accommodations. A number of joint meetings have been held with the Board of Managers, at which the Mayor was present, and definite steps have now been taken to remedy the evil by further construction.

The Staff wishes to express its appreciation for the hearty co-operation it has received at the hands of the Mayor, the Board of Managers, and the Superintendent.

WILLIAM R. HURLEY, M.D.,
President of the Staff.

REPORT OF X-RAY DEPARTMENT, QUINCY CITY HOSPITAL

To the Superintendent and Board of Managers, Quincy City Hospital, Quincy, Massachusetts:

Enclosed please find my report relative to the work done by the X-ray Department during the year 1928.

The personnel of the department changed with the resignation of Miss Ethel Fostello, and the appointment of Miss Ceciline Nash in her place.

Miss Agnes M. Fraser, as chief technician for the laboratory, assisted by Miss Nash, has carried on the work during the year in a very satisfactory manner.

The number of cases admitted to the department for X-ray diagnosis and treatment has increased very materially during the past year, the actual figures being three hundred and ninety-five.

This amount of work makes our present space inadequate. Hence it is gratifying to know that plans are under way for the building of a new laboratory, with space and equipment provided that will take care of the normal growth of the hospital for many years to come. I am hoping that this building will be completed in the very near future in order that we may start work on even a larger scale.

The new plans call for an extra treatment room, and a cystoscopic room, equipped with the latest apparatus for this type of work. With these two additions, the X-ray Department of the hospital will compare favorably with any other in New England.

During the year, twenty-seven hundred and eighty patients were admitted to the laboratory for either X-ray diagnosis or treatment. This total, compared with twenty-three hundred and ninety-five in the year 1927, shows a healthy increase in the work of the laboratory.

I wish to express my sincere appreciation to the Administration and Staff for their hearty co-operation during the past year.

Respectfully submitted,

CHARLES WHELAN, M.D.,
Roentgenologist.

X-ray Statistics

House patients	671	
Out-patients	1,840	
	<hr/>	
Total		2,511

REPORT OF THE PHYSICAL THERAPEUTIC DEPARTMENT OF THE QUINCY CITY HOSPITAL

In the first eight months of this clinic there have been treated various disorders of the infectious, traumatic and metabolic fields. These include post-operative and medical house and out-patient cases.

The statistical report of treatments is as follows:

General ultra violet	986
Radiant heat	1,454
Diathermy	987
Massage	447
Local water cooled ultra violet	247
Wave generator	179
	<hr/>
A total of	4,300

A percentage report of cases:

Traumatic	38%
Metabolic	33%
Infectious	29%

Miss Christine Cummings our technician through this period has resigned and Miss Marjorie Hobbs now treats.

Additional apparatus is urgently needed so that simultaneous treatments may be given and waiting avoided.

I wish to thank the Administration and Staff for their co-operation.

Respectfully submitted,

EDMUND B. BURKE, M.D.

REPORT OF THE QUINCY HOSPITAL AID ASSOCIATION

The Hospital Aid Association has held its monthly meetings with a fair attendance and with the aid of home workers we have finished 1065 pieces.

We are glad to report a successful food sale held in May, netting \$227.

Our Christmas cheer was carried on as in past years, with a useful gift for each ward patient.

A "Tea" is held alternate months with the Wollaston Committee for the nurses.

Magazines are sent the nurses regularly and their pins given them when graduating. One nurse is sent to Simmons College for three months as part of her last years work.

We are grateful to our faithful friends and look forward to another year of increased interest in the hospital work.

Respectfully submitted,

MARTHA N. WOODRUFF,
President.

REPORT OF THE WOLLASTON BRANCH HOSPITAL AID ASSOCIATION

The work of the Wollaston Branch Hospital Aid Association is almost the same year after year. This year the attendance at meetings has been somewhat larger, more workers staying all day. We have done no special work. We have enjoyed being with the nurses at two afternoon teas in the new Nurses' Home.

SUSAN G. REED,
President.

CONCLUSION

There has been only one serious crime during the year. A woman was shot to death by her husband who was arrested and had confessed to the crime within twelve hours after its commission. He is now in jail waiting for trial.

The murderer of Reserve Officer Hollis, who was arrested in Hartford, Conn., early in the year and brought here for trial, pleaded guilty to second degree murder after a disagreement by the jury and was sentenced to life imprisonment.

The regulation of traffic still remains one of the major problems of the Police Departments of the smaller cities. In the larger cities the traffic regulations are made by a board maintained for that purpose. The Police Departments of these cities have nothing to do with traffic except the enforcement of these regulations by a special branch of the Department created for that purpose.

The power to make rules for the regulation of traffic in Quincy is vested in the City Council and while the members of that body have always shown a disposition to make any change that I have recommended, the process is slow and cumbersome and they of course have to consider the feelings of the residents and business men of their particular districts.

The automatic traffic signals have proven their worth during the past year. There has been some criticism by motorists of some of these signals as being unnecessary. It is true that at some of these places the traffic that enters from the side streets is not of sufficient volume to warrant signals there for the regulation of vehicular traffic, but they are needed as a protection for pedestrians. The average motorist is not very considerate of foot traffic and there are places where it would be almost impossible to cross the street in safety if it were not for the signals.

I believe that the city is quite well protected by automatic signals at present and feel that we should be very sure that more are needed before we yield to the demands that are being so constantly made for additional installations.

Eight auto fatalities occurred during the year. Four of these were caused by residents and four by non-residents of Quincy.

Six patrolmen were added to the force the latter part of the year to cover routes that could not be properly patrolled on account of absences caused by nights off.

The police signal system has been greatly strengthened and extended during the year by the addition of four new call boxes and flashlight signals, together with new underground cable.

This extension was made without any additional appropriation for this purpose and was made possible through the co-operation of Chief Mead of the Fire Department, who furnished the cable for the joint use of the two departments and I wish at this time to extend my thanks to him for his courtesy and consideration.

I renew my recommendation of last year that the Teletype System be installed to enable this Department to have a more rapid and reliable means of communication with other Police Departments.

In conclusion I wish to thank His Honor Mayor McGrath and the members of the City Council for their interest in and consideration of the Police Department during the past year.

I thank the District Attorney and his associates, the officials

of the Courts, the members of the various City Departments and all others who have assisted the Police Department during the past year.

To the members of the Police Department who have done their duty with loyalty and efficiency in the many trying, difficult and dangerous situations in which a Police Officer often finds himself, I can only say that I appreciate your efforts and wish that the citizens of Quincy might have a better knowledge of the work that you have been called upon to do.

Respectfully submitted,

ERNEST H. BISHOP,
Chief of Police.

REPORT OF FIRE DEPARTMENT

QUINCY, MASS., JANUARY 1, 1929.

HON. THOMAS J. MCGRATH, *Mayor, City of Quincy, Quincy, Mass.*

DEAR SIR:—I respectfully submit the annual report of the Fire Department for the year ending December 31, 1928.

Personnel of Department

Chief of Department—Alfred L. Mead

Lieutenants

One White pumping engine.
One White ladder truck.

Fire Alarm Department

One Dodge truck.

FIRE ALARMS

During the year there were 774 alarms.

Bell alarms, 182.

Still and telephone, 592.

False alarms, 17.

The Central Station responded to 383 alarms, 131 bell, 236 still or telephone, 19 false.

The Wollaston Station responded to 239 alarms, 73 bell, 149 telephone, 17 still.

The Atlantic Station responded to 221 alarms, 41 bell, 180 still or telephone.

The Quincy Point Station responded to 99 alarms, 45 bell, 45 telephone, 9 still.

The West Quincy Station responded to 147 alarms, 58 bell, 147 telephone or still.

The Houghs Neck Station responded to 77 alarms, 20 bell, 57 telephone or still.

The total number of feet of hose laid was.....	67,350
Central Station laid.....	25,850
Wollaston Station laid.....	9,550
Atlantic Station laid.....	9,900
Quincy Point Station laid.....	11,350
West Quincy Station laid.....	5,650
Houghs Neck Station laid.....	5,050
Number of feet of ladders raised.....	4,826
Number of gallons of chemicals used.....	2,413
Number of hours absent from quarters.....	657
Number of hours engines worked.....	55-55 min.
Number of inspections made.....	25,250
Number of drills.....	352

VALUATIONS, INSURANCE AND LOSSES

December	3,160 00	912 00	4,072 00
	\$86,236 00	\$102,348 00	\$188,584 00

During the past year we have lost through death three members of the department, Captain John J. Faircloth, who died from injuries received answering an alarm, Lieutenant Michael Scully and Assistant Engineer Frank C. Packard. Two men have been pensioned namely, Charles W. Hayden and John Sullivan. Their places have been filled by the appointment of two new men. Two members were suspended and two privates were promoted to lieutenant. An order passed by the City Council, July 2, changing ordinance No. 1 so as to establish the office of two Deputy Chiefs and Captains have not as yet been appointed. When these appointments are made there should be men appointed to fill up the ranks occasioned by promotions.

The alarms have been more frequent the past year than ever before and the department has been very busy. The apparatus is in good condition except the LaFrance Combination. This piece of apparatus is now 19 years old and should not have any more money expended on it. We should have something to replace it with. Equipment and hose is in very good shape.

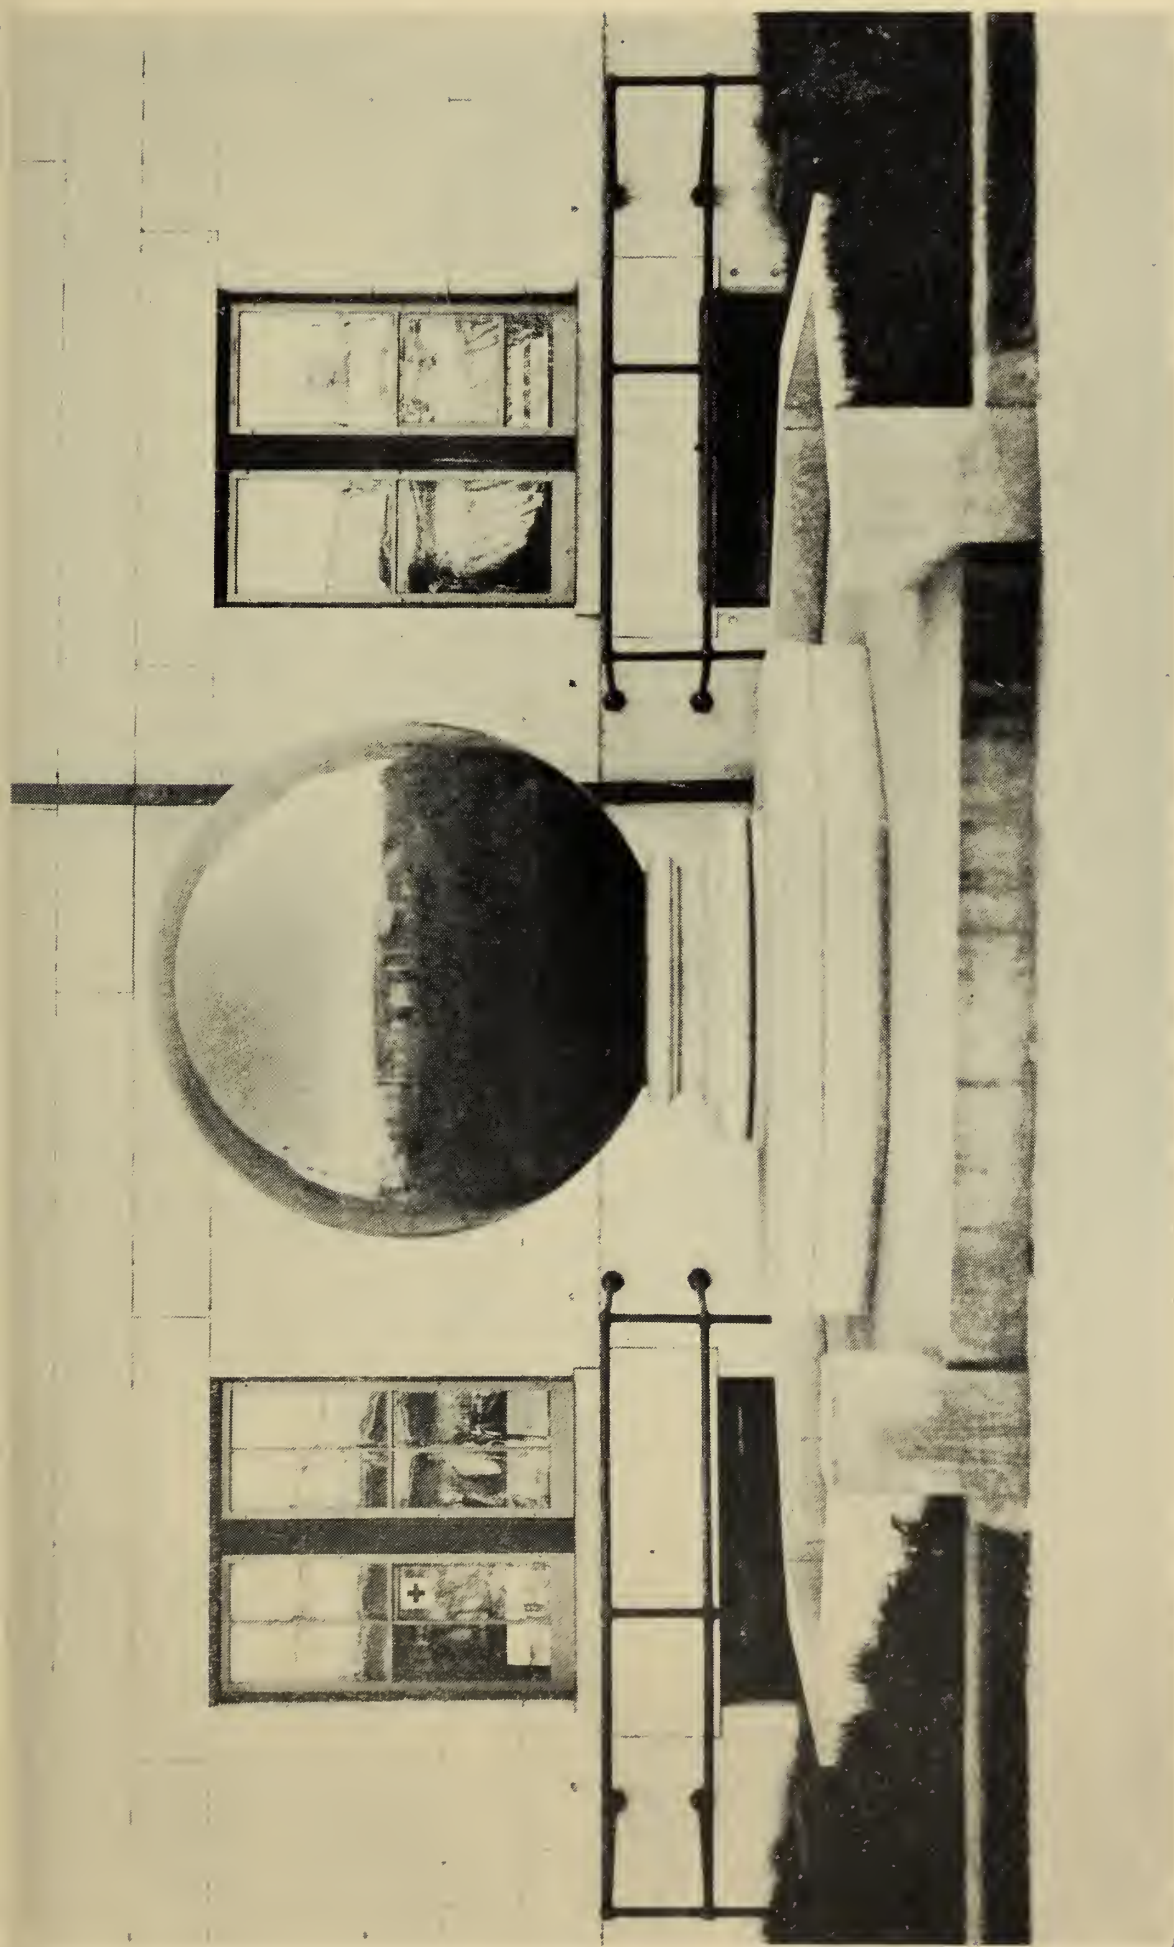

Eight thousand feet of cable have been placed under ground with all necessary junction boxes and laterals. Nine new boxes have been installed and 17 miles of overhead wire run. 480 cross arms have been used. All fire alarm boxes were speeded up to the rate of one blow per second, which will transmit the box number to all stations much quicker than the old system. All stations and outside signalling apparatus are now connected in two signals circuits, operated from Headquarters, making it doubly secure in all stations to receive alarms. Number of Fire Alarm boxes tested, 2,400. Number of Fire Alarm circuit battery tests, 1,200. Number of Fire Alarm circuit ground tests, 400.

In conclusion I wish to express my sincere thanks to His Honor, the Mayor, for his interest taken in the department, the City Council, to the Auditor's and Treasurer's offices for courtesies shown, and to the officers and men of the department for the valuable services rendered.

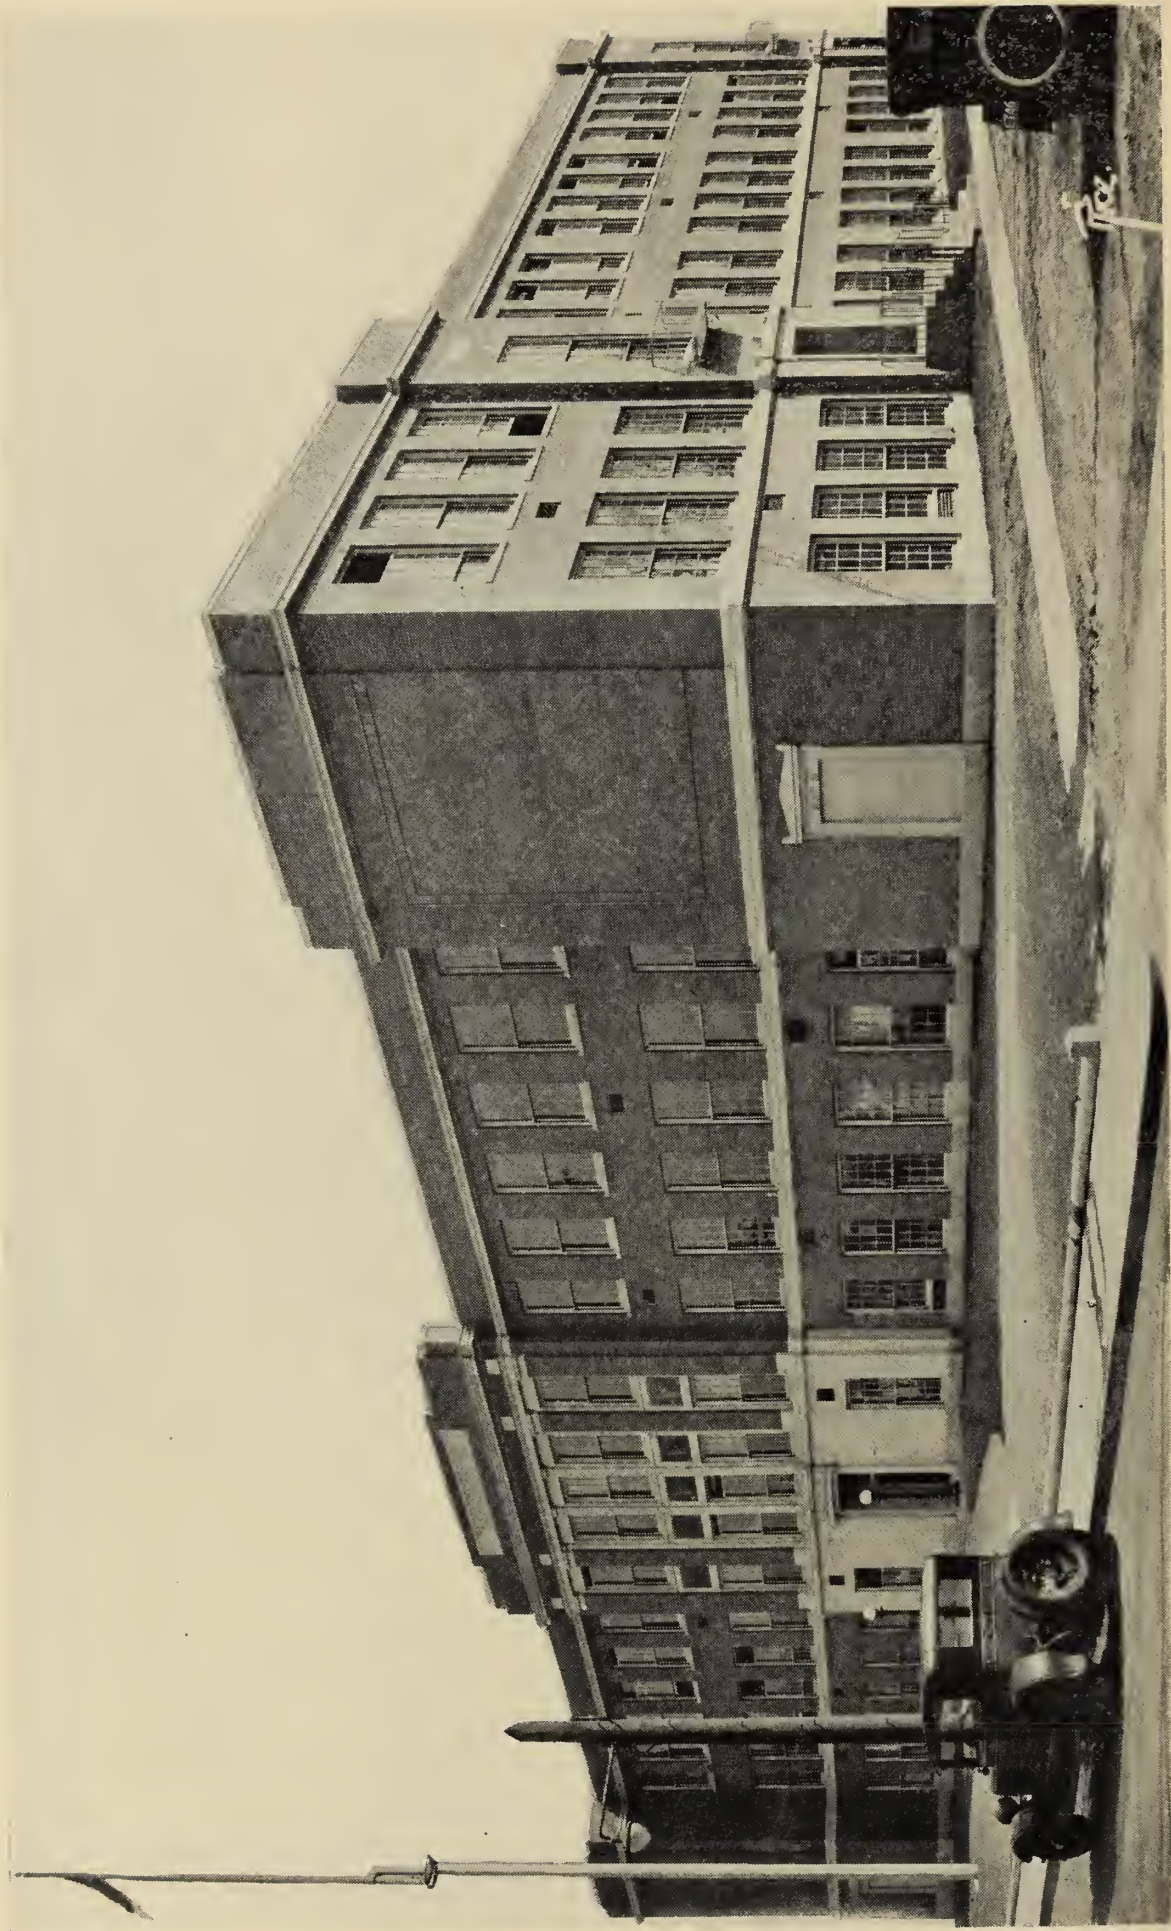

Very respectfully,

ALFRED L. MEAD,
Chief of Department.

*Lieutenants William Sands and John O'Neil were appointed as deputy chiefs, and Lieutenants James C. Gallagher and Peter Creedon as captains, under the reorganization.

REPORT OF INSPECTOR OF BUILDINGS

JANUARY 1ST, 1929.

HONORABLE THOMAS J. MCGRATH, *Mayor of Quincy, Quincy Massachusetts.*

DEAR SIR:—I herewith submit the twenty-second annual report for the year ending December 31, 1928.

There has been a substantial increase in the number of permits issued and also in the estimated cost of the work done under the permits.

The number of housekeeping units erected the past year was 977, in which number are included 453 one family houses and 5 apartment houses. 37 mercantile buildings were constructed during the year. 4 manufacturing buildings were also erected which employ approximately one hundred and fifty persons.

It is becoming a serious question what is to be the outcome of this condition of the labor question. We are increasing our population every year and decreasing the number of opportunities for our citizens to obtain employment within the City. Are we becoming a bedroom for Boston? If we are to be in this position it will be a very serious problem for the City Government to finance the situation in the future, as the homes that we are constructing are not adequate to secure the necessary means to successfully carry on.

The Civic Organizations of the City would be of inestimable value to the welfare of the City if they would take this matter under serious consideration and bring out some method of providing employment for the men who work with their hands.

The prospects for the ensuing year seem to be that more of the larger type of buildings will be erected as many sketches have been presented which call for quite a few of these structures.

TABULATIONS OF BUILDING OPERATIONS FOR 1928

SEWER DEPARTMENT

JANUARY 1, 1929.

HON. THOMAS J. McGRATH, *Mayor Quincy, Mass.*

SIR:—The following is a description of the work done by the Sewer Division of the Public Works Department for the year ending Dec. 31, 1928.

For financial statement see the Auditor's report.

Approximately 7.5 miles of sanitary sewers were built this year entirely by day labor. This is about fifty per cent greater than our average yearly extensions and was due in part to the large street construction program and the start of a system of sewers for Squantum.

The appended table shows the location, length, size and number of manholes involved in the construction of these sewers.

The number of house connections made to buildings for the year were 624 in wards as follows:—

Ward 1.....	144	Ward 4.....	139
Ward 2.....	50	Ward 5.....	110
Ward 3.....	44	Ward 6.....	137

The total number of feet laid in these connections 28,410.30 at a cost of \$30,126.88, thus making the average cost per foot \$1.060.

Average length per connection.....	45.53 feet
Average cost per connection.....	\$48.58

Buildings as follows:—

Single houses	443	Business blocks.....	26
Two-family houses	88	Halls	2
Three-family houses	1	Garages	3
Four apartments and over	45	Gas stations	3
Schools	2	Mercantile	11

The maintenance work, cleaning and flushing has been carried on in the usual manner this year.

Storm Drains

The supervision and construction of all new storm drains was performed by this department. With two exceptions this work was done entirely by day labor. Contracts were made with Coleman Brothers of Boston and Dennis F. Crowley of Quincy for the construction of drains in Water and Copeland Streets, Madison Avenue to Phipps Street and for the Sunny Creek section and vicinity of Elm Avenue, Wollaston.

The completion of these drains has relieved the flooded areas materially. A tabulated list of these drains is included in the report of the City Engineer.

Respectfully submitted,

WALTER S. McKENZIE,
General Foreman.

WM. L. FOSTER,
Treasurer.

Hingham, December 31, 1928.

Trustees of Weymouth Fore River Bridge,

GENTLEMEN:—I have examined the accounts of William L. Foster, Treasurer of the Trustees of Weymouth Fore River Bridge, for the year 1928, reconciled the bank account, and I hereby certify that the same are correct with proper vouchers.

(Signed) J. IRVING BOTTING,
Town Accountant.

Hingham, January 21, 1929.

REPORT OF CITY PLANNING BOARD

To His Honor the Mayor and Members of the City Council:

GENTLEMEN:—With the twenty-one street studies we have made this past season, the outstanding necessity appears to us at this time to be saving Chestnut Street a width that should be sufficient for all time.

The additional ten feet planned at the time the Granite Trust Building was laid out is but a straw in the widening of this thoroughfare in our business center. The imminent prospect of business development adjoining the Strand Theatre in our opinion calls for a building line on this northeasterly side of Chestnut Street of at least fifteen feet. Any less than this we consider would be insufficient for ultimate traffic.

While we can anticipate only a building line at present upon the site of the Bradford Building and Strand Theatre, it is apparent that the additional width from the latter point through to Revere Road is necessary for proper development. The fact that a new mercantile structure would be set back from the present line of the Theater Building does not appear to us to be a detrimental feature.

The ample radius from Chestnut Street into Hancock at the bank building not only gives the commercial outlook desired but the fact that traffic drawn up upon the northeasterly side of the street is entirely removed from through progress in the street, works entirely in favor of this study.

Widening of Cottage Avenue and Foster Street should come naturally in connection with these plans for Chestnut Street. The experience of the City in widening School and Franklin Streets applies practically to this proposition. It cannot be but a very short period of time before results will prove the wisdom of immediate action. Our previous report upon Maple Street is only intensified by the above findings.

We have added to our City plan map during the past season, the Board of Survey layouts as passed by it and added such necessary street extensions as appear advisable and necessary. This City plan map we shall hope to produce upon a reduced scale for study by the City Council or its members in the localities affected.

In the construction of a permanent fence at the westerly side of the railroad tracks at the Quincy Station, we feel that the railroad should have taken into consideration the two turnstiles which we advocated in our last report, to accommodate the thousands of outward bound passengers who now have to cross the inward tracks and climb the stairway or use the dangerous passage by the corner of the cemetery to Granite Street and the west.

During the past year our full Board met with the Metropolitan Boston Planning Federation. We were also represented at the State Federation at New Bedford. We have had helpful connection with the National Conference on City Planning and the Government Department upon the same. Our local connections with the Chamber of Commerce, the Citizen's Traffic Committee and the Zoning Committee have been helpful.

In the event of the railroad taking over the Keating property at north of the station, we recommend that provision be made to connect their extended platform space with Saville Row in order to afford accommodation to the public to and from the vicinity of the Miller Parking area.

Enclosed herewith is our plan for Chestnut Street as recommended.

Our tribute to the late Patrick F. O'Brien in our tenth annual report we have now to consider in connection with his passing and can only add to that testimonial the added membership in our Board since that date. The period of his return to the City Engineer's office and consequent membership of our board as clerk, only added to the regard and esteem originally expressed.

Respectfully submitted,

CITY PLANNING BOARD

WILSON MARSH, *Chairman*

JAMES E. W. GEARY, *Vice Chairman*

THEO. J. CRAIG

JAMES J. McPHILLIPS

BOARD OF SURVEY

JANUARY 1, 1929.

To His Honor the Mayor and Members of the City Council:

GENTLEMEN:—The members of the Board of Survey respectfully submit herewith its fourteenth annual report for the year ending December 31, 1928.

Mr. William G. Shaw was re-elected Chairman of the Board.

Meetings were held at various times during the year and five public hearings were held on petitions for the laying out of new streets as follows:

March 2, 1928, on petition of Leon L. Parsons and Harold W. Cate for the layout of streets on Palmer Street.

On petition of Fannie K. Anderson for layout of a street off Adams Street near its junction with Furnace Brook Parkway.

March 9, 1928, on petition of the Citizens Realty Trust for the layout of streets on the Crabtree Estate at Squantum.

July 6, 1928, on petition of Madeline A. Saulnier for the extension of Ballou Street to the Milton Line.

October 24, 1928, on petition of K. E. Carlson to layout a street from Common Street to Furnace Brook Parkway through land formerly of Eaton.

The Board gave tentative approval on the layout of streets subject to the petitioners complying with all the rules and regulations set down by the Board.

Final approval was given for sixteen streets covering a distance of 2.69 miles. For list see schedule of streets approved.

Respectfully submitted,

WILLIAM G. SHAW, *Chairman,*

GEORGE H. NEWCOMB,

WILLIAM A. CRESWELL,

Board of Survey.

WALLACE S. CARSON, *Clerk.*

REPORT OF CITY SOLICITOR

JANUARY 1, 1929.

HON. THOMAS J. McGRATH, *Mayor of the City of Quincy.*

DEAR SIR:—During the last year, in addition to the routine work of preparing legal papers, advising heads of departments, adjusting awards and claims for damages on account of accidents and of land takings, attending meetings of the City Council, and rendering opinions on questions submitted by said Council, and filing pleadings on behalf of the City in actions brought in Court, the following are the more important cases disposed of:—

The case of Sorterup vs. City of Quincy, No. 17343 Norfolk Superior Court was an action of tort wherein damages were claimed in the sum of \$10,000. This case was tried in Dedham and on June 8, 1928, a verdict was rendered in favor of the City.

The case of Signe E. Wheeler, widow of John L. Wheeler, vs. City of Quincy. This action was brought for the death of Wheeler, an employee of the City, it being claimed that he was killed while at work in the usual course of his employment. The action was brought under the Workmen's Compensation Law for said death in the sum of \$5,000. The case was heard in the first instance by a member of the Industrial Accident Board and a verdict rendered in favor of the City. The petitioner claimed a review of this finding and the case was heard by the full board, and on June 19, 1928, said Board confirmed the finding in favor of the City.

The cases of John P. Granahan and Lora C. Merrill, actions arising out of the taking of land on May 25, 1925, at the corner of Hancock and East Squantum Streets for the North Junior High School. At that time twenty eight thousand (28,000) square feet of land were taken from Mr. Merrill, and one hundred twenty-three thousand, seven hundred and ten (123,710) square feet of land from Mr. Granahan. Thereafter the Mayor of the City, Perley E. Barbour, requested from a Board of Appraisers, who were then employed by the City to estimate values of land, an opinion as to the value of the land so taken. On October 4, 1926, the said Board reported to him, recommending payment of \$22,400 to Mr. Merrill and \$30,000 to Mr. Granahan. The above awards, with interest amounted to \$57,810. These awards were not paid and actions in Court were brought to determine the value of said taking. The matter of settlement of these claims was considered by the City Council in conference with the legal representative of the petitioners; and after fully considering the matter, the City Council voted that the matter be left wholly with the City Solicitor and the Mayor. However, no settlement was effected until the day on which the cases were reached for trial at the Norfolk Superior Court. At that time a complete statement of the facts was submitted to the presiding Justice, Judge Cox, and a settlement agreed to in the sum of \$42,000, this sum including damages for land taking, interests and costs.

In 1928, owing to the death of Hon. H. O. Fairbanks, the City Auditor, the question arose as to whether the City Council or

the Mayor of the City was the proper party to appoint an Auditor. The Mayor appointed an Auditor and the City Council attempted to do the same. Thereupon the City Council brought a petition for a writ of Mandamus to compel the Mayor to recognize the appointment made by the City Council, claiming that the Mayor had no right to make the appointment. On completion of the pleadings the matter was heard before a single Justice of the Supreme Court, Mr. Justice Sanderson. After hearing the parties on briefs and oral arguments Judge Sanderson dismissed the petition, thereby sustaining the position maintained by the Mayor. An appeal from this decision was taken by the City Council and a Bill of Exceptions allowed in June, 1928.

In the matter of the so-called grade crossing cases, after the proceedings in the Equity Court wherein the City obtained an order against the Railroad compelling it to show cause why it should not proceed with the work, many conferences were held and plans worked out in an attempt to meet the somewhat changed conditions now existing compared with the conditions at the time of the original decree.

Respectfully submitted,

J. J. McANARNEY,
City Solicitor.

REPORT OF ENGINEERING DEPARTMENT

JANUARY 1, 1929.

To His Honor the Mayor and Members of the City Council:

DEAR SIRs:—I herewith respectfully submit the twenty-ninth annual report of the Engineering Department for the year ending December 31, 1928.

Owing to the death in November 1928 of the former City Engineer, Mr. Patrick F. O'Brien, I shall endeavor to write this report as complete as possible from what information I can obtain in other departments and records of this department.

Lines and Grades on Accepted Streets

It is customary for this department to give lines and grades on accepted streets upon request of the property owners.

The usual number of requests were made and granted during the year.

Assessors' Plans

The Assessors Plans are kept up to date by this department. They have about 800 plans showing properties over the entire City. These plans show the owners names, areas, lot numbers, plot numbers and all buildings on each individual property.

During the year there were 3,863 real estate transfers which were changed on these plans.

There were permits issued for 661 dwellings and mercantile buildings; 726 garages; 936 alterations and 81 removals.

These were started and will be located in the field and placed on the Assessors Plans by April 1, 1929 when the Assessors will be ready to use them.

These plans are in very poor condition and before long it will be necessary to make up a new set of tracings. This can be done by doing some each year until complete.

Sewer

There were 7.55 miles of sewer laid out and constructed on 67 streets in various parts of the City.

Squantum which has never been connected with sewer was started. About one mile was laid in various streets including a main sewer on Dorchester Street which is to connect to a pumping station off East Squantum Street. This station is to be built by the Metropolitan Sewer Commission when we have enough sewer laid in Squantum to warrant it. We feel that this may be started during 1929.

The sewer on Hancock Street north of Saville Street was not deep enough for the modern buildings of to-day, so a lower level sewer has been started on Huntley Road from Woodward Avenue which will take care of all future developments in this section.

For list of sewers see report of Commissioner of Public Works, Sewer Division.

Accepted Streets

There were 51 streets accepted during 1928 covering a distance of 6.55 miles in various parts of the City.

There were 4 street widenings passed covering a distance of 0.59 miles.

See schedule on accepted streets.

Street Construction

There were 4.25 miles of new streets constructed in 1928. Some streets that were not finished in 1927 and most of the 1928 streets were completed by the Public Works Department during the year.

Two streets, Harvard Street and Exeter Street were built under contract by Coleman Brothers of Boston.

See schedule of streets constructed.

Rebuilt Streets

There were 4.89 miles of streets rebuilt during the year in various parts of the City.

Washington Street from the Southern Artery to Chubbuck Street was resurfaced by Warren Brothers under contract, with a four-inch foundation and a Warrenite top.

The other streets were rebuilt by the Public Works Department. See schedule of rebuilt streets.

Drains

There were 6.08 miles of surface drains installed during the year in various parts of the City.

Drains were installed in the new streets that were accepted and built, most of this work being done by the Sewer Division of the Public Works Department.

Coleman Brothers under contract built a 30-inch and 24-inch drain on Water Street and Copeland Street from the Town Brook to Evan's turnout. This was a much needed improvement relieving the low area in Grossman Street and Roberts Street.

This drain also connects with the Smith Street and Garfield Street drain which is carrying the overflow from the Quarry District on Quarry Street and is flowing continually.

They also built a 42-inch drain from Phipps Street to Madison Avenue. This drain was for the improvement of the Penn's Hill Drain.

On Exeter Street they built 720 feet of 12-inch drain from North Central Avenue to Norfolk Street, as this street was built by contract.

Dennis F. Crowley under contract constructed a double line of 24-inch Armco pipe drain in the so-called Sunny Creek Area.

This area is very low and salt marsh so that this pipe was treated with asphalt to protect it from the salt water. This pipe should be of service for sometime.

See schedule of drains.

Granolithic Sidewalks

William Shea and Company under contract, built 7.51 miles of granolithic sidewalks in various parts of the City. This was on 37 different streets. This work was carried on into November while the weather remained open.

For list of sidewalks see schedule.

Amiesite and Asphalt Sidewalks

There was 6.46 miles of amiesite and asphalt sidewalks constructed on 25 different streets in various parts of the City. This work was done by the Public Works Department.

See amiesite and asphalt sidewalk schedule.

Bridges

West Squantum Street Bridge over the N. Y. N. H. & H. R. R. was started with new abutments built to allow for four tracks on the Railroad. West Squantum Street was widened to forty feet and the grade raised to allow for the proper clearance over the tracks.

A retaining wall was built on the northerly side of West Squantum Street about 220 feet long.

This bridge will be put in place and the approaches completed in the early part of 1929.

Respectfully submitted,

WALLACE S. CARSON,

City Engineer.

SCHEDULE OF ACCEPTED STREETS OF 1928

Street	Location	Length	Width	Ward	Date Accepted
Aberdeen Road.....	Summit Street to Bay View Road	312	30	6	June 25, 1928
Alton Road	South of Crest Street northerly	509	40	3	June 19, 1928
Arlington Street	Passage Way, Norfolk Iron Works, north	232	40	6	June 25, 1928

During the year ending December 31, 1928, there were four hundred and thirty-five (435) burials in Mount Wollaston Cemetery.

The sum of \$10,815.00 was added to the Perpetual Care Fund. A detailed statement of the investment will be found in the City Treasurer's report.

Respectfully submitted,

WELLINGTON W. MITCHELL,
Manager of Public Burial Places.

REPORT OF SEALER OF WEIGHTS AND MEASURES

HON. THOMAS J. McGRATH, *Mayor, Quincy, Mass.*

SIR:—I respectfully submit the annual report of the Weights and Measures Department for the year ending Dec. 31, 1928.

During the year the Sealer and Deputy visited 1,336 places of business where scales or measures are used in the sale of commodities to the public.

This report shows more than 85 more than the previous year, thus showing the increase in the growth of the city. In this report under the heading, Inspections and Re-weighings, will be found in detail accurate account of package goods put up for sale. In each case a record is kept for future use of every fraction of an ounce over or under the prescribed weight.

Following will be found a summary of the work done by this department.

JAMES M. CANTFILL,
Sealer of Weights and Measures.

SEALING

	Adjusted	Sealed	Non-sealed	Condemned

Being cared for in State Infirmary (Tewksbury)	9
Persons buried during the year	8
Being cared for by private societies, adults	2
Private hospitals	2

The past year showed a big increase in relief tended to the needy of the City which was largely due to increase in population, depression in business, sickness and a great increase in the number of people who are losing the virtues of thrift and self-denial.

I wish again to call attention to the fact that our present City Infirmary is now filled to its utmost capacity. The State is refusing us admission to Tewksbury for our chronic cases and we are at the present time forced to board ten outside.

We have during the past year installed a new gas range at the City Infirmary, made a separate dining room for the women and a few other necessary improvements.

I wish at this time to thank all those affiliated with me in the work of the Welfare Department also His Honor the Mayor for his hearty co-operation.

Respectfully submitted,

CHANNING T. FURNALD,
Commissioner of Public Welfare.

ANNUAL REPORT OF THE PARK DEPARTMENT

JANUARY 2, 1928.

THOMAS J. McGRATH, *Mayor, Quincy, Massachusetts.*

MY DEAR MAYOR:—Your appointees, Yrjo M. Matson, Thomas J. Larkin and Loreto D. Tocci, the first-named being Chairman and Secretary, take pleasure in submitting the following report of the Park Commission for the year 1928.

During the past year our parks and playgrounds were used more by the public than ever before.

The playgrounds were conducted under supervision during the months of July and August daily, except Sundays, and after school on afternoons from September 10th to October 20th. A daily program was provided. An exhibition was conducted on each playground during the summer and a general exhibition was held at Merrymount Park at twilight, so that parents of the children might enjoy the program.

Daily Program for Playgrounds

NINE O'CLOCK

Flag raising. Arrange swings and see-saws.

NINE-FIFTEEN TO TWELVE O'CLOCK

Playground games for smaller children.

NINE-THIRTY

Baseball for large boys (league). Indoor baseball for small boys. Folk dancing and playground games for girls.

ONE O'CLOCK

Modeling in sand, bean bag, ring toss, for small children. Quoits, croquet for larger boys. Croquet, weaving for girls.

ONE-THIRTY

Baseball, indoor baseball, volley ball, slug ball (league for girls), weaving for girls. Calisthenics daily when a large number of children are on the playground, tennis.

THREE-THIRTY

Playground games for boys and girls. Safety Campaign instructions.

Pledge of Allegiance

Take down flag at sunset.

Tennis Courts

The two tennis courts at Merrymount Park and the one at the Adams Playground at South Quincy, were in constant use throughout the season.

There is a great demand for more tennis courts all over the city. I earnestly urge an appropriation for the construction of five tennis courts at Faxon Field, near the new High School. An inter-playground tennis tournament was conducted during the past season.

Tennis is becoming more popular, especially with girls.

Skating Areas

Skating areas are provided at Manet Lake, Sailor's Home at Wollaston, Huckins Avenue near the Squantum School, Adams Playground at South Quincy, Blue Hills Reservoir at West Quincy. When the weather becomes cold and the ground freezes it is contemplated to flood a section of Victory Park for skating.

Hollis Street Playground

Land was taken for a playground on Hollis Avenue and the trees and shrubs are now removed therefrom. Drain pipes should be put in immediately and the area filled about two feet all over. This fill should be provided from the ash collections from the north end of the city.

Acquatics

During the summer thousands of people enjoyed bathing and boating on our sea shores. The Park Department placed four rafts and a chute at Avalon Beach, two rafts at Quincy Point Bath House, one at River Street, one at Germantown, two at Black's Creek. Two new rafts should be placed at Hough's Neck.

Band Concerts

During the summer twenty-eight band concerts were conducted in Merrymount Park at the very low cost of five hundred dollars. The average attendance at these band concerts was approximately one thousand. Most of the audiences were composed of young people between the ages of eighteen and twenty-five, although there were many older people who appreciated the music.

Horticulture

During the year roses were planted in Merrymount Park and Whiton Park. Hedges were set out on Elm Avenue. Tulip bulbs, donated by Mrs. Horace W. Richmond, President of the Wollaston Garden Club, were planted at Safford Park. Hedges were set out at Faxon Field by and at the expense of Mr. Henry M. Faxon.

Toboggan

The contract for a toboggan chute has been awarded and it will be available for use this winter.

Old Police Station

The playground equipment is stored at the old police station.

Boy Scouts

The Park Department takes this opportunity to publicly thank the Boy Scouts of America for the patriotic service of raising the flags on holidays.

Permits

During the year the following number of permits were issued for the various activities, viz.:

Hockey—ten.
Baseball—four hundred and forty-seven.
Soccer—thirty-eight.
Football—thirty-seven.
Band concerts—twenty-eight.
Picnics—twenty.
Boy scout outings—seven.
Girl scout outings—two.
Exhibition drills—three.

School athletic activities are not included in the number of permits. I believe all activities will increase materially during the coming year because of the passage of the Sunday Sports Bill.

Recommendations

Purchase power lawn mower and small truck.
Provide better illumination for football and skating.
Construct more tennis courts.
Provide playground equipment at Faxon Field.
Transfer playground apparatus from Ward 2 playground to Avalon Beach.
Acquire new playground at Wollaston (hearing before Council in 1928).
Make backstops at Ward 3, Ward 4, and Squantum.
Provide comfort stations at playgrounds where necessary.
Purchase three lots land at Squantum.
Purchase so-called Richardson Place at Squantum.
Acquisition of land for playground on West Street.
Acquisition of additional land or new playground site at Hough's Neck.
Construct new bridge to Pine Island.
Build bath house at Merrymount Park.
Fill oval.
Make bowling greens.
Provide all-year-round recreation facilities.

Engineering Department

The Park Department is grateful to the Engineering Department for services rendered during the past year.

Expenditures

The expenditures of the Department may be found in the Auditor's Report.

Respectfully submitted,

YRJO M. MATSON,
Chairman.
THOMAS J. LARKIN,
LORETO D. TOCCI.

* Resigned March, 1928.

REPORT OF THE TRUSTEES

To His Honor, the Mayor of the City of Quincy:

The fifty-eighth annual report of the Trustees of the Thomas Crane Public Library is submitted herewith.

There has been a very satisfactory increase in the use of the library during the year 1928. The per capita circulation was 8.4, this percentage being considered unusually high for libraries in cities having as large a population as Quincy.

Early in December the Trustees voted to establish a branch library at Lakin Square. This action was the result of a petition of those residents of Wards 4 and 5 who live near the East Milton line and in the vicinity of the Gridley Bryant School. This district is over a mile from any other Quincy library service, and it is believed that the patronage will fully justify the establishment of this branch. The library has now a total of eleven branches.

The latter part of the year a petition for a branch at Merrymount was presented by a committee of the Merrymount Association. This petition was taken under advisement to be acted upon at a subsequent date when more complete information has been obtained and considered by the Trustees.

The location of the Parker Branch at Norfolk Downs was changed during the year. The new quarters are much better adapted to the fast growing needs of that community.

During the summer the interior of the Wollaston Branch was entirely refinished, adding much to its general attractiveness.

At the annual meeting in June of the Massachusetts Library Club, the state association of librarians, we were honored in having our librarian Mr. Hill, elected as its president for the year 1928-29.

With the continual and steady increase in the use of the facilities of the library by our citizens it becomes more and more necessary to increase the annual appropriation for the purchase of books. Attention is also invited to the fact that as the circulation of the library expands and the number of branches becomes greater, it follows that there will have to be an additional number of assistants to take care of this greater volume of business.

The work of the librarian and his staff has been faithful and zealous and has resulted in the efficient operation of our library system.

Respectfully submitted,

GEORGE E. ADAMS, *Chairman*,
GEORGIANA CUSHING LANE, *Secretary*.

JAMES H. SANKEY, *Treasurer.*

GEORGIANA CUSHING LANE,

Auditing Committee.

LIBRARIAN'S REPORT

To the Trustees of the Thomas Crane Public Library:

The report of the librarian for the year ending December 31, 1928, is herewith submitted:

With considerable gratification another record-breaking circulation can be reported, 572,544 books being loaned during the year. This figure represents a gain of 60,323, or 11½% over the figures of 1927, and a per capita circulation of 8.42. This gain was made under the *status quo* of the year previous, there being no branch extensions, no changes in rules governing the loan of books and no increase in book funds during 1928. The main library issued 103,451 books, the largest number in its history, and all branches showed substantial gains, the largest proportional increase being that of the General Palmer Branch, slightly over 100 per cent. The only agency showing a loss was the Hospital Service which gave out 39 less books than last year.

On December 31st the registration files showed a total of 20,778 borrowers, which means that 30% of the residents of Quincy, adult and juvenile, have reader's cards. While this proportion is slightly above the average for libraries in cities the size of Quincy, it can doubtless be increased through more publicity and a better personal service to readers.

The number of books added to the library in 1928 was 7,179, but as 2,991 were withdrawn, the net gain was only 4,188, or 5½%. The library received 198 gifts, perhaps the most noteworthy being about 30 volumes of Italian literature presented by Mr. and Mrs. Charles Zezzos of Quincy Point. Of the books purchased, 5,172, or 72%, were duplicates or replacements, only 28% being first copies of new books. A system of ten branches necessarily means an extensive duplication of books and a circulation of over one-half million causes an increasing wear and tear and consequent and continual heavy charge for replacements. In number of titles, as distinct from copies and volumes, the Thomas Crane Public Library is actually growing slower than many libraries in towns one-half the size of Quincy. It must be apparent to borrowers as well as to those working in the library that the demands for books, especially in the fields of art, science, business and industry, are not being met. This deficiency coupled with the fact that an additional branch is to be opened in February and must be supplied with books is the reason for the request of an addition of \$3,000 in our book budget for 1929. A statement made in last year's report will bear repetition. It is that there is probably no other library in this country with a circulation of a half million which does not have 100,000 books. The total stock of the Thomas Crane Public Library on December 31, 1928, was 75,898 books.

As the result of a thorough investigation of library practice and administration, a standard ratio of number of assistants to volumes of circulation has been evolved. It is one full-time assistant to every 20,000 books issued per year. According to this standard the Thomas Crane Public Library would have had twenty-eight assistants in 1928 instead of fourteen. As most of the libraries in New England conform more or less closely to this ratio, it cannot be wondered that your librarian is frequently asked: "How do you ever get along with such a small staff?" The answer is found in limiting the hours that many of the branches are open, the utilization of branch librarians in preparing books for the shelves or in desk work at the main library and in other routine work, and in curtailing other recognized features of library work such as reference work, making catalogues for branches, taking inventory, mending, etc. While there is doubtless good Coolidge economy in such administration, much of it is really accomplished at the expense of services that Quincy readers have a right to expect. When members of the staff are ill, shifts are necessary, the whole routine is upset and retarded and a good deal of proper library

housekeeping is neglected. This library does not expect to reach the standard ratio referred to above for several years, but the addition of two or three assistants to the staff each year will enable the library to better keep its house in order, and give a more satisfactory service to its borrowers. A modest request for two extra assistants and a larger allowance for part time and substitute help is included in the 1929 budget.

A start toward increasing the hours some of the branches are open was made the past year. Three additional evenings a week and Saturday morning were added to the hours of the Wollaston Branch and the hours at the Atlantic Branch were extended to every weekday afternoon instead of four afternoons as formerly. Early in June the Parker Branch was moved from its inadequate and dingy quarters in the basement of the Parker School to two stores at 6-8 Tyler Street, about a block from its old location. The partition between the stores was removed and the new quarters renovated and fitted with new shelving and equipment. By vote of the trustees, the name of this branch was changed to Norfolk Downs Branch.

Miss Kingman, Children's Librarian, reported a gain of 7,652 in the circulation from the Children's Room of the main library, 46,427 books being issued. The increased work in this room has necessitated the employment of a part time assistant during the busy hours after school. Miss Kingman also reported a very material gain in the use of the classroom libraries sent to the Quincy schools, 74,954 books being taken by pupils from these collections of 40-50 books each. Miss Kingman and her assistant have visited the schools, made contacts with the teachers and report a splendid spirit of co-operation.

By invitation of the Quincy Chamber of Commerce, the library was again represented at the Trading Post held in the Armory March 26-28. A commodious corner booth was assigned the library, allowing more room for displaying books, magazines, posters, maps, etc., and for tables and chairs which many a tired visitor utilized for rest and reading. A fair number of new borrowers were added by registration at the booth and considerable interest was aroused by a contest which consisted in guessing book titles from posters displayed in every booth in the hall, the purpose being to tie up the library with the other exhibitors. The Chamber of Commerce awarded three prizes, all autographed copies of "Three Hundred Years of Quincy," which, as it happened, were all won by students in the Senior and Junior High Schools.

It was with great regret that the resignation of Mrs. Alice McMullin was accepted in October. Mrs. McMullin, then Miss McCarron, organized both the Parker and the Squantum Branches and served continuously as their librarian for nearly six years. Alert, energetic, with an ideal temperament for meeting and helping borrowers, she did much toward building up these two branches. Her associates wish her much joy in her new home in Newton.

The two greatest and most pressing problems of the library, the need for more books and more assistants, have been mentioned. Before this report is concluded your attention is called to two other problems. The first is a more adequate reference service, particularly for the business man and industrial worker. Providing material for such a service will come through an increase in the book appropriation, but the greatest need is the employment of a competent, trained reference assistant at the main library. The lack of such an assistant constitutes a decided weakness in our present system. With the opening of a new branch and the request for additional assistants to carry on the pressing burden of our regular routine, it was not thought desirable to ask for such an assistant this coming year. It is sincerely hoped, however, that by 1930 the reference service can be put on a par with that rendered by other city libraries.

The other problem is one that is already very apparent to those who administer the library and that is the need for more room at the main library. It will probably be necessary this next summer to move the magazines now on the third floor stack to temporary shelves in the room over the reading room and to extend our active collection of books to the third story. If Quincy grows as it has been growing, larger reading room and children's room facilities will be needed, as well as increased stack room. Without discussing any possible solution at this time, the problem should be given consideration in the near future.

Thanks are due to the local newspapers for their interest manifested in space given library news and editorial comment. Praise is pleasing and criticism may be salutary and to friends who have favored us with either we are grateful.

I can testify to the enthusiastic interest of the staff in the work of the library and the fine spirit with which they have taken transfers, shifts, changes in assignments and extra hours, all of which have been constantly made necessary by a large system operated with a minimum corps of assistants. The library and the librarian are very fortunate in having a real executive assistant in Miss Callahan, who has handled with tact and efficiency much of the detail of our somewhat complex routine. Whatever progress the Thomas Crane Public Library has made during the past year has been due in large measure to the understanding of the library's needs by the personnel of the city government and to the assistance and loyal support given by the Board of Trustees.

Respectfully submitted,

GALEN W. HILL,
Librarian.

REPORT OF CITY CLERK

I have the honor to submit the fortieth annual report of this department, being for the year ending December 31, 1928.

RECEIPTS

Junk licenses	\$280 00
Amusement licenses	2,395 00
Common victuallers licenses	580 00
Express and carriage licenses	9 00
Pool and billiard licenses	600 00
Auctioneers licenses	14 00
Druggist licenses	12 00
All other licenses	2,914 50
Marriage permits	610 00
Recording and special	1,036 28
	<hr/>
	\$8,450 78

The above sum has been paid to the City Treasurer.

Number of marriage intentions issued in 1928	615
Number of marriages recorded in 1928	663
Number of births recorded in 1928	1,532
Number of deaths recorded in 1928	740

The number of dogs licensed in 1928 was 1,654 males; 299 females; 327 spayed and 1 breeders license, for which the sum of \$5,482 was collected. The sum of \$5,025.80 was paid to the County Treasurer and \$456.20 to the City Treasurer. The sum of \$2,659.75 was collected for hunting licenses. The fees amounting to \$287.05 were paid to the City Treasurer and the balance to the Commonwealth.

Annexed are the births, marriages and deaths recorded in Quincy in 1928 and the election returns.

EMERY L. CRANE,
City Clerk.

Office: School Committee Rooms

Office Hours: 8 to 9.30 A. M., 1.30 to 2 P. M., and 4.30 to 5 P. M.;
Saturdays, 8 A. M. to 12 M.

REPORT OF SCHOOL COMMITTEE

To the Citizens of Quincy:

The School Committee presents herewith a report of its activities for the year 1928.

That it has been a busy year is shown by the fact that the Committee has held twenty-one formal meetings and several informal conferences.

The matter of school accommodations has, as usual, claimed much of our attention. The addition to the Daniel Webster School was completed and dedicated with most impressive ceremonies at the beginning of the Fall term. This addition has been named the Quincy Point Junior High School and is a most satisfactory building relieving the urgent congestion of this district. The completion of this building provided the final unit in the Junior High School system throughout the city,—with the consequent readjustments of personnel and administration.

On February 21, 1928 the Mayor was requested to procure plans for school buildings at Merrymount and Adams Shore. Plans from the office of Mr. William Chapman, Architect, were approved and these two buildings are well under way and should be ready for occupancy next Fall.

Plans have also been requested and will be soon forthcoming for additions to the Montclair and Atherton Hough School buildings. These buildings will relieve a most distressing condition among the young children of these districts.

The increasing interest in higher education is shown by the overcrowded condition of our Senior High School which will necessitate in the near future an enlargement of our present building or, perhaps better, the erection of a new High School building in the northern section of the City. The North Junior High School will also require enlargement at an early date.

The repairs of the physical equipment have been supervised by special committees investigating the needs of each building.

The total Budget for the schools for the year 1928, including \$5,843.00 of the Smith-Hughes Funds, was \$1,083,456,—a large sum of money but we think well invested.

From this total should be deducted \$132,462.57 received into the City Treasury as the result of School Department operation. Of this amount \$10,522.37 was received for tuition from State and City of Boston minor wards and non-resident pupils; \$115,568.20 from the General School Fund and State reimbursements for State-aided schools; and \$6,372.00 from miscellaneous receipts, including sale of articles made in the Industrial and Home Making Schools. It would seem that a part, at least, of this amount should be returned to the School Department which is responsible for the cost of production and raw material.

The Committee has received from time to time requests from teachers and janitors for increases in salaries. These requests have been considered carefully and at length. The salaries of the janitors have been adjusted on a satisfactory basis. The salaries of teachers, as a result of readjustments in the system, require further consideration. It is hoped soon to establish an equitable schedule based on previous education, experience and efficiency.

Wishing to commemorate the long and faithful services of two former teachers, the Committee has erected in the Adams School

a memorial tablet to Miss Eliza Sheahan, and in the Washington School a tablet to Mr. Thomas B. Pollard. At the same time portraits of Miss Sarah A. Malone and Mrs. Ida F. Humphrey were presented to the Washington School.

The School Department and the children of the City suffered a great loss in the death of Miss Elsa Schoshusen who died last April. The Committee wishes to record its appreciation of her faithful and conscientious work as Supervisor of Primary Grades.

Miss Teresa McDonnell retired from her school work last June after forty years of hard and loving work in the Willard School. But she was not allowed to enjoy long her well-earned rest for she died in September last. Your Committee recommends that a suitable tablet be erected to her memory.

A custom in abeyance since the retirement of Miss Underwood from the Coddington School was revived this year in the appointment of Miss Margaret E. Sweeney as Principal of the Gridley Bryant School and of Miss Lucy L. Hennigar as Principal of the Willard School. These teachers have had long and successful experience in our school system.

We have this year inaugurated the experiment of the exchange of teachers of English between the Quincy Senior High School and the High School of Bradford, England. Miss Sally F. Dawes went to England and Miss Dorothy Fieldsend came to Quincy. The experiment is proving most satisfactory, resulting in a new and broader outlook.

Early in the year an examination was made of the physical condition of the children below High School grade. This examination was part of a state-wide survey of schools and was most thoroughly conducted by a commission of physicians and nurses appointed by the State Board of Health assisted by our School Physician and school nurses and the local Health Department. This resulted in finding many undernourished and weak children; a few with tuberculosis. Recommendations for care and treatment were made to parents. Some children were given sanatorium treatment and a follow-up system has been inaugurated. The force of school nurses has been increased by the appointment of Mrs. Marie Ewing.

In all our activities of the past year, the Committee has been ably assisted by the Superintendent and co-workers, some of whose reports in more detail appear in the following pages, and to whom we are much indebted.

The foregoing report was prepared by a special committee consisting of Dr. Nathaniel S. Hunting and Mr. Robert E. Foy and was adopted as the annual report of the Committee for the year 1928.

IN MEMORIAM

ELSA SCHOSHUSEN

Born July 29, 1880

Died April 21, 1928

Supervisor of Primary Grades
1921-1928

TERESA McDONNELL

Born August 23, 1863

Died September 20, 1928

For thirty-nine years a teacher
in the Willard School

Retired June 1928
1889-1928

REPORT OF THE SUPERINTENDENT OF SCHOOLS

To the School Committee of Quincy:

I submit the annual report of the Quincy public schools for the year 1928.

The work of the different departments is given in full as submitted by the department heads with emphasis placed on the features of their work which to them seemed most important. The principals and teachers have worked earnestly and intelligently to discharge their important duties.

During the year, several important steps were taken to increase the standard of scholarship in the Junior and Senior High Schools.

1. The passing mark was raised from 60 to 65 in all subjects.
2. The ninth grade subjects were evaluated in terms of points of credit.
3. Twenty points will be required for promotion to the tenth grade and eighty points, after June, 1930, to graduate from the Senior High School.

A new quarterly report card has been worked out for the Junior High School. Citizenship occupies a prominent place in the Junior High School course of study and, therefore, is given a prominent place on the report card. A six-year accumulative report card has been prepared for all pupils in the Junior and Senior High schools which will enable the Principals to obtain a resume of the conduct and scholarship of the pupils during those six years at any given time should it be desired.

A syllabus for all elementary teachers was typed, mimeographed and bound, and placed in the hands of all elementary teachers. This syllabus acquaints the teacher with the general outline of work and problems to be covered for their respective grades. This work was prepared by a committee of teachers and checked by a committee of teachers, together with the Superintendent, Assistant Superintendent, and Supervisor. A syllabus of this kind is not static but changing, and this will afford an opportunity for initiative on the part of any teacher in the school system to make recommendations for improvements.

In September, 1928, three additional special classes were organized to take care of children of low mentality, that is, classes for mentally defectives,—one at the Willard, one at the Lincoln, and one at the Daniel Webster. Five classes for mentally defectives are now established in Quincy.

In addition, an over-age, or ungraded class, was organized in each of the three new Junior High Schools,—North, South, and Quincy Point. These groups of children are not of the moron type, but through lack of opportunity, environment, and other causes, are too old to be held back in an elementary school and do better work when mingling with children of their own age. These are the first classes of their type organized in a junior high school. The classes are of great value to the pupils at the same time relieving the regular class room teacher of a great responsibility. In the ungraded classes, the girls and boys are doing ten hours shop work a week and twenty hours of class room directed recitation work. The scheme has proved beneficial.

In the elimination of the mid-year promotion, naturally, some classes were left on the way which necessitated establishing teacher-

coach groups in several centers. Five of these were established during the year,—one each at the Thomas B. Pollard, John Hancock, Massachusetts Fields, Willard, and Wollaston schools. In addition to organizing the elementary schools on the yearly promotion basis, eleven teachers have been employed to take care of children needing special attention in some way. There is still a great need for teachers of the special class or mentally defective group in order to relieve the regular class room teacher.

We have succeeded in intensifying the physical education program proposed a year ago. A teacher was employed to take care of the boys in the Senior High School, and another teacher for the girls. Physical education, at least one period a week, has been made compulsory for all pupils attending the High School.

The activities of both Junior and Senior High Schools have been organized and a unification of inter-class as well as inter-scholastic athletics has been conducted. The physical education program is looking up. It needs further direction and stimulation to the point of encouraging a greater number of children to enter the various sports under proper supervision which is offered them after school hours.

An additional nurse was appointed and took up her work in September. This gave us the much needed assistance in the health department. It means better health service at a time when it is greatly needed.

The dedication of the Quincy Point Junior High School on Monday evening, October 8, 1928, was the culmination of a splendid piece of work well done both by the School Committee and the City authorities. It was the third Junior High School to have been dedicated in the City of Quincy within an interval of twenty months, which speaks well for the educational growth of the city. These buildings helped greatly to relieve the congestion of the city schools. Present at the dedication on October 8 were members of the present School Committee, several former Committee members who had served in past years, members of the present City Council, the Commissioner of Public Works, His Honor, Mayor McGrath, and other distinguished guests. A splendid dedicatory program was given after which the Quincy Point Junior High School building was thrown open for public inspection. Two new schools, one located at the corner of Agawam and Assabet Roads, Merrymount, and another at Pelican Road, Adams Shore, are under construction. The buildings will have ten class rooms each, principal's office, library, and other modern features belonging to the elementary school, and so planned that either may be converted into a junior high school. These two building contracts were awarded on September 13, 1928 and work was begun at once. The two buildings are now under roof and will be ready for occupancy in September, 1929.

These two buildings will relieve the situation which has been, indeed, a very difficult problem for the school officials as well as the parents of this district for the past five or six years. It will not only relieve the Coddington School but in turn will give partial relief to the over-crowded Senior High School by permitting the use of some of the rooms in the Coddington School for High School classes. They are the first two buildings which were included in the five-year building program submitted by the School Committee to the City Council on December 27, 1927.

Preliminary plans are now drawn for a new nine-room building with auditorium at the Atherton Hough and the Montclair Schools, which were included in the 1928 program.

The School Committee has requested the Mayor to bring in detailed working plans for an addition to the North Junior High School and preliminary plans for a new Senior High School, both of which were a part of the five-year building program. All this shows the desirability of carefully planning new construction of schools which must come to all growing cities year after year.

Experience proves that every time the school building program lags or is side-tracked for other improvements, the city suffers. Schools become congested and sometimes finances are cramped in an effort to catch up with the demand for new schools. The schools are usually in the most wholesome condition when the school building program keeps pace with each year's increase in the school population.

On Monday, October 8, 1928, at 3:00 P. M. members of the School Committee, Supervisory staff, Superintendent, and relatives of the immediate family, assembled at the Adams School to unveil a tablet in honor of Miss Eliza C. Sheahan, who for more than 46 years was a faithful teacher in the Adams School.

Simple exercises were held in her honor and a beautiful bronze tablet was unveiled bearing the following inscription:

ELIZA C. SHEAHAN
A FAITHFUL TEACHER FOR
MORE THAN 46 YEARS
IN THE ADAMS SCHOOL
SEPTEMBER 1865—JANUARY 1912

Henry Beston Sheahan, author and lecturer, and his brother, Dr. George M. Sheahan, nephews, spoke a few minutes in appreciation of the splendid tribute that the School Committee had paid their beloved aunt.

From the Adams School, this party proceeded to the Washington School where a delightful program was given by the children in that building and a tablet dedicated to the memory of Thomas B. Pollard who for many years was master of the Washington School and the Daniel Webster School. This bronze tablet bears the following inscription:

THOMAS B. POLLARD
A FAITHFUL MASTER
WASHINGTON 1887-1919
DANIEL WEBSTER 1917-1925

To those assembled, the following tribute to the memory of Mr. Thomas B. Pollard was read:

“Greetings to Those Gathered to Honor Mr. Pollard:

“There is a sincere desire in my heart to send a message to you upon this occasion. The two years I worked as Mr. Pollard's assistant at the Washington School were very happy ones. Besides being an able schoolmaster, Mr. Pollard was a noble, kind-hearted gentleman.

“I wish you girls and boys might have known Mr. Pollard as many of your mothers and fathers knew him. He loved children. So, always respect his name and your school, his school which he held very dear.

“And, I cannot pay tribute to Mr. Pollard without thinking of his three devoted friends and helpers, Miss Malone,

Miss Hatch, and Mrs. Humphrey. May their days be rich in blessings. Quincy, indeed, has been honored by four such lives.

‘Four things a man must learn to do
If he would make his record true:

To think without confusion clearly;
To love his fellow-men sincerely;
To act from honest motives purely;
To trust in God and Heaven securely.’

“These things our friend Mr. Pollard did faithfully.

SUE A. BISHOP,
Thomas B. Pollard School,
October 8, 1928.”

The Thomas B. Pollard School was named in his honor.

IT IS HIGH PRAISE INDEED TO BE HELD IN SUCH
ESTEEM.

Miss Teresa McDonnell, a faithful teacher in the public schools for more than forty years, retired in June, 1928. The Master and the teachers of the Willard School gave her a splendid reception before she left the building in which she gave so much of her life for those under her care. Many beautiful tributes were paid to her worth that evening. Miss McDonnell passed into the great beyond in September at a time when those who knew her wished that she might live a few years to enjoy the fruits of her hard-earned labors. But the ways of the Lord are beyond the comprehension of the finite mind, and so she passed with our hearts full of gratitude toward her and all that she meant to the children who had come under her wise guidance.

The schools sustained a great loss in the sudden and untimely death of Miss Elsa Schoshusen. It was my good fortune to be more closely associated in work with Miss Schoshusen than with the other teachers. It was my privilege to call the Principals, Supervisors and teachers together on April 23, 1928 at the Central Junior High School to make final arrangements to attend her funeral. At the close of the meeting I read this short tribute to her memory. I think it fitting that it should be incorporated in this report:

“Miss Elsa Schoshusen was unusually worthy of the position she held in Quincy,—Supervisor of Primary grades. Her work was always well planned, well directed and well done which was due to her personal equipment, her power to do and her insatiable desire to do the right thing.

“Her splendid character, her open-mindedness, her cheerfulness and her loyalty to those in authority is now a living memory to me.

“She was ever capable of inculcating into the minds of teachers who came under her supervision their real responsibility to the little ones,—the children. All this made for able leadership and devout courage which she so justly possessed.

“That happy disposition, under trying circumstances; that smile in the face of obstacles; that willingness to carry

on for the benefit of all the children under her guidance will ever linger with me.

"I feel grateful that it has been my good fortune to be associated so closely with such a noble Christian character, and trust her influence will go on and on and let me quote:

'Life's race well run
Life's work well done
Life's victory won
Now cometh rest.'

"May these few words bring a consoling thought to her many devoted friends."

The School Committee closed the elementary schools that all who desired might attend the funeral. The School Committee, Superintendent, Supervisory staff, Principals, and teachers attended the funeral at Somerville.

Resolutions by the School Committee and the Quincy Teachers' Association were sent to the families of the deceased in each case. Many letters of appreciation from individuals and from the staff and others gave unstinted praise of their faithful services.

THUS REAL SERVICE IS REWARDED BY HUMAN SYMPATHY AND HEART BEATS—THE APPRECIATION OF TRUE WORTH. SUCH TRIBUTES ARE RARE.

The Assistant Superintendent has reported for the State-aided, Academic Evening, Academic Summer Schools, and special classes. Because of the importance attached to these reports, they are given in full. Under separate headings will be found a short report of the Senior High School Principal, Supervisors and School Physician..

The Day Industrial School

The expenses of the Day Industrial School increased from \$46,096.65 for the school year 1926-1927 to \$50,782.70 for the school year 1927-1928. The increased cost was due to increases in salaries granted to the teachers, increase in the school enrollment and the purchase of new equipment. This cost, however, was reduced by the following amounts received by the city treasurer:

Tuition for pupils living outside of Quincy	\$4,890 00
Cash for products made by the school	1,532 84
Aid from the State of Massachusetts	19,366 77
Aid from the Federal Government	3,476 22
Miscellaneous Receipts	100 05
Total Receipts	\$29,365 88
Net Cost to the City of Quincy	\$21,416 82

It actually cost \$266.02 to educate each boy in the school but the cost to the city for each pupil was \$112.21.

The city further benefits from this school through products made for which no cash is received. The market value of the products made by the boys was approximately \$26,263.11, the value of the labor involved was estimated at \$12,906.62.

The courses offered, the number of boys enrolled and the growth of the school is shown by the following table:

YEAR	1923- '24	1924- '25*	1925- '26	1926- '27	1927- '28
Auto Mechanics	17	30	42	41
Electrical	39	40	36	36	38
Machine.....	33	42	37	34	40
Plumbing	18	42	37	38	36
Sheet Metal	20	16	18	19	21
Woodworking	75	70	70	65	80
Special	1
Total	185	227	228	234	257

* Entered New Building.

There is a very definite need of expansion in this school as the waiting list is steadily growing larger. Many Quincy boys are obliged to wait a year or longer before they can be enrolled in the school and very few boys are now enrolled from outside the city.

The state authorities advocate expansion through the addition of new departments rather than the enlargement of existing departments. That policy is sound for each year finds it more difficult to place the graduates from some of our departments, whereas there is a demand for new workers in trades which we do not teach. Quincy should increase the variety of trade instruction offered. For a relatively small outlay a Printing Department could be cared for in the basement of the Coddington School which would not only offer valuable trade training but would be of distinct advantage to the School Department in printing forms, reports, etc. To further increase facilities for trade teaching an addition to the present building would be necessary which would need very careful study in order that the shops be adapted to teaching the desired trade. The following are some trades not taught in Quincy at present but which are successfully taught elsewhere: Automobile Painting, Carpentry, Concrete Work, Forging, Painting and Paper Hanging, Printing, Upholstering, Masonry, and Plastering. Some one or more of these trades might well be taught to advantage in Quincy.

The Home Making School

This school suffered a great loss when Miss Caroline H. Wilson resigned early in the school year to accept a position with the State Department of Education. Miss Verna L. Clarke was made acting director of the school for the balance of the school year which gave adequate time to select a successor for Miss Wilson. After careful consideration, Miss Ruth C. Cowles, a graduate of Middlebury College and head of the Catering Department of the Fanning Trade School for Girls, Worcester, Mass., was elected director of the school. Miss Cowles assumed active direction of the school in September. Her enthusiasm and good judgment in handling the situation thus far indicates continued success of the school.

This school is growing and has practically reached the capacity of the present building. The average membership for 1927-28 was 47.87, an increase of 11%. The fall enrollment advanced to 61 with an average membership for the last four months of the

year of 56.16. The present building cannot adequately house more than 60.

The increased enrollment caused the total cost to advance from \$13,327.27 in 1926-27 to \$13,863.67 for 1927-28. However, the city treasurer received the following amounts because of this school:

Tuition for non-Quincy pupils.....	\$475 00
Cash received for work done.....	1,280 08
Aid from the State of Massachusetts.....	5,448 05
Aid from the Federal government.....	883 10
Miscellaneous receipts	8 97
Total Receipts	\$8,095 20
Net Cost to the City of Quincy.....	\$5,768 47

Although the total cost of running the school increased, the net per pupil cost was reduced by \$5.97 to \$120.50.

The success of "The Tiny Tot Shop" in the clothing department has led to the formation of a "Specialty Cake Shop" in the foods department. This shop is organized on a real shop basis and specializes in filling orders for "Bridge Party" small cakes and cup cakes. Over 20 dozen cakes were sold the first week the shop came into existence. Indications are that the girls will have all the orders they can fill.

The State Department requested that revised courses of study be sent in before November 1, 1928. As our teachers had been working on courses for the past year this school was one of the first to respond to the State Department's request. The teachers under the able direction of Miss Cowles are now organizing all courses on a "Unit" basis which will facilitate the individual progress of the pupils.

Three girls who graduated last year are attending the Boston Trade School for Girls and three are enrolled in the Senior High School. Never before have so many graduates decided to continue their education.

The Continuation School

The cost of running the Continuation School has been reduced to \$3,341.48 as compared with \$4,951.22 in 1926-27 and \$6,016.62 in 1925-26. The total cost has further been reduced by the following amounts received by the city treasurer:

Tuition fees	\$42 16
Cash for work done.....	32 94
Aid from the State of Massachusetts.....	1,422 36
Aid from the Federal government.....	471 01
Total Receipts	\$1,968 47
Net Cost to Quincy.....	\$1,373 01

This reduction, as that of last year, is due to the reduction of the teaching force with the director, Mr. Dana Clark, handling all the work for the boys as compared with two full time men in 1925-26.

In spite of a reduction in the teaching force the school is larger than many years in the past as is shown by the table below:

CONTINUATION SCHOOL ENROLLMENT

1920-1928, inclusive

	1919- '20	1920- '21	1921- '22	1922- '23	1923- '24	1924- '25	1925- '26	1926- '27	1927- '28
Boys . .	104	136	62	77	71	127	67	84	95
Girls . .	35	53	36	27	28	50	26	56	62
Total .	139	189	98	104	99	177	93	140	157

In 1927 the school register showed 8,988 hours of service, in 1928—11,860 hours, an increase of 2,872 hours or 31%.

In addition to the class and shop teaching the instructor is required to visit the pupils in their homes and while at work. The director emphasizes this phase of the work in his report as follows: "These boys and girls as potential citizens are already taking their places in the industrial work of the city. In many instances we have been able to place boys and girls in positions where their opportunities for service and personal advancement have been greatly increased. This has been accomplished largely through the personal contact of the instructor with the parents or employers.

"Great importance is put upon the proper placing and adjustment of the minor in and to his new environment—the working world. Employed in a wide variety of trades and occupations it becomes our duty to give these boys and girls practical instruction and guidance. We strive to help them help themselves become industrious, cheerful citizens. Our aim is to see that every minor, before he leaves, shall have found an occupation worthy of his ability, and that he has the proper attitude toward his home, his community and his employment."

The Evening Industrial School for Men

The Evening Industrial School for men had the smallest enrollment in 1927-1928 of any year since 1923-1924. The tabulation below shows the courses offered with the enrollment for the past five years:

DATA ON EVENING INDUSTRIAL SCHOOL REGISTRATION

Class	1923-'24	1924-'25	1925-'26	1926-'27	1927-'28
Shop Mathematics for Electricians .	No class	No class	No class	13	No class
Automobile Mechanics	No class	No class	24	26	20
Electrical wiring ..	16	33	45	31	No class
Drawing for Granite Cutters	11	No class	No class	No class	No class
Machine Shop Practice	27	25	21	19	12
Machine Drawing and Shop Mathematics	No class	No class	27	41	27
Plumbing	No class	39	52	46	35
Roof Framing	47	26	36	10	No class
Sheet Metal Drafting	45	25	29	33	20
Ship Blue Print Reading	No class	No class	No class	63	32
Totals.....	146	148	234	282	146

By state law only men engaged in the trade during the day which they wish to study at night may be admitted to state-aided evening industrial courses. The enrollment for 1927-1928 and this fall, which was again small, seems to indicate that the majority of men employed in the trades taught have received the benefit of the courses which we can offer. The fact that no one was enrolled in classes conducted in previous years does not mean no men applied for such instruction but that not enough applied to warrant starting a course. If no courses are established in Quincy, men qualified are entitled to attend the class they desire in the nearest community offering such work and Quincy must pay the tuition. The state will reimburse Quincy for one-half the amount. At the present time seven Quincy men are attending classes in the Boston Evening Trade School where the tuition is 15c per hour. It cost Quincy 20c per hour for every man registered in classes during the year so it is cheaper to pay the tuition of men to go to Boston than to maintain small classes in Quincy.

During the school year 1927-1928, \$1,621.63 was spent for Evening Industrial Education for Men. The following amounts were received by the city because of this form of education:

Tuition fees for men living outside of Quincy.	\$224 60
Registration fees	78 00
Aid from the State of Massachusetts.....	570 66
Aid from the Federal Government.....	208 82
Total Receipts	\$1,082 08
Net Cost to City of Quincy.....	\$539 55
Reduction in Net Cost of 1926-27.....	\$446 59

Evening Home Making School for Women

The total cost in conducting these classes was reduced from \$9,538.53 spent in the previous school year to \$8,648.77 and this sum was further reduced as follows:

Tuition fees for non-resident pupils.....	\$405 11
Aid from the State of Massachusetts.....	3,445 04
Aid from the Federal Government.....	803 85
Registration fees	429 00
Total Receipts	\$5,083 00
Net Cost to Quincy.....	\$3,565 77

The money was used to conduct forty-nine classes for women under the supervision of Miss Nellie A. Perry.

The tabulation below shows the distribution according to subject and a comparison with the past five years:

ENROLLMENT DATA

	1923-'24	1924-'25	1925-'26	1926-'27	1927-'28
Millinery	220	277	122	112	48
Foods	34	42	85	105	120
Dressmaking	591	619	730	726	751
Home Nursing	12	17	..	16	17
	857	955	937	959	936

The outstanding features in this work are the decline in the number of women attending millinery classes and the rise in the number taking lessons in foods.

For material with which to work the women spent \$13,016.88 and converted it into finished products worth \$33,837.84, increasing the wealth of the Community \$20,820.96. The actual economic gain which attendance in these classes brings is not their greatest value. However, in the words of the Supervisor, Miss Perry, "These classes tend to create a more satisfied household and a more attractive home. The teachers are doing a constructive piece of work and are conscientiously trying to instruct their pupils that good materials, good health, and good food are essentials to the well-being of every man, woman, and child."

The work for the school year was shown at our exhibition in the State Armory which was visited by many people from Quincy and surrounding towns. This one large exhibition with the work of all classes gathered under one roof made a much greater impression on the public than five small exhibitions.

Americanization Work

For several years the Supervisor of Americanization Work, Miss Nellie A. Perry, and her corps of teachers have been interpreting America and American ideals to our alien friends. The table below shows the number of classes with the enrollment in each type for the past five years:

Type of Class	1923-'24		1924-'25		1925-'26		1926-'27		1927-'28	
	No. of Classes	Enrol-ment	No. of Classes	Enrol-ment	No. of Classes	Enrol-ment	No. of Classes	Enrol-ment	No. of Classes	Enrol-ment
Evening Classes	15	287	13	297	14	326	13	304	12	305
Factory Classes	4	98	5	144	6	109	4	66	7	150
Home Classes	7	68	6	45	7	41	8	55	7	38
Club Classes	8	150	3	48	3	37	1	15	2	31
Totals	34	603	27	534	30	513	26	440	28	524

In the first years of the work it was often necessary to organize classes in the club rooms of foreign groups in order to get the attendance of some people. Today the club classes have nearly disappeared which is a forward step. When the foreigners of one land mingle with those of other lands, under trained teachers in a real American environment, their understanding of each other and American institutions is more rapid.

In the school year 1927-1928 \$4,967.06 was spent in Americanization work but the State reimbursed the Quincy treasury \$2,254.53 making the net cost \$2,712.53.

Twenty different nationalities were represented in the classes. When the work was new a large group could not read or write in any language. During the past year there were only eighteen who were illiterate at the time of enrollment in classes.

Many organizations and agencies have assisted in the work—the co-operation of the Quincy Federation of Women's Organizations and the Public Library are worthy of special mention.

An unusual part of the year's work is described thus by Miss Perry: "The outstanding event of the year was the Pilgrimage to Washington. Quincy had forty-five of the twelve hundred who made the never-to-be-forgotten trip. One of the greatest tributes to all nations was paid when we stood at the grave of the Unknown Soldier and saw the beautiful wreath placed thereon by four of our number. Nationalities were forgotten. All were friends bound together in one common brotherhood. Those of us who were citizens were inspired to better citizenship and those who were not were inspired to become true and upright citizens in this, our Country, the United States of America."

The Evening Academic School

In the fall of 1928, 347 adults enrolled in the evening academic school which meets three evenings per week. The work for which they enrolled with a comparison with the past five years is shown by the following table:

Subjects	1924	1925	1926	1927	1928
Advanced Bookkeeping..	20
Bookkeeping	86	82	83	79	47
Business Arithmetic.....	90	100	92	119	69
Business English	164	178	128	191	109
Penmanship	54	96	55	89	44
Elementary Stenography.	186	166	165	142	103
Intermediate Stenography	18
Advanced Stenography	24	32	36
Elementary Typewriting.	182	235	215	194	142
Advanced Typewriting	36	37
Mechanical Drawing	182	87	92	69	42
Grammar School Subjects	18	11	23	..	21
Algebra.....	..	13	49	35	..
Cultural English.....	48

During the fiscal year of 1928, \$2,501.64 was used for evening school instruction and for free evening gymnasium classes. Maintaining free evening gymnasium classes is a new departure for the School Department. In the past a few women have participated in gymnasium classes organized privately and for which they themselves paid for the instruction with the school department furnishing the gymnasium, light, and heat. In the fall of 1928 the school department advertised free evening gymnasium classes on the same basis as other evening school work. As a result 230 women and 28 men registered and classes were formed as follows:

North Junior High School—	2 classes for women
South “ “ “	1 class for women and 1 for men
Senior High School	2 classes for women

These evening gymnasium classes meet once a week for two hours under the direction of trained instructors and will probably be continued for about twenty weeks.

It will be noted that all the academic evening classes are smaller than in past years. This is not altogether due to chance. In the past the school has been bothered by the enrollment of many young people whose purpose was frivolous. This fall greater care was taken in registering and it was made clear to all applicants that only students with a serious purpose were desired. Our registration was smaller but it is one of the best evening school groups ever enrolled.

The evening academic classes as in past years are largely commercial in nature and will probably so continue. The principal, Mr. Charles B. Thomson, reports that a demand is increasing for a course to help prepare for Civil Service Examinations. It is hoped that enough students will respond to organize such a class next fall.

The Academic Summer School

The Summer School of 1928, with 552 pupils enrolled, requiring the services of 18 teachers and 3 principals, was the largest in the history of the school system. To care for the summer pupils for six weeks it cost the city \$2,860.26 or \$5.67 per pupil—less than 19c for each pupil per day. The table below shows comparative data for the past five years:

DATA ON ACADEMIC SUMMER SCHOOL

Grades	Year	Total En-roll-ment	Average Mem-ber-ship	Per Cent Daily Attend-ance	Total cost	Cost per Pupil
VB to VIIIA inclusive	1924	405	340.40	95.60	\$2,187 82	\$6 42
	1925	375	334.40	97.90	\$2,153 99	\$6 44
	1926	465	406.59	96.97	\$2,141 55	\$5 27
	1927*	423	394.46	98.48	\$2,336 71	\$5 92
IV-VIII	1928	552	504.89	96.88	\$2,860 26	\$5 67

* Summer School maintained for but 5 weeks.

The function of the Summer School varied somewhat from that of past years as nearly half of the pupils were bright pupils recommended by teachers and principals for summer study with the hope that thereby their progress through school could be accelerated. This meant extending the subjects taught and allowing the accelerated group to take four subjects rather than two as in past years.

During the first week every pupil was given the Ayres-Burgess Silent Reading Test P. S. I and the Woody-McCall Mixed Fundamental Test in Arithmetic Form I. In the last week of school the pupils were retested with the Burgess Silent Reading Test P. S. 2 and the Woody-McCall Arithmetic Test Form II. The August test results showed that nearly every pupil had made commendable improvement as the grade medians, which were below the norms in July, were in every case equal to or better than the regular grade norms. The test further showed that the accelerated group justified the judgment of the teachers as they progressed at a faster rate than the others. In July the accelerated group had lower scores than the retarded group but in August the median grade scores of the accelerated group were better than those of the retarded group.

Of the pupils enrolled, 258 were in the accelerated group. Of these, 45 or 17.4% left before the end of the term; 21 or 8.1% were not recommended for advanced standing and 192 or 74.5% were recommended for double promotion. Two hundred and ninety-four pupils were trying to regain a lost promotion or remove a condition. Of these, 37 or 12.6% left before the close; 19 or 6.4% failed and 238 or 80.9% were recommended for promotion.

Reports were received in November on 450 pupils whom the Masters had placed in advance grades because of summer study. Of these, 211 were accelerated pupils of whom 128 or 60.6% were doing passing work in all subjects; 46 or 21.80% were failing in one subject; and 37 or 17.5% were failing in two or more subjects. Two hundred and thirty-nine pupils were those who had failed to be promoted in June or were conditioned in one subject. Of these, 133 or 55.6% were passing in all subjects; 50 or 20.9% were failing in one subject; and 56 or 23.4% were failing in two or more subjects.

The type of school work done in the fall by summer school students seems to justify the summer school economically. After observing summer school pupils for three years I believe those children are more contented, happier, and healthier because of summer school attendance.

Special Classes

The proper education of mentally retarded school children has been greatly helped by the establishment of three new Opportunity Classes, bringing the total number of such classes to five. Furthermore, with overage classes in three of the Junior High Schools it is possible to there help many of the mentally retarded children of adolescent age.

A careful examination of retarded children revealed the fact that we now have 153 children three or more years mentally retarded and 16 who will be before they are fourteen years of age. Seventy-six children are in Opportunity Classes of the Elementary Schools and 23 children, three or more years retarded, are in Overage Classes of the Junior High Schools. An Opportunity Class for the children of the north end of the city should be established as soon as a teacher can be secured. If the opening of the new schools at Merrymount and Adams Shore makes it possible to have a room, a class should be opened next fall in the Coddington School.

One of the greatest difficulties in the organization of classes for mentally retarded children is finding teachers qualified in every way to teach such children. Massachusetts has taken several forward steps in the training of teachers for this difficult task but is finding it hard to get young women of the proper background to undertake such training. At present many young ladies with normal training but unable to get places in the regular grades are taking extra training to teach backward children, thus hoping to obtain a position. They do this not because they are specially fitted for it or love to teach backward children but because the demand for such teachers is greater than the supply. During the spring of 1928 the entire state was canvassed to obtain three teachers. Many teachers whom we visited did not have the necessary qualifications to teach in Quincy. Some that did seem satisfactory wished more than Quincy could pay. At present no definite understanding has been reached in regard to the maximum salary which a teacher of mentally retarded children may earn. I believe that the maximum for this work should be placed high enough for Quincy to draw the best teachers to be found.

Under-age Pupils

In the fall of 1928, 36 under-age pupils were tested at the request of their parents. Sixteen received a mental rating which justified admitting them to school, 20 were refused admittance. Of the sixteen who were admitted to school their teachers report as follows:

Doing work of very high quality	1
“ “ “ good “	6
“ “ “ average “	7
“ “ below “	2

Of the two doing poor work one child has been absent because of illness one-half of the time.

An analysis of the ages of children examined indicates that in most cases only those children one or two months under-age were successful in attaining a mental age sufficient to justify admitting them to school. If the policy is to be continued of admitting under-age children, the age of children who may be examined should be limited. At present all children who become six years of age on or before the thirty-first of March may enter grade one. It is recommended that all children who become six between March 31st

and June 1 may be examined, if their parents desire, and if the mental test justifies it, may be admitted to school.

REPORT OF THE HIGH SCHOOL PRINCIPAL

MR. JAMES N. MUIR, *Superintendent of Schools, Quincy, Mass.*

Dear Mr. Muir:

Herewith I have the honor of handing you my sixteenth annual report for the Senior High School. Comparative statistics for enrollment and membership are as follows:

	1926	1927	1928
Number enrolled	1,524	1,594	1,691
Membership at date.....	1,480	1,552	1,642

It has been necessary since the opening of school in September to require pupils of the entering class, desiring to have typewriting, bookkeeping and other subjects of the Commercial Curriculum, to attend classes in the afternoon. An increase of numbers in January will require a further extension of afternoon classes and the opening of school in September, 1929 will probably find the school definitely organized on a complete two-session system as existed before moving into the new building.

During the past year there has been a notable achievement in the thorough reorganization of the school curriculum. One feature of this reorganization has been the establishment of a complete program of physical education including physical training for every pupil in the school, unless excused by a physician, and a comprehensive program of athletics, both competitive with other schools and interclass, with an adequate corps of competent coaches. To carry on the work in physical training, a full time instructor for boys and another for girls have been provided. More detailed information regarding this work will be found in the report of the Supervisor of Physical Education.

Another feature is the reorganization of the program of studies particularly in the Commercial Curriculum. In this Curriculum, the work is differentiated after the tenth grade to allow pupils to specialize in accounting or stenographic lines, if they wish, or a general clerical curriculum is provided for the large number of pupils who will probably not make use of the technical commercial subjects such as stenography or accounting after leaving school. Such subjects as Business Organization, Office Practice and Commercial Law and Economics have been introduced to broaden and enrich the Commercial Curriculum. The study of Problems of Democracy is required of all pupils except those preparing for college, and World History has been added to the list of social studies.

The Manual Arts and Household Arts Curriculums have been retained but with increased requirements.

The College Preparatory, Technical and Normal School Curriculums have been consolidated in the Preparatory Curriculum with opportunity for as wide a range of studies as will be accepted for admission to higher institutions of learning.

A General Curriculum has been added to the program where a pupil may have the widest possible choice of subjects and follow

his own interests almost completely always, it is expected, under proper guidance.

In all curriculums the common required subjects are English and Physical Education throughout the course and a year's work in American History and Government. In the interest of better scholarship, the number of points required for graduation has been increased from 72 to 80 and the grade for passing has been raised to 65.

Scholarships were awarded to graduates last June as follows:

Wollaston Woman's Club Scholarship to Mary L. Gassett, who entered Simmons College, and Mary L. Widlund, who entered Boston University, College of Practical Arts and Letters.

Quincy Women's Club Scholarship to Anna M. Leahy.

Atlantic Women's Club Scholarship to Catherine H. Ryan.

Rotary Club Scholarships to Donald B. Gilman, who entered Massachusetts Institute of Technology, and Franklin C. Davis, who entered Boston University, College of Business Administration.

The Washington and Franklin Medal for excellence in American History was awarded to Anna M. Leahy.

Besides the pupils mentioned in connection with scholarships, several other members of the January and June graduating classes have entered college. This brings up the constantly perplexing and misunderstood question of admission to college. The fact needs constant repetition that there are only two methods of admission to the New England classical colleges and technical schools; examination and school certificate. The certificate implies a high grade of work on the part of the pupil, particularly in the later years of his course; and the examinations are those set by the College Entrance Examination Board which are uniform for all colleges. Harvard, Yale, Massachusetts Institute of Technology, Boston College, Holy Cross, Smith, Wellesley, Mount Holyoke and Wheaton require examinations for admission while the others will accept a certificate from the principal of a preparatory school instead of examination. It should be stated that an enormous number of young people apply for admission to these colleges every year and of course only a part are accepted. So great a problem of selection has been put on the colleges that some of them have made it a matter of competition and admit only those having the highest grades in examinations or the highest preparatory school records. The Massachusetts State Normal Schools in line with other higher institutions of learning are adopting this latter method of selection. The College Entrance Examination Board examinations are intended to be a thorough test of the candidates' knowledge of the various subjects as well as of their power of reasoning. So searching are these that, according to the report of the Board, only a little more than half of all in the country who take the examinations pass them. We have been able to maintain this average at least and have in college many graduates of our school who are maintaining very creditable standing as evidenced by reports to this school from the colleges. The following will give an idea of the graduates who entered college in September:

3	passed	C.	E.	E.	B.	examinations,	entered	M. I. T.
1	"	"	"	"	"	"	taking	fifth year in pre-
								paratory school.
1	"	"	"	"	"	"	entered	Princeton.
1	"	"	"	"	"	"	entered	Radcliffe.
1	"	"	"	"	"	"	entered	Boston College.
1	"	"	"	"	"	"	did not meet complete re-	

- quirements for Harvard,
 entered Brown University
 by certificate.
 3 failed one examination each, taking fifth year in pre-
 paratory school.
 3 failed several examinations, entered schools other than
 originally intended.
 9 members of 1929 classes took a total of 27 preliminary exami-
 nations in which there was a total failure of 5 examinations.
- 1 entered Boston College by examination.
 2 entered Boston University, College of Liberal Arts by certi-
 ficate.
 1 entered Tufts College by certificate and examination.
 1 entered Wheaton College by certificate.
 1 entered Emmanuel College by certificate.
 4 entered Simmons College by certificate.
 12 entered State Normal Schools by certificate or examination.
 30 entered Northeastern; Boston University, College of Business
 Administration or Practical Arts; University of New Hampshire;
 and other colleges.

The above is probably not a complete list but includes graduates concerning whom we have accurate information. This is a good showing considering the fact that ours is a general high school with a large majority of its pupils not intending to go farther in education, to which group the greater part of our effort must be given and not the much smaller group intending to go to college.

The school acknowledges the gift of a beautiful colored engraving of the Cathedral at Seville given in memory of the Class of 1878 which has been hung in the front vestibule of the building. Also, we acknowledge the gift from Mrs. N. S. Hunting of a radio set with all equipment which we hope to install in the auditorium for use in assemblies.

May I express to you and to the School Committee, in closing, our appreciation of the help we have had, both in kindly suggestion and in material resources so that our work has been made more pleasant and has had, we hope, a greater measure of success.

Respectfully submitted,

ERNEST L. COLLINS.

REPORT OF THE HIGH SCHOOL DEAN OF GIRLS

MR. JAMES N. MUIR, *Superintendent of Schools, Quincy, Mass.*

My dear Mr. Muir:

It is my pleasure to present to you the annual report of the work of the dean of girls.

In the past year those conditions which most peculiarly affected the work were, first, the change of our curriculum, second, the addition of a full-time physical instructor for girls, and third the increase in our enrollment. The change of our curriculum made the electives within the preparatory course more elastic, it broadened the business course, and it brought the long-sought general course.

My records show that within the past year at least 500 girls have had guidance from the dean's office on their program of study. In relation to our department of physical training, from April until June, I supervised the organization of some 80 girls in tennis. In September Miss Louise Baker, the teacher of physical training, relieved me of both the tennis and the hiking clubs which I had organized in the previous Spring. In the Emergency Room our records show that some 100 girls were treated for minor sicknesses, due in the main to breakfasts too hurriedly eaten, inadequate exercise, insufficient sleep, and unbalanced diet. Our girls very much need a class in hygiene in connection with their physical training.

The present double session makes a satisfactory social or club program impossible, and decreases the opportunity for afternoon pupils to take an active part in school life.

Social Program

The past year has seen some advance in the social program of the school. Four successful and largely attended formal dances were held. The football reception, for three years the least successful of our dances, has at last been replaced by the more dignified athletic assembly.

Seven clubs have been carried on in the activities of which girls participate. In addition, the Big Sister Club installation, a High School contribution made yearly to the city's poor, a Junior High School Day, and an all girls' Margaret Slattery assembly have been inaugurated.

Some work was done in the organization of cafeteria marshals. That work is prior to the growth of a student council, to be begun at a more opportune time.

The School's social program was for the first time compiled in advance as a school calendar. This will lead to a needed readjustment of school activities. A file record of student participation in school activities has been started. This study will lead to a limitation and distribution of membership.

A social program for our faculty has been inaugurated. In the past year there have been two organized socials and three teas for the entire faculty body.

Advising

Advising is the main work of the dean. Already I have mentioned the fact that I gave at least 500 girls advice about their programs in the past year. I have dealt with some 20 disciplinary problems. I have dealt with about 60 girls who were irregular in attendance. In personal conferences with about 100 girls I have given vocational advice.

Failures

Next, the adjustment of failures is a pressing problem. Our academic failures seem to increase with our increased enrollment. In the past year, in the incoming class, the dean has had a personal conference with each girl who received a failure mark, two group conferences with study habits as the subject of discussion, conferences with other failure pupils, with their teachers, with parents. From this work some improvement in the standing of the pupils has been evident; some failure has continued.

Orientation

The orientation of the incoming class has been facilitated by program conferences with the girls, by the Junior High School

Day, by the Big Sister Club, by the five-week period assembly, and by the Mixer Party and the Shore Party for the girls.

Some closer organization of Junior and Senior High School guidance seems imperative.

Normal School Pupils

Normal School and College guidance have received special attention. In the past year the dean has explained the requirements in grades and subjects to each girl who declared her normal school intention. In an assembly for the girls and in a tea for the parents Miss Pope, Dean at Bridgewater, further explained the requirements and the opportunities of Normal Schools.

College Pupils

The dean has compiled a list of all girls declaring college intention. An advisor of each college has been assigned. In addition the dean has had some fifty conferences with girls about college requirements, and one assembly for girls interested in college opportunity. In general, the dean's office has become a place with which the girls are familiar, to which many varieties of need present themselves.

Attendance

The dean has co-operated with the sub-master in the follow-up of girls who are absent or who leave school. The result has been a hastened return in at least 30 cases and a delay in the pupil's leaving school in at least 20 cases.

Financial Aid

This work has led to some 25 home-visits. It has led to the continuation of an agency for afternoon and Saturday work for high school girls.

Seventy jobs have been distributed in the past year. Two homes were provided for needy girls. Twenty loans and gifts were extended from the fund so kindly provided by the women and the Women's Clubs of the city.

The need of a scholarship fund to enable boys and girls to remain in high school is evident.

Extra-Mural Work

The dean's extra-mural professional work has consisted in some 50 home-visits, the follow-up of the above-stated problems; in 6 speeches made to organizations in and near Quincy, that the work of the school might be better understood; and in professional service to the Massachusetts Deans' Association as chairman of the program; to the National Deans' Association as speaker at the convention, and writer for the Year Book; and to the Boston University course for deans as assistant lecturer.

In closing may I express my appreciation of the co-operation of the teachers and principal in the establishment of my work. To you and the School Committee I owe gratitude for the prevention of obstacles and for concrete aid to my office.

Respectfully submitted,

JOSEPHINE D. BAKER,
Dean of Girls.

REPORT OF SUPERVISOR OF MUSIC

MR. JAMES N. MUIR, *Superintendent of Schools, Quincy, Mass.*

My dear Mr. Muir:

It gives me pleasure to submit the following report for the music department.

With the cultural, ethical and social, as well as the vocational aim in mind, we are endeavoring to so present music in our public schools that every child may have an opportunity to develop his particular aptitude in music, whether it may be as a singer or a performer upon an instrument, or merely one of the larger group of appreciative and discriminating listeners.

Vocal music, including the correct use of the voice, music reading, and love for singing, is emphasized from the first grade through the senior high school grades—compulsory through the ninth, and elective in senior high. The fact that over seventy-five per cent of the senior class elect chorus work shows that the work is properly stimulated. Girls' and boys' glee clubs of selected voices have been formed in all junior high schools and public performance is encouraged. Operettas were given this year in two of the juniors and in the senior high school, and, following your suggestion, each junior high school is planning to produce an operetta during the coming year. The spirit established between the music department and the other departments of the school system makes the value of operettas a lesson in co-operation. Added to this is a marked value in the fostering and encouragement of young solo voices. In order not to lose sight of the higher musical interest in true choral work and artistic performance, the combined junior high school mixed glee clubs have just given in public concert a choral version of Sir Arthur Sullivan's "Pinafore" with the solo parts rendered by members of the clubs.

Music appreciation, as in previous years, is a part of the regular music work from the first grade through the ninth—motivated by the music memory contest in the grades and stimulated in the junior high schools by new records and a new text book. Elective courses in music appreciation and harmony are offered in the senior high school to those who become particularly interested in this type of work.

In the instrumental department there has been steady growth. Class instruction for all band and orchestral instruments is offered at twenty-five cents a lesson to any boy or girl from the fifth grade through the senior high school, and more than three hundred are taking advantage of this opportunity. This instrumental instruction each year produces a more evident and gratifying result in the school orchestras and band. A central grammar school orchestra with rehearsals on Saturday morning is open to any boy or girl in the grammar schools. Each junior high has an orchestra averaging fifty members and in the senior high it has been necessary to form two orchestras. Each year since the New England Music Festival and Contest was organized, the senior high orchestra has won a first or second prize in the contest between the orchestras of the larger cities of New England. The band is now assuming proportions great enough to warrant a training group next year as is the case now with the orchestra. An instrumental concert was given this year in which over five hundred children

participated, demonstrating the development of the instrumental work from the first year classes through the senior high school orchestra and band.

In closing, may I thank you for your co-operation, and may I express my gratitude to the school officials, the school committee, the teachers and the community for their encouragement in the music work. I wish also at this time to commend Miss Tuthill and Mr. Taylor for their loyalty and assistance.

Respectfully submitted,

MAUDE M. HOWES,
Supervisor of Music.

REPORT OF THE SUPERVISOR OF GRAMMAR GRADES

MR. JAMES N. MUIR, *Superintendent of Schools, Quincy, Mass.*

My dear Mr. Muir:

The continuity and unity of the past year's work has been somewhat broken because of the special effort attendant upon the elimination of the mid-year promotions in grades one to six. As a unit, the construction of the Multiple Response Tests was underway when the added work of regrading the pupils made it seem desirable and right to change the program of the Intermediate teachers. This change meant, in substance, the deferring of the construction and "try out" of the Multiple Response Tests in their grades for a semester.

In accord with the best educational thought of the Junior High movement, we believe it to be quite as important to know how to learn as what to learn. Taking this thought as their slogan, the teachers at the Junior High centers have been focusing their attention upon the factor of Supervised Study, which really means giving guidance in "the details of the learning process". Under such a plan of guidance, each lesson period includes an assignment—wherein the teacher explains definitely the work to be done independently—and the directed intensive or silent study of it. The teachers in order to provide for each pupil, as well as to create on the part of the pupil a "personal responsibility toward the work", are following Professor Hall-Quest's suggestion to divide the assignments into minimum average and maximum portions of work.

We feel that we are slowly approaching the desired goal of teaching how to study which is placing "the center of gravity of the school where it belongs—in the learner". Our hope is to send the girls and boys on with "the desire to know, to do and to be".

In closing, I wish again to express to you my sincere appreciation of your confident support and also to thank my co-workers—the principals and teachers for their splendid spirit of loyalty and co-operation.

Respectfully submitted,

HELEN MAUDE DELLICKER,
Grammar Supervisor.

REPORT OF THE SUPERVISOR OF DRAWING

MR. JAMES N. MUIR, *Superintendent of Schools, Quincy, Mass.*

Dear Mr. Muir:

I herewith submit my annual report of the drawing department in the public schools of Quincy for the year 1928.

The Quincy Point Junior High School was opened in September, making necessary the engagement of another full time art teacher. Miss Julia Rutledge, formerly Assistant Supervisor of Drawing in New Bedford, was selected for the position.

Each Junior High School in the city has a well equipped modern art room with a full time art teacher in charge.

The results of the contest for the Quincy Trading Post posters, conducted by the Chamber of Commerce, were gratifying. The poster of Herbert Crowley, Grade 8, Central Junior High school, was judged the best by the committee, and this poster was commercially reproduced and distributed throughout the city for the Trading Post. The posters of Clara Wallenberg, Grade 9, North Junior High School, and Reno Marini, Grade 7, Central Junior High School, were chosen second and third best. Three honorable mentions and fifteen special mentions were designated by the committee. These were divided among the Junior Schools and Point schools. The Chamber of Commerce awarded a sum of money to be used for the purchase of pictures for the Junior High Schools. These pictures were handsomely framed by the Industrial School and then hung in the various schools who participated in the contest.

At the present writing all the pupils in all the Junior High Schools are finishing posters for a "Safety First" campaign.

The addition last year of an assistant supervisor to the department has proven very satisfactory. Owing to the number of schools, the supervisor was able to visit each school but seldom. Now thanks to my assistant, each school receives a visit each month.

The children of the city continue to show enthusiasm and interest in their drawing work, and the teachers continue to give their hearty co-operation. I wish to take this opportunity to express my appreciation to them all, and also to the Superintendent for his help and kindly sympathy in the work.

Respectfully submitted,

AMY E. ADAMS,
Supervisor of Drawing.

REPORT OF THE SUPERVISOR OF PHYSICAL EDUCATION

MR. JAMES N. MUIR, *Superintendent of Schools, Quincy, Mass.*

My dear Mr. Muir:

I herewith submit the report of the Department of Physical Education for the year 1928.

The outstanding features in physical education for the year just closed are:

First—The completion of the Junior High School grouping with the opening of the Quincy Point Junior High School.

Second—Compulsory physical education classes at the Senior High School.

Third—The addition of three teachers of physical education.

The four Junior High Schools have programs which keep the gymnasiums busy. The teachers change buildings half way through the week so that boys classes are conducted in one building while girls are using the equipment in the other building. Two men and two women teachers are kept busy. This arrangement of teachers gives each pupil one fifty-seven minute period weekly. North and South Junior High Schools combine in this plan as do the Central and Quincy Point Junior High Schools.

In the Senior High School all pupils meet weekly for a forty-three minute period. This is too short a time to do effective work and we are looking ahead to the time when these classes may meet two or three times each week. This enlarged program necessitates two full time teachers of physical education.

With the coming of three new teachers this fall, the department now comprises six full time instructors of physical education with sixteen academic teachers assisting in after school activities. The group has organized a unit to be known as the "Physical Education Group".

All pupils at the Senior and Junior High Schools are given a medical examination before participating in gymnasium classes or athletics. These were given this year in co-operation with Dr. Drew, the School Physician.

I am glad at this time to express my appreciation to all who have co-operated in the physical education program.

Respectfully submitted,

WILLIAM H. WHITING,

Supervisor of Physical Education.

REPORT OF THE SCHOOL PHYSICIAN

MR. JAMES N. MUIR, *Superintendent of Schools, Quincy, Mass.*

My dear Mr. Muir:

I herewith submit a report of the health activities of the school department for the year, 1928.

The most important event of the year was the visit of the State Clinic for the purpose of examining the children of the Elementary and Junior High Schools of the city. This work was carried on according to the Ten Year Program for the Prevention of Tuberculosis among School Children, under the direction of the Division of Tuberculosis of the State Department of Health. A brief summary of the report of the State Clinic follows:—

Total number of children examined.....	6,938
“ “ “ contacts “	267
“ “ “ children given the Tuberculin Test.....	6,927
“ “ “ “ who reacted to this Test.....	1,985
“ “ “ “ X-Rayed	2,123
“ “ “ cases of Pulmonary Tuberculosis.....	4
“ “ “ “ “ Hilum Tuberculosis	90
“ “ “ “ “ Latent Hilum Tuberculosis.....	11
“ “ “ “ classified as Suspects.....	161
“ “ “ “ “ “ Negatives	1,857
“ “ “ children with Enlarged or Diseased Ton- sils and Adenoids.....	1,807
“ “ “ “ in need of Dentistry.....	3,613
“ “ “ cases showing indications of Heart Disease	61
“ “ “ “ of Malnutrition (Not including those found in the Positive and Suspicious Cases)	333

This extensive work began the third of January, and was completed the last of March. The work of this State Clinic was most successful, and will be a very valuable help to us,—not only to follow up the results, but also to carry on the work in the future.

We wish to thank the Commissioner of Health, Dr. Edmund B. FitzGerald, and also the nurses of the Health Department, for their splendid co-operation in this activity of the State Clinic. The nurses were in attendance every day, and rendered very efficient service.

After the State Clinic had finished its work, we checked up the pupils of the first grade not examined by the Clinic. A request was sent to the parents of these children for permission to give them the routine physical examination. By this method 252 girls and boys were examined, results recorded on the regular school card, and 94 notices of defects were sent to the parents.

During the month of September, a very definite program of physical examinations for the girls and the boys of the Senior High and the four Junior High Schools was undertaken. The results determined their fitness for the physical educational classes of the gymnasium. In this work, we co-operated with our Supervisor of Physical Education, Mr. William H. Whiting.

The physical examinations of the entering class of the Elementary Schools were also started in September. A review of the work shows that 1,161 pupils were examined at the request of the parents. Conditions of tonsils and adenoids, posture, and underweight were the most numerous. A total of 295 notices of defects was sent to the parents.

Certificates of Health, issued according to the Labor Laws, total 46, namely:

Form C {work all time }	21
Form E {work part time}	25

The record card for these examinations, recently adopted by the State Department of Labor, has been used in each instance. Age Certificates have been duly signed whenever necessary.

General inspections and recommendations are always a part of the routine work among the pupils of the schools, whenever they are referred by the nurses or the teachers. Conditions of contagion are carefully supervised at the time of appearance, and the necessary precautions put into effect to control the invasion as much as possible.

When school opened in September, we were very glad to welcome Mrs. Marie Ewing as "our new nurse". Her services were certainly needed by the department. When we stop to consider the steady growth of our school population, it seems as if it will be necessary to have another nurse, on account of the constantly increasing health work in our schools.

I wish to improve this opportunity to emphasize the efficiency of "our school nurses". They surely deserve the utmost commendation for their valuable services. Their devoted efforts most decidedly contribute to the success of the health program.

I also wish to express my appreciation of the advice and the support of our Superintendent, Mr. James N. Muir. It has been very helpful during the year.

It is worth while to stress the importance of the co-operation of the teachers. They are very necessary factors in this health campaign for the school children.

Finally, allow me to thank everyone who has so generously assisted in this year's program, for such united forces have made it possible for us to rally to the slogan, "Carry on".

Respectfully submitted,

MARIA E. DREW, M.D.,
School Physician.

CONCLUSION

The year 1928 has been an unusually busy one. The Superintendent has held regular monthly meetings with the principals of the different buildings. The principals in their respective buildings have held meetings with their teachers.

On April 4, the Superintendent called a meeting of all the teachers and principals of the elementary schools. The purpose for which it was called was to give his method of procedure on—How to Eliminate the Mid-year Promotion. This was the outstanding conference of the year.

Another series of meetings for the elementary teachers and principals were held in November to distribute to and discuss with the teachers and principals the syllabus. These meetings were helpful to all.

The School Committee has held its regular monthly meetings and several special meetings during the year. The important items of business have been chronicled by the Press and the outstanding items are given in the Committee Report in this volume.

All have given their time and talent for the best interests of the children of the City of Quincy. Much good has been accomplished by the combined efforts of all working to promote the progress and general welfare of the schools and the city.

I wish to express my appreciation to all the employees of the school system whose co-operation and combined efforts have made it possible to further the progress of the schools.

The public has been kept well informed of the school news through the columns of the Press for which I wish to express my appreciation.

I wish to express my appreciation to the Mayor and City Council for their consideration of the schools' needs and to the School Committee for their watchful helpfulness along so many lines. The manifest desire of each member of the Committee to promote the highest welfare of the schools makes it a satisfaction to serve the city.

Respectfully submitted,

JAMES N. MUIR,
Superintendent of Schools.

APPENDIX A

STATISTICAL DATA

1. Financial Statement for the Fiscal Year Ending
December 31, 1928

I. REGULAR SCHOOLS

Appropriated by City Council.....	\$994,340 00

APPENDIX B

LISTS OF GRADUATES

1. High School

(a) JANUARY, 1928

Julia Mary Abate	Philip Fabrizio
Ruth Dorothy Anderson	Edith Luppold Fahey
Anna May Ardissino	Harrison Fisk
Edith Irene Backman	Margaret Eleanor Fitzgerald
Olive Cecile Baker	Ethel Fleishman
Elizabeth Ida Baram	Doris Whitney Folger
Esther Barron	Margaret Elizabeth Frew
John Robert Bartlett	Charles John Gabriel
Louise Clyfton Bartlett	Walter John Galvin
Ruth Hutchison Bartlett	Katherine Ellen Gerrior
George Hamilton Bell, Jr.	John Lawrence Gizzarelli
Catherine A. Bettini	C. Leonard Goldbranson
Robert Alexander Bissett	Charles Edward Graf
Dorothy Bone	Francis Joseph Granahan
Gertrude Elizabeth Bruton	Lorimer Arbury Graves
Claudia Frances Bryant	Robert Greenhalgh
Priscilla Louise Buckwell	Francis M. Griffin
Eleanor Marr Bugel	Joseph Francis Grogan
Rosamond Bugel	Marie Frances Hackett
Dorothy Helen Butman	Alexander Harding
Marion Josephine Cain	Ruth Louise Hayden
Marion Elizabeth Cameron	Rachel Elizabeth Henrikson
Eva Castleman	Loretta Gertrude Holden
Edna Mae Catarius	Genevieve Therese Hutt
Curtis O. Cedarstrom	Viola Linea Hyttinen
Kathryn Chamberlain	Gosta Algot Johnson
Arthur Howard Chapman	John William Johnson
Carolyn Chandler Cherrington	Sigrid Irene Johnson
Ralph Christian Christensen	Elizabeth Neeb Kinghorn
Victoria Louise Cislighi	Emma Madeline Labadie
Louis Edward Connors	Philip Alfred LaBrecque
Ruth Agnes Corbin	Mary Bethune Laing
Donald Harris Crotty	Anselmo Leone
Alice Marie Cullman	Robert Edward Luce
Catharine Leonore Curran	Lorna Margaret McBeth
Hazel Linnea Dahlberg	John Edward McGinty
William P. Daly	Mary Margaret McGuinness
Ronald N. Davidson	Carol Winifred McKim
Charles Herbert Deans	Stanley McLeod
Gertrude Mary DeCoste	Eloise B. MacWilliams
George O. Deehan	Rose Cecelia Magee
Dorothy Edna Denneen	Aura Marini
Gilda M. DiBona	Mary Ellen Mattie
Marguerite Marie DiBona	Kenneth Robert Mitchell
Charles Djerf	Margaret C. Mitchell
Clara Pearl Drew	Margaret Mae Morrison
Robert Dunham	Lucille Ethel Morse
John Ring Dunphy	Ruth Marie Nelson

Helen Katherine Nover
 Arthur John O'Brien
 Kent M. Ogilvie
 Lucy D. O'Malley
 Harry Pavan
 Ruth V. Pelto
 Henry Arthur Phillips
 Eino Isaac Pitkanen
 Irene Virginia-Louise Ponti
 Ernest Purpura
 Enes Quintiliani
 Joseph Reardon
 Robert Aubrey Reardon
 Catherine Veronica Reddy
 Stella Marie Rizzi
 Hobart Krum Robinson
 William Rossing
 Eveline Annie Rowe
 Marjorie Kathleen Russell

Ida Frances Schwartz
 Samuel David Schwartz
 Mary Shangold
 James P. Sharkey
 Elinor Louise Shorter
 Alan William Smith
 Gladys Ann Smith
 Ingrid Linnea Tapper
 Bertha Alden Thayer
 Estelle Audrey Thomas
 Mildred Viola Thomas
 Winfield Scott Tolman
 Walter Edward Vaughn
 Josephine Catherine Vergobbi
 Eino Axel Waisanen
 Barbara Mae Welch
 Mary Louise Widlund
 Wilner Henry Wyman
 Robert Angelo Zottoli

(b) JUNE, 1928

Aili Wilhelmina Aalto
 Stanley Deane Alger
 Evelyn Elizabeth Allen
 Corinne Gertrude Anderson
 Ellen Anne Anderson
 Kathleen Bonie Anderson
 Mabelle R. Anderson
 Goldie Applebaum
 Dorothy Artis
 Mary Teresa Aulbach
 Margarette Elizabeth Avery
 Mary Elizabeth Balentine
 Charlotte Balfour
 Jeanne Balfour
 Marjorie Louise Barron
 Stanley Myron Bennett
 Edward S. Billman
 Arthur Thomas Bishop
 Carolyn Ada Blanchard
 Dorothy Helen Blaney
 Cecelia Boyd
 Helena Dorothy Bradley
 Elizabeth Ruth Brown
 Florence H. Brown
 Gladys Kinloch Brown
 Josephine Mary Brown
 Helen Frances Bryan
 Kathleen L. Bryan
 Margaret Rose Buckley
 Charles Burg
 George Edward Burke
 Miriam Hadlock Cahoon
 Estelle Marie Calabro
 Lillian Rita Calhoun
 Frederick John Calnan
 Mildred Louise Calnan
 Carl Alfred Carlson

Carl Stanley Carlson
 John Dana Christian
 Rachel Haskell Closson
 Eleanor Catherine Coldewy
 Ruth Louise Collagan
 Elizabeth Gertrude Collins
 William Arthur Connor
 John Arthur Conroy
 Mary Estelle Cook
 Norman Ellis Copeland
 Betty Ellen Costello
 Elliott S. Cox
 Alice Margaret Crawford
 Gilbert Lewis Crofts
 Dorothea Loretta Cullen
 Ruth Hester Cushman
 Kathleen Marie Dalton
 Franklin Chapin Davis
 Alice Margaret Dewey
 Margaret Mary Dewey
 Forrest Page Dexter, Jr.
 Raymond Arthur Donovan
 Ernest Lawrence Donovan
 Thomas Edward Duffy
 Helen Livingston Duncan
 Vincent Stone Duncan
 Elsie Burton Eagles
 Neil Eaton
 Anna Barbara Eckl
 William Borden Eddy
 Leslie MacLeod Edmonston
 Clementine Hallett Edwards
 Wilho O. Eko
 Doris Evelyn Ekstrom
 Merle Harris Eldridge
 John C. Erickson
 Martha Lillian Ericson

Winnifred J. Erickson	Elizabeth Lawrence
Mary Ann Falconer	Anna Marie Leahy
Geraldine Margaret Falvey	Olive Winifred Lennon
Anna Farrell	Enni Elizabeth Leppala
Geraldine Irene Finn	Louis Adam Leveque
Albert Dean Fish	Julius Levowich
Helen Claire Flaherty	Clara Irene Linder
Elizabeth Allison Folger	Edward Roland Loftus
Rudolph E. Fornell	Ruth Minard Lothrop
Ethel Grace Foster	Minnie Luciani
Marian Esther Fowler	Elgie Ethel McAskill
Charlotte Gertrude French	William Morrison McCombs
Donald Walker Fuller	Wm. Thomas McConarty
Theresa Gacicia	Jennie C. MacDonald
Josephine Mary Galante	Margaret E. MacDonald
Mary Louise Gassett	Robert MacDonald
Henry Gesmer	Margaret L. McGrane
Donald Bertram Gilman	Robert James MacGregor
Henry Lawrence Gilpin	Robert Muir MacGregor
Eleanor Iris Golden	Jas. Warmington MacLean
Robert Louis Goodman	Laurence Shirley MacLean
Irving B. Grant	Gladys P. MacPhee
Albert Melvin Grass	George A. MacLennon
Nissie Grossman	Florence C. MacPherson
Anne Ruth Hagopian	Elizabeth Jane McPhillips
Charlotte Elizabeth Hall	Grace Glinton Magura
Esther Hallgren	Eunice Mary Marden
Mary Margaret Halloran	Aune Mirdja Marin
James Richard Hanlon	Charles Henry Martin
Hurlburt Roy Hartshorn	Lillian Elvira Mattson
Enid Lee Harvey	Robert Maurice Mattson
Edith K. Haslett	Lincoln Pierce Mendoza
Frances Woods Haslett	Dorothy M. Meyer
Hilda Helen Heikkila	Miriam Doris Milligan
Ethel Carol Heim	Lotta Crowell Moorhead
Fred Howard Hersey	Francis James Moriarty
James Gass Hillock	Esther Atwood Morrison
Donald Stephen Hirtle	Margaret T. Mullarky
Carson Wilbur Hunt	Evelyn Rita Murphy
Irving Stanton Hunter	Elinore Murray
Paul Theodore Hunter	Ida Musette
Clarence Henry Hurst	Warren Dove Nichols
Walter Seneca Hyde	Pauline Elaine Norrie
Vivien Leslie Hyland	Alfred George Odermatt
Mary Magdalene Infascelli	Joseph Osborne
Signe Elvira Johnson	Yvonne Ottina
Mary J. Joyce	Edith B. Paige
Doris S. Kapsis	Dora Elizabeth Palmer
Mary Margaret Kateon	Frances Miriam Palmer
Hyacinthe Steele Kelcourse	Virginia Claire Peck
Russell Lawrence Kelcourse	Eleanor Eva Peterson
John William Knowles	Robert Daniel Phillips
Theresa Virginia Kroesser	Dorothy Quincy Pinel
John Frederick Kuhlberg	Eleanor Frances Pitts
Sarah Kurlansky	Helen Lorraine Platner
Benjamin Kurtzman	Louise Frances Pray
Edith Laine	Robina Purdon
Walter Henry Lane	Elmer Allan Rajala
Esther Chilton La Tour	Sidney William Rappaport

Emerson Augustine Read	Jeanne Helena Steinbrenner
Carol Agnes Resell	Alice May Stevens
Katherine Bernadette Riley	Sara Stone
Kenneth Howard Riggs	Kathleen M. Strachan
Marie T. Risku	Joseph Suk
Evelyn Marguerite Rood	Louise Geraldine Sullivan
Donald Albert Ross	Mary Alice Sullivan
Frank J. C. Ross	Herbert Sussman
Thomas Lorne Ross	Albin Wm. N. Swanson
Lillian Jean Rougvie	Leo Sternberg
Catherine Helen Ryan	Windsor L. Taliaferro, Jr.
Carol Gladys Sargent	Dirce Alice Tamborini
John William Savage	Florence Mildred Tatro
Earle Richard Sayles	Norman Ainsworth Thacher
Elizabeth Sayles	Dorothy Mae Thomas
Eleanor Mary Schofield	Margaret F. Thompson
Priscilla Grant Schroeder	Florence Marie Tierney
Doris Annie Scott	Arthur Trubano
Richard R. Scott	Winnifred L. Turner
Leonora Frances Sferruzza	Max Turok
Donald Gordon Shaftoe	Katherine B. Walker
Sadye Zelda Shatz	Ruth Olive Wallin
George Wallace Sherman	Ina May Walls
Joseph Shuman	Mary Priscilla Wastcoat
Margaret E. Slavin	Elizabeth Wells
Alexander Smith	Mary Catherine Welsh
Ellsworth Nelson Smith	Florence Ann White
Laura A. Smith	Richard Berkley Whitman
Marjorie Alma Smith	Nathalie Whittam
Norman Peter Smith	Raymond Haley Whittum
Marion Louise Smollett	Helen Vieno Wilander
Kathleen Madeline Smyth	Lillian Frances Wirtz
Arthur F. Spear	Robert Blake Wood
Richard Follett Spear	Lois Aldine Wright
Sidney Albert Standing	Ada Blanche York
Gladys Lydia Starratt	Maurice Zack
Benjamin Stein	Evelyn Irene Zinck

2. Graduates from the Home Making School, June, 1928—17

Florence A. Cummings	Alice J. Langton
Margaret E. Cummings	Emily C. Lee
Ethel M. DeLorme	Eleanor I. Porter
Josephine E. DiCesare	Minnie M. Ricca
Myrtle L. P. Ellis	Marguerite C. Scavo
Grace E. Fitzgerald	Alice M. Simon
Eileen V. Flaherty	Janet A. Tellier
Helen G. Garity	Evelyn G. Young
Aini M. Hill	

3. Graduates from the Industrial School, June, 1928—50

Curtis Drake	Auto Mechanics Department
Remigio Giudici	Machine Department
Frederic J. Meda	Auto Mechanics Department
Edward Palmer	Auto Mechanics Department
Thomas Ernest Phillips	Cabinet Making Department
Joseph Slauger	Electrical Department
Ralph C. Sprague	Machine Department
Everett Thibodeau	Auto Mechanics Department

RECEIVING CERTIFICATES*

Fred A. Abdallah	Auto Mechanics Department
Rudolph L. Anderson	Cabinet Making Department
Joseph A. Callahan	Cabinet Making Department
Dominic J. Colarusso	Cabinet Making Department
Thomas M. Connors	Plumbing Department
George Henry Corbett	Cabinet Making Department
Frederick J. Coutts	Machine Department
Frank S. Crooker	Sheet Metal Department
Edmund H. Cutler	Machine Department
Ralph Gordon Davidson	Machine Department
Jerome M. Devine	Auto Mechanics Department
Arthur Duffy	Plumbing Department
John R. Glidden	Auto Mechanics Department
Fauthal A. Hassan	Auto Mechanics Department
Joseph A. Hassan	Plumbing Department
Walter H. Hendrickson	Cabinet Making Department
Carl Henry Johnson	Cabinet Making Department
John B. Johnson	Cabinet Making Department
Arne J. Lindahl	Sheet Metal Department
Joseph McTiernan	Electrical Department
Emilio R. Marinella	Sheet Metal Department
Fred Howard Merrill	Pattern Making Department
Marino Palumbo	Cabinet Making Department
Warren B. Parker	Cabinet Making Department
Joseph Petitti	Electrical Department
William Charles Phillips	Plumbing Department
William H. Pitts	Electrical Department
Joseph Pollara, Jr.	Auto Mechanics Department
Ellwood W. Prario	Cabinet Making Department
James Primavera	Pattern Making Department
Rubano Ricci	Auto Mechanics Department
Edward J. Ryan	Electrical Department
Phillip Louis Savard	Cabinet Making Department
Carlton H. Stoddard	Cabinet Making Department
Raymond Sullivan	Cabinet Making Department
Virge Thurber	Cabinet Making Department
Roger S. Troupe	Auto Mechanics Department
Hugo J. Waihkonen	Auto Mechanics Department
Leo Walsh	Auto Mechanics Department
Paul F. C. Walsh	Electrical Department
Thomas H. Walsh	Electrical Department
Rolf Winquist	Pattern Making Department

*These boys have completed their time at this school, but the State requires that they have six months' experience at the trade before they receive their diplomas.

These certificates are exchanged for diplomas whenever the trade period is completed.

APPENDIX C

SCHOOL STAFF AND TEACHERS' ORGANIZATIONS

1. Organization of Staff, December, 1928

Black face signifies attended without graduation.

Attendance for less than one year at an institution is not noted.

JAMES N. MUIR, B.S., Superintendent, University of Pennsylvania; elected 1927.

ALBERT H. COCHRANE, Assistant Superintendent, Harvard, Ed. M.; elected 1925.

Senior High School—Coddington Street

Teachers	Department	Where Educated	Date of Election
Ernest L. Collins	Head Master	Bates College	1912
George A. Wilson	Submaster, College Physics ..	Massachusetts Institute of Technology	1921
Josephine D. Baker	Dean of Girls, English	Wellesley College, Teachers' College of Columbia, Harvard Graduate School	1926
Adolphus L. Alexander	Latin department	Washington & Jefferson College, University of Pittsburgh, A. M.	1928
Sally F. Dawes*	English department	Radcliffe College, Middlebury College, A. M.	1913
Dorothy M. Fieldsend*	English department	Liverpool University, Edge Hill Training College
Leslie C. Millard	Commercial department	Salem Normal, Boston University, B. B. A.	1925
Joseph W. Thomas	Science department	Wesleyan University	1918
Clara E. Thompson	Mathematics department	Bridgewater Normal	1892
Charles B. Thomson	Manual Arts department	1913
Victoria M. H. Zeller	Modern Language department	Boston University, A. M. ...	1911
Ruth Adams	English	University of Chicago	1928
H. Russell Albro	Bookkeeping, Business Practice	Bay Path Institute	1925
Leland H. Anderson	Mechanical Drawing	Normal Art School	1923
J. Marjorie Bailey	English	Boston University, A. M. ...	1914
Louise H. Baker	Physical Training	Temple University	1928
Mary G. Barry	Commercial Geography	Maltby School of Short-hand, Brown University	1927
Frank L. Bridges	Chemistry, College Physics ...	Bates College	1924
Isabel S. Browne	English	Emerson College, Leland Powers School	1921
Helen F. Burke	Commercial Geography	Bridgewater Normal	1910
Margaret L. Burns	Bookkeeping, Commercial Law, Business Organization	Boston University	1919
Vera Call	English	Smith College	1927
E. Louise Clark	Latin	Colby College	1924
George S. Clark	Manual Training	Springfield Y. M. C. A. College	1920
Philip H. Claxton	Physical Training	East Shardsburg, Pa., State Teachers' College	1928

* Exchange teacher with Miss Fieldsend from England.

Senior High School—Coddington Street—Continued.

Teachers	Department	Where Educated	Date of Election
